BUILT TO SURVIVE
EXTREME WORKING CONDITIONS

About Winmate

Founded in 1996, Winmate Inc. is a pioneer in rugged computing technology. Winmate has provided business leaders worldwide with reliable, robust solutions for the most challenging industrial conditions for over two decades. From R&D to manufacturing to in-house testing, Winmate Inc. manages the entire product development process with ready-made products available for quick deployment. Today Winmate's innovative approach has helped countless enterprises at every level with equipment automation and seamless Industrial Internet of Things (IIoT) integration.

From the industrial display, panel PC, HMI, embedded systems to rugged mobile devices, Winmate caters to industries ranging from transportation and logistics to marine and military, railway, oil, and gas, and provides customization services to create a unique solution for specific customer requirements.

The Winmate Difference

Innovation and Ruggedness

With innovation and ruggedness, our products are designed to meet the requirements of vertical markets' environmental standards.

Engineering Intelligence

We are committed to maintaining the highest standards in engineering excellence to ensure our products deliver reliability, durability, and optimized performance.

Quality Commitment

Quality assurance and entire engineering processes are conducted in-house. It is why we invested significantly in our state-of-the-art testing facility with additional global support.

“
**INNOVATIVE
TECHNOLOGY FOR
OPERATIONAL
EXCELLENCE.**
”

Efficiency

Our team is committed to efficiency and maintaining the shortest possible development cycles. The whole development process is conducted in-house to achieve the market advantage in speed and quality from design to testing.

Reliability

Reliability, service, and support are part of our foundation. Every product scrutinizes industrial standards testing to verify electrical, mechanical, thermal, and firmware design performance.

Customized Solutions

Years of experience allow Winmate to offer customized solutions for different applications.

From product design to accessories, our engineering team designs and support the system integration process.

- CUSTOMIZED CONFIGURATION
- CUSTOM OS IMAGE
- CUSTOM BIOS
- ENCLOSURE DESIGN
- PERIPHERALS AND OPTIONS
- CUSTOM-DESIGNED ACCESSORIES

Technical Know-How

We understand that access to cutting-edge solutions purposely built for their applications is imperative for enterprises operating in rugged or potentially hazardous environments. As a result, Winmate locates its resources from project research and design, software development and customization, product verification and validation, and in-house testing to research and implement the latest technologies available.

The latest technologies we deploy for our rugged products:

- Dry and wet optical bonding
- Panel enhancement for sunlight readability
- Anti-reflection (AR) and anti-glare (AG) glass protection coating
- Light sensor
- Hyper dimming
- Electronic potting
- Touch screen integration: projected capacitive, resistive, or SAW touch
- Waterproof enclosure
- Military EMI and mesh coating
- Wireless capabilities
- Data capture devices integration
- Defroster for ultra-low temperature environments
- Stainless steel SUS 316/ AISI 316
- Shock and vibration resistance
- Wide-range operation temperature

Marine

Overview

Winmate understands the marine industry's needs and provides solutions to the unique challenges that the industry faces.

- **Ruggedness:** Winmate reliability tests ensure optimal performance in harsh environments, including exposure to humidity, shock, and vibration.
- **Panel Options:** Transflective screen or a high brightness display.
- **Viewability:** Numerous display and touch technologies and backlight intensities help enable sunlight viewability.
- **Design and Electronics:** Powder-coated aluminum housings feature anti-corrosion protection.

Industrial Challenges

To meet the marine industry's regulatory requirements, Winmate offers certified solutions for shipping navigation, monitoring and surveillance, and ship automation systems. Winmate understands the needs of the marine industry and provides solutions to industrial challenges:

- **Extreme environments**
Marine equipment faces extreme temperature changes, strong vibration, water drops.
- **Accurate chart depiction**
An accurate chart displaying is crucial in maritime applications.
- **Day, night, and dusk**
On-board computers must provide viewability in a day, night, and dusk conditions.

Technology

ECDIS Color Calibration

Winmate Marine Displays and Panel PCs can be adjusted to a day, dusk, or night mode to accommodate any lighting situation. Color settings are calibrated at the factory for accurate color reproduction according to the IEC 61174 ECDIS Standard.

Certificate

Winmate marine products are built and tested according to the DNV GL, IEC60945, and IACS-E10.

	DNV GL is an independent foundation to safeguard life, property, and the environment at sea and onshore. DNV certification pertains to the quality of ships, offshore units, and installations of the system and components. DNV requirements are harmonized with IACS Unified Requirements E10 and IEC publication 60945.
	<p>The International Association of Classification Societies (IACS) is a technology-based non-governmental organization that currently consists of twelve member marine classification societies. More than 90% of the world's cargo-carrying ships' tonnage is covered by the classification standards set by member societies of IACS.</p> <p>Marine classification is a system for promoting the safety of life, property, and the environment primarily through establishing and verifying compliance with technical and engineering standards for the design, construction, and life-cycle maintenance of ships, offshore units, and other marine-related facilities.</p>
	Equipment wished to be used in navigation and radio communication systems comply with IEC 60945, "Maritime navigation and radio communication equipment and systems – General Requirements- Method of testing and required test results."

Innovative Solutions

All Winmate marine products are built and tested according to DNV GL, IEC60945, and IACS-E10.

- Winmate reliability test ensures optimal performance in harsh maritime environments
- Powder-coated aluminum housing feature anti-corrosion protection, handle significant vibration and shock, and operation in high humidity
- Enhanced panel viewability and backlight intensity
- Transflective screen or a high brightness display
- ECDIS color calibration to accurately display navigational charts

Application Story

Bridge Workstation

Background

Winmate's marine panel PC was installed as a part of a navigational bridge system designed to plot and monitor a vessel's position. The system features the Automatic Identification System (AIS) Class B transport and electronic chart system. The updates of charting material are distributed to the craft through a WIFI router installed onboard.

Core Products

Main Challenges

- Customized software settings

Application Diagram: Bridge System

Why Winmate

- Certified DNV GL for marine applications
- ECDIS calibrated display with multitouch
- NMEA 0183 and DIDO interfaces for marine devices communication
- Vibration, shock, corrosion resistance

Winmate's DNV GL Certified Panel PC

Application Story

Command Center

Background

Modern ships have several advanced navigation equipment systems which give accurate data for the voyage. Winmate's panel PC and HMI feature brilliant display with projected capacitive touch screen and several features tailored for marine applications. Convenient user interface and functionality of application-focused marine panel PC and HMI give ship navigation officer precise location information and details of the journey. The use of the electronic chart system, allow ship's navigating crew to pinpoint locations, and attaining directions much easier than before.

Core Products

Defence

Overview

Winmate's rugged computing devices for military applications are designed to be tough and durable and undergo rigorous testing to ensure safety and performance, going beyond military standard compliance.

Winmate understands the needs of the military industry and provides solutions that can overcome these industrial challenges:

- MIL-STD 810-G Testing: For MIL-STD 810G compliance, Winmate tests the product against extreme environmental conditions (temperature, shock, vibration, humidity).
- MIL-STD 461-E/F/G Testing: For MIL-STD 461E/F/G compliance, detailed testing specification ensures that the product meets the requirements for controlling electromagnetic interference.

Built to survive drops, shocks, liquid spills, vibrations, dust, salt, and extreme temperatures, our specially designed military line of products has been tested for compliance to military MIL-STD-810G environmental and MIL-STD 461F EMC standards.

Technology

Military Certifications

All Winmate military products are built and tested according to military standards MIL-STD-810 and MIL-STD-461. Some of the selected products meet MIL-STD-3009 compliance of Type 1 (Direct View Image) Class B NVIS requirements.

 MIL-STD-461G	<p>MIL-STD-461G is the primary military testing standard for electromagnetic compatibility (EMC) in devices used by the U.S. Department of Defense (DoD). It outlines specific test procedures for EMC, covering radiated and conducted emissions, as well as radiated and conducted susceptibility. The DoD established the Electromagnetic Compatibility Program to address the importance of detecting illicit signals and electromagnetic interference in military operations.</p> <p>Notable changes from MIL-STD-461F to MIL-STD-461G include the removal of CS106 and the introduction of CS117 and CS118, representing significant advancements in EMC testing and standards.</p> <p>MIL-STD-461 is a United States Military Standard that describes testing equipment for electromagnetic compatibility.</p> <p>Specifically, MIL-STD-461G details testing specifications to ensure the conducted emissions (CE), showed susceptibility (CS), radiated emissions (RE), and radiated susceptibility (RS) of a system can meet the requirements for the control of electromagnetic interference.</p> <ul style="list-style-type: none">• MIL-STD-461 Method - CE101/CE102: Conducted Emissions• MIL-STD-461 Method - RE101/RE102: Radiated Emissions• MIL-STD-461 Method - CS101/CS106/CS109/CS114/CS115/CS116: Conducted Susceptibility• MIL-STD-461 Method - RS101/RS103: Radiated Susceptibility
 MIL-STD-461E/F	
 MIL-STD-810H	<p>The "H" in MIL-STD-810H indicates that it is the eighth revision of the standard. Each revision of MIL-STD-810 incorporates updates and improvements based on advancements in technology and lessons learned from field experience.</p> <p>MIL-STD-810H covers a broad range of environmental conditions, including temperature, humidity, altitude, vibration, shock, acceleration, rain, sand and dust exposure, solar radiation, fungus, and more. The standard provides detailed testing procedures and performance criteria for each environmental condition, allowing manufacturers to assess and demonstrate the durability and reliability of their equipment.</p>
 MIL-STD-810G	<p>The MIL-STD-810 test series are approved for use by all departments and agencies of the United States Department of Defense (DoD).</p> <p>The standard describes environmental management and engineering processes that can enormously value to generate confidence in a system's environmental worthiness and overall durability.</p> <ul style="list-style-type: none">• MIL-STD-810 Method 501.4: High Temperature• MIL-STD-810 Method 502.4: Low Temperature• MIL-STD-810 Method 507.4: Humidity• MIL-STD-810 Method 514.5: Vibration• MIL-STD-810 Method 516.5: Shock

Military Connectors

Winmate military Panel PC and Display come with MIL-DTL-38999 type I and III connectors – high-performance cylindrical connectors for cable-to-panel applications in military, air traffic control, or other mission-critical situations.

**MIL-DTL-38999/I
Power Connector**

**MIL-DTL-38999/III
VGA/RS232/USB-A/LAN**

Military Standard 1275 Power Supplies

Winmate defense products are equipped with MIL-STD-1275, a standard for 28V DC power attributes in military ground vehicles, ensuring consistency in electrical and electronic equipment connected to the vehicle's power network. Power system designers must adhere to these criteria, while equipment designers are responsible for ensuring their products seamlessly integrate with this power source.

Application Story

Military Vehicle Computer

Application Story

Military Rugged Laptop

Background

Warfighters also need mobile computing to work basically in the middle of nowhere, which maintains connectivity in remote locations. The better the technology the soldier, airman, marine, or sailor has in the field, the better their decision making and effectiveness. When deciding the right products for military and defense, you should be armed with the right information that leads to better choices.

Winmate L140AD series pass the drop test from a meter high and impact resistance with performance assurance according to the US Military Standard MIL-STD-810G and certified by IP65 protection to ensure no environment is too hazardous for these fully rugged notebooks.

Intel® Core i5 Series

“FEATURES MILITARY-SPECIFIC INTERFACES.”

- 8.4"/ 10.1" /10.4" Panel with direct optical bonding
- 8th Gen. Intel® Core™ i5-8265U, 1.6 GHz (turbo up to 3.90 GHz)
- Convertible Kickstand for Adjustable Support and Handling

Ecological seals protect ports as well as connectors from moisture and dust

MIL-STD-38999 connector for Giga LAN, RS232/RS422 and Power Input

Enhanced clarity and readability with 600 - 800 nits bright screen and optical bonding.

Sunlight readable display with touchscreen

Supports GPS GLONASS, Galileo, BeiDou (Optional)

Magnesium alloy housing with all-around elastomeric rubber

8.4" / 10.4" Defence Ultra-Rugged Tablet

Intel® Pentium® N4200 Series

“ BUILT TO HANDLE THE TOUGHEST TASKS. ”

- 8.4" / 10.4", resistive touchscreen
- Intel® Pentium® N4200 Apollo Lake 1.1 GHz (up to 2.5 GHz)
- Windows 10 IoT Enterprise

With daylight-readable screen 600 - 700 nits, optical bonding for clarity increasing and readability enhancing

Ecological seals protect ports as well as connectors from moisture and dust

Adjustable kickstand that is convertible to a handle

Magnesium alloy housing with all-around elastomeric rubber

MIL-STD-38999 connector for LAN/USB2.0, RS232/RS422 and DC Power Input

IP54 waterproof and dustproof

MIL-STD-810G shock, vibration, and drop resistance
