Introduction

Product Description

The IB980 PICMG1.3 SHB is based on the latest Intel® Q87 chipset. The platform supports 4th Generation Intel® Core processor family with LGA1150 packing and features an integrated dual-channel DDR3 memory controller as well as a graphics core.

Made with 22-nanometer technology, the latest Intel® processors provide advanced performance in both computing and graphics quality. This meets the requirement of customers in the gaming, POS, digital signage and server market segment.

The IB980 PICMG1.3 board utilizes the dramatic increase in performance provided Intel's latest cutting-edge technology. Measuring 338mm x122mm, the IB980 offers fast 6Gbps SATA support (6 ports), USB3.0 (4 ports) and interfaces for DVI-D, VGA and LVDS displays.

IB980 FEATURES:

- Supports Intel® 4th Generation Core i7/i5/i3 QC/DC desktop processors
- Two DDR3 DIMM, 1066/1333/1600MHz, Max. 16GB memory
- Dual Intel® PCI-Express Gigabit LAN
- Integrated graphics for VGA, DVI-D & LVDS displays
- 6x SATA 3.0, 10x USB 2.0, USB 3.0 (4 ports), 4x COM, Watchdog timer

Checklist

Your IB980 package should include the items listed below.

- The IB980 PICMG1.3 SHB
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility
- Serial ATA cable

IB980 Specifications

Product Name	IB980AF (Support LVDS & iAMT) IB980F (w/o LVDS, not support iAMT)
Form Factor	PICMG 1.3 SHB Express Full size CPU card
CPU Type	- 4 th Generation Intel® Core™ i7/i5/i3/Pentium DT processor - FCLGA1150 package [37.5 mm x 37.5mm] - TDP: QC=84W/45W ; DC=54W/35W
CPU Speed	Up to 4.0 GHz
Cache	Up to 8MB
BIOS	AMI BIOS
CPU Socket	LGA1150
Chipset	Intel® Lynx Point DT Platform Controller Hub, Q87 PCH Package =23 mm x 22 mm, 0.65 mm ball pitch
Memory	4 th Generation Intel® Core™ i7/i5/i3 DT processor integrated memory controller, support dual channel DDR3-1333/1600 MHz (Non-ECC) - DDR3 240-pin DIMM x 2, Max. 16GB [8GB in per DIMM]
VGA	4 th Generation Intel® Core™ i7/i5/i3 DT processor integrated graphics device - 1x VGA [Support to 1920x1080@60Hz] - 1x DVI-D: (Thru port C, Reserve level shifter) [Support to 1920x1200@60Hz] - 1x LVDS (Thru port B, via NXP PTN3460), support 24-bit dual channel [Support to 1920x1200@60Hz]
LAN	1. Intel® I217LM GbE PHY (For IB980AF, support iAMT) Intel® I217V GbE PHY (For IB980F) 2. Intel® I211AT as 2 nd GbE
USB	USB 2.0 host controller [Q87 Integrated], support 10 ports - 4 ports via onboard pin header - 1 port via Mini PCIe 4 ports on board, 4 ports to the backplane [Connector C] USB 3.0 host controller [Q87 integrated] support 4 ports - 2 ports via the rear panel I/O - 2 ports via on board pin header [BLUE color box header]
Serial ATA Ports	Intel® Lynx Point Desktop PCH built-in SATA controller, support 6 ports 4x SATAIII (3.0) 6Gbps 2 ports to the backplane [Connector C]
Audio	Intel® Q87 PCH built-in high definition audio w/ Realtek ALC662 Codec support 5.1 channel
LPC I/O	Fintek F81846AD-I (128-pin LQFP[14mm x 14 mm]) - COM #1 (RS232/422/485) support ring-in with power @500 mA (selectable for 5V or 12V) [EXAR SP339EER1 232/422/485 transceiver x 1 for jumper-less] - COM #2~COM #4 (RS232 only) Hardware Monitor (2 thermal inputs,4 voltage monitor inputs & 2 Fan headers) - CPU FAN x 1(PWM Fan type, 4-pin connector) - SYS FAN x 1 (DC Fan type, 3-pin connector)] - Supports parallel port
Digital IO	4 in & 4 out
Keyboard Mouse/ Connector	Supports PS/2 Keyboard/Mouse thru onboard pin-header
Expansion Slots	Mini PCIe socket x1@ component side [Full-sized] Support USB client & mSATA [share with onboard SATA] Support PCIe signal
Edge Connector	DB15 x1 for VGA RJ45 x 2 for LAN 1 & 2 USB 3.0 x 2

INSTALLATIONS

Onboard Header /Connector	DF11-20 pins pin-header x 2 for DVI-D x 1 DF20-20pins box-header x 2 for dual channel LVDS (IB980AF) 1 x 4 pins box header x 1 for LCD backlight control (IB980AF) 2x13 pins box-header x 1 for Printer port DF11-20 pins box-header x1 for COM1/2 DF11-20 pins box-header x1 for COM3/4 2x5 pins pin-header x 2 for USB 2.0 x 4 2x10 pins box-header x 1 for USB3.0 x 2 2x6 pins pin-header x1 for Audio (Line-Out, Line-In & Mic) 2x5 pins pin-header x 1 for Digital I/O 2x4 pins pin-header x 1 for PS/2 KB/MS 4 pins pin-header x1 for CPU fan (PWM mode) 3 pins pin-header x1 for system fan (DC mode) 4 ports x SATAIII (Blue connectors) 2X10 pins pin-header x 1 for front panel indicators 2 x 2 pin ATX power connector x 1
Interface	1x PCIe(16x) [Connector A & B] 4x PCIe(1x) or 1x PCIe(4x) [Connector C] 4x PCI masters (ITE IT8892E PCIe to PCI bridge, 14mm x 14mm LQFP128) [Connector D]
Watchdog Timer	Yes (256 segments, 0, 1, 2...255 sec/min)
iSMART ver. 3.0	1. EuP / ErP(thru Super I/O) 2. Auto-scheduler 3. Power fail detector 4. Low temperature Guardian 5. IFUB (Intelligent Firmware Update from BIOS & NVRAM data)
Others	- RAID function (0, 1, 5, 10) - iAMT 9.0 - LAN wake up - TPM 1.2 (Infineon SLB9655) supported
Environment	Operation Temperature: 0~60 degree C Storage Temperature: -20~80 degree C Relative humidity: 0~90%, non-condensing
System Voltage	+5V, +3.3V, +12V, -12V & 5VSB
Operation System	Windows 7, Windows 8
Certification	CE /FCC/LVD
RoHS	Yes
Board Size	338mm x 126mm

Board Dimensions

Installations

This section provides information on how to use the jumpers and connectors on the IB980 in order to set up a workable system. The topics covered are:

Installing the CPU	9
Installing the Memory	10
Setting the Jumpers	11
Connectors on IB980	16

Installing the CPU

The IB980 board supports an LGA1150 Socket (shown below) for Intel Sandy Bridge processors.

To install the CPU, unlock first the socket by pressing the lever sideways, then lift it up to a 90-degree. Then, position the CPU above the socket such that the CPU corner aligns with the gold triangle matching the socket corner with a small triangle. Carefully insert the CPU into the socket and push down the lever to secure the CPU. Then, install the heat sink and fan.

NOTE: *Ensure that the CPU heat sink and the CPU top surface are in total contact to avoid CPU overheating problem that would cause your system to hang or be unstable.*

Installing the Memory

The IB980 board supports four DDR3 memory socket for a maximum total memory of 16GB in DDR3 DIMM memory type.

Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3 module so that the key of the DDR3 module aligned with that on the memory slot.
2. Gently push the DDR3 module in an upright position until the clips of the slot close to hold the DDR3 module in place when the DDR3 module touches the bottom of the slot.
3. To remove the DDR3 module, press the clips with both hands.

Setting the Jumpers

Jumpers are used on IB980 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on IB980 and their respective functions.

Jumper Locations on IB980	12

J15,J16: USB2.0 Connectors

Signal Name	Pin #	Pin #	Signal Name
VCC(500mA)	1	2	VCC(500mA)
D0-	3	4	D1-
D0+	5	6	D1+
Ground	7	8	Ground
KEY	9	10	NC

CN8: Gigabit LAN (Intel I211AT) Connector

CN9: Gigabit LAN (Intel I217LM) Connector

J17: LCD Backlight Connector [E-CALL_0110-161-040]

Pin #	Signal Name
1	Backlight Power +12V(2A)
2	Backlight Enable
3	Backlight Control
4	Ground

CN11, CN12: USB3.0 Connectors

J3: Front Panel Function Connector

Signal Name	Pin #	Pin #	Signal Name
VCC	1	2	Speaker Out
NC	3	4	NC
Ground	5	6	Ground
NC	7	8	VCC
Ground	9	10	NC
Ground	11	12	NC
Ground	13	14	PWR_SW
NC	15	16	NC
Ground	17	18	RST
HDD LED +	19	20	HDD LED -

CN1,CN2: DDR3 DIMM Socket

INSTALLATIONS

J6: External Audio Connector [HK_DF11-12S-PA66H]

J6 is a 12-pin header that is used to connect to the optional audio cable.

Signal Name	Pin #	Pin #	Signal Name
LINE OUT_R	2	1	LINE OUT_L
Ground	4	3	JD_FRONT
LINE IN_R	6	5	LINE IN_L
Ground	8	7	JD_LINE IN
MIC-R	10	9	MIC-L
Ground	12	11	JD_MIC1

J7: ATX 12V Power Connector [Win Win_WPO-04D4TN431UW]

This connector supplies the CPU operating voltage.

Pin #	Signal Name
1	Ground
2	Ground
3	+12V-IN
4	+12V-IN

J12: Digital I/O 4 In/4 Out

Signal Name	Pin #	Pin #	Signal Name
GND	1	2	VCC
OUT3	3	4	OUT1
OUT2	5	6	OUT0
IN3	7	8	IN1
IN2	9	10	IN0

J9: PS/2 Keyboard and Mouse Connectors [HK_DF11-8S-PA66H]

Signal Name	Pin #	Pin #	Signal Name
VCC(300mA)	2	1	VCC(300mA)
KB_DATA	4	3	MS_DATA
KB_CLK	6	5	MS_CLK
Ground	8	7	Ground

J10: SPI Flash Connector (Factory use only)

J5: Parallel Port [Win Win F-WBOX-26RN]

Signal Name	Pin #	Pin #	Signal Name
Line printer strobe	1	14	Auto Feed
PD0, parallel data 0	2	15	Error
PD1, parallel data 1	3	16	Initialize
PD2, parallel data 2	4	17	Select
PD3, parallel data 3	5	18	Ground
PD4, parallel data 4	6	19	Ground
PD5, parallel data 5	7	20	Ground
PD6, parallel data 6	8	21	Ground
PD7, parallel data 7	9	22	Ground
ACK, acknowledge	10	23	Ground
Busy	11	24	Ground
Paper empty	12	25	Ground
Select	13	26	Ground

J8: MCU Flash Connector (factory use only)

J13: DVI-D Port [HK_DF11-20S-PA66H]

J13 is a 20-pin header that is used to connect to the optional DVI-D cable.

Signal Name	Pin #	Pin #	Signal Name
TDC1#_B	2	1	TDC1_B
Ground	4	3	Ground
TLC#_B	6	5	TLC_B
5V	8	7	Ground
N.C.	10	9	HPDET_B
TDC2#_B	12	11	TDC2_B
Ground	14	13	Ground
TDC0#_B	16	15	TDC0_B
N.C.	18	17	N.C.
SC_DDC_B	20	19	SD_DDC_B

CN10: Mini PCIE Connector (Support M-SATA with CN5)

CN10 also supports mSATA. However, when CN10 is used for mSATA, then CN5 SATA port cannot be used. Only one of them can be used at one time to support SATA.

CPU_FAN1: CPU Fan Power Connector

Pin #	Signal Name
1	Ground
2	+12V(1A)
3	Rotation detection
4	Control

SYS_FAN1: System Fan1 Power Connector

Pin #	Signal Name
1	Ground
2	+12V(1A)
3	Rotation detection

J18, J19: LVDS Connectors [HIROSE_DF20G-20DP-1V(56)]

Signal Name	Pin #	Pin #	Signal Name
LCD_PWR(1A)	19	20	LCD_PWR(1A)
LD3+	17	18	LD3-
GND	15	16	GND
CLK+	13	14	CLK-
GND	11	12	GND
LD2+	9	10	LD2-
GND	7	8	GND
LD1+	5	6	LD1-
GND	3	4	GND
LD0+	1	2	LD0-

J18(Odd Bus), J19(Even Bus)

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction	30
BIOS Setup	30
Advanced Settings	32
Chipset Settings	45
Boot Settings.....	53
CSM parameters	54
Security Settings	55
Save & Exit Settings	56

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also has password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

Press to Enter Setup

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

Relaxed Ordering		Disabled			
Extended Tag		Disabled			
No Snoop		Enabled			
Maximum Payload		Auto			
Maximum Read Request		Auto			
PCI Express Link Register Settings					
ASPM Support		Disabled			
WARNING: Enabling ASPM may cause some PCI-E devices to fail		Disabled			
Extended Synch		Disabled			
Link Training Retry		5			
Link Training Timeout (uS)		100			
Unpopulated Links		Keep Link ON			
Restore PCIe Registers		Disabled			

Relaxed Ordering

Enables or disables PCI Express Device Relaxed Ordering.

Extended Tag

If ENABLED allows device to use 8-bit Tag field as a requester.

No Snoop

Enables or disables PCI Express Device No Snoop option.

Maximum Payload

Set Maximum Payload of PCI Express Device or allow System BIOS to select the value.

Maximum Read Request

Set Maximum Read Request Size of PCI Express Device or allow System BIOS to select the value.

ASPM Support

Set the ASPM Level: Force L0s – Force all links to L0s State:
AUTO – BIOS auto configure: DISABLE – Disables ASPM.

Extended Synch

If ENABLED allows generation of Extended Synchronization patterns.

Link Training Retry

Defines number of Retry Attempts software will take to retrain the link if previous training attempt was unsuccessful.

Link Training Timeout (uS)

Defines number of Microseconds software will wait before polling 'Link Training' bit in Link Status register. Value range from 10 to 1000 uS.

Unpopulated Links

In order to save power, software will disable unpopulated PCI Express links, if this option set to 'Disable Link'.

Restore PCIE Registers

On non-PCI Express aware OS's (Pre Windows Vista) some devices may not be correctly reinitialized after S3. Enabling this restores PCI Express device configuration on S3 resume

Warning: Enabling this may cause issues with other hardware after S3 resume.

			Adjacent Cache Line Prefetch	Enabled	F1: General Help
			EIST	Enabled	F2: Previous Values
			Turbo Mode	Enabled	F3: Optimized Default
			Intel TXT(LT) Support	Disabled	F4: Save ESC: Exit

Active Processor Cores

Number of cores to enable in each processor package.

Limit CPUID Maximum

Disabled for Windows XP.

Execute Disable Bit

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, Red Hat Enterprise 3 Update 3.)

Intel Virtualization Technology

When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

Hardware Prefetcher

To turn on/off the Mid level Cache (L2) streamer Prefetcher.

Adjacent Cache Line Prefetch

To turn on/off prefetching of adjacent cache lines.

EIST

Enabled/Disabled Intel Speedstep

Intel TXT(LT) Support

Enables or Disables Intel (R)TXT (LT) Support.

SATA Configuration

					F1: General Help
					F2: Previous Values
					F3: Optimized Default
					F4: Save ESC: Exit

Power-On after Power failure

This field sets the system power status whether Disable or Enable when power returns to the system from a power failure situation.

Temperature Guardian

Generate the reset signal when system hangs up on POST.

iSmart Controller

Setup the power on time for the system.

Schedule Slot 1 / 2

Setup the hour/minute for system power on.

AMT Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
Intel AMT			Enabled		
BIOS Hotkey Pressed			Disabled		
MEBx Selection Screen			Disabled		
Hide Un-Configure ME Confirmation			Disabled		
Un-Configure ME			Disabled		
Amt Wait Timer			0		
Activate Remote Assistance Process			Disabled		→ ← Select Screen
USB Configure			Enabled		↑ ↓ Select Item
PET Progress			Enabled		Enter: Select
AMT CIRA Timeout			0		+ - Change Field
Watchdog			Disabled		F1: General Help
OS Timer			0		F2: Previous Values
BIOS Timer			0		F3: Optimized Default
					F4: Save ESC: Exit

AMT Configuration

This configuration is supported only with IB980VF (with iAMT function). Options are Enabled and Disabled.

Note: iAMT H/W is always enabled. This option just controls the BIOS extension execution. If enabled, this requires additional firmware in the SPI device.

Unconfigure ME

This configuration is supported only with IB980VF (with iAMT function). Perform AMT/ME unconfigure without password operation.

Amt Wait Timer

Set timer to wait before sending ASF_GET_BOOT_OPTIONS.

Activate Remote Assistance Process

Trigger CIRA boot.

PET Progress

User can Enable/Disable PET Events progress to receive PET events or not.

Watchdog Timer

This configuration is supported only with IB980VF (with iAMT function). Enable/Disable Watchdog Timer.

USB Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
USB Configuration				→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Field F1: General Help F2: Previous Values F3: Optimized Default F4: Save ESC: Exit	
USB Devices: 2 Hubs					
Legacy USB Support		Enabled			
USB3.0 Support		Enabled			
XHCI Hand-off		Enabled			
EHCI Hand-off		Enabled			
USB Mass Storage Driver Support		Enabled			
USB hardware delays and time-outs:					
USB Transfer time-out		20 sec			
Device reset time-out		20 sec			
Device power-up delay		Auto			

Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected.

DISABLE option will keep USB devices available only for EFI applications.

USB3.0 Support

Enable/Disable USB3.0 (XHCI) Controller support.

XHCI Hand-off

This is a workaround for OSeS without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

EHCI Hand-off

Enabled/Disabled. This is a workaround for OSeS without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

USB Mass Storage Driver Support

Enable/Disable USB Mass Storage Driver Support.

USB Transfer time-out

The time-out value for Control, Bulk, and Interrupt transfers.

Device reset time-out

USB mass Storage device start Unit command time-out.

Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

F81846 Super IO Configuration

Save Changes and Exit

Exit system setup after saving the changes.

Discard Changes and Exit

Exit system setup without saving any changes.

Save Changes and Reset

Reset the system after saving the changes.

Discard Changes and Reset

Reset system setup without saving any changes.

Save Changes

Save Changes done so far to any of the setup options.

Discard Changes

Discard Changes done so far to any of the setup options.

Restore Defaults

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the SHB. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility	58
VGA Drivers Installation	60
Realtek HD Audio Driver Installation	63
LAN Drivers Installation	65
Intel® Management Engine Interface	68
Intel® USB 3.0 Drivers	70

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**.

2. Click **Intel(R) Chipset Software Installation Utility**.

3. When the Welcome screen to the Intel® Chipset Device Software appears, click **Next** to continue.
4. Click **Yes** to accept the software license agreement and proceed with the installation process.
5. On the Readme File Information screen, click **Next** to continue the installation.

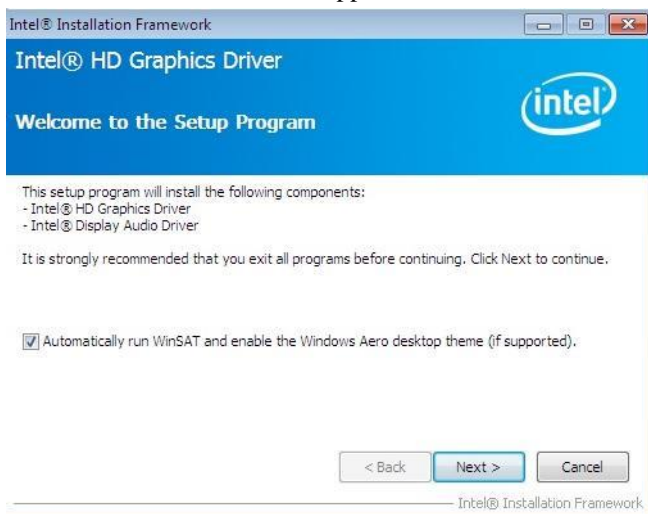

6. The Setup process is now complete. Click **Finish** to restart the computer and for changes to take effect.

VGA Drivers Installation

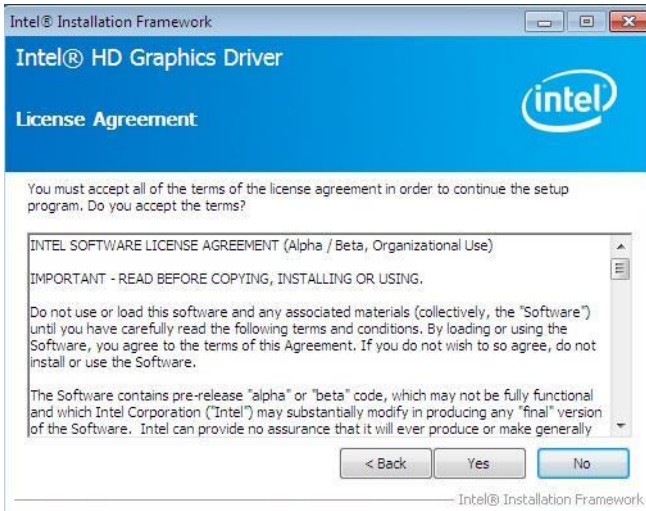

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**.

2. Click **Intel(R) Core(TM) i3/i5/i7 Graphics Driver**.
3. When the Welcome screen appears, click **Next** to continue.

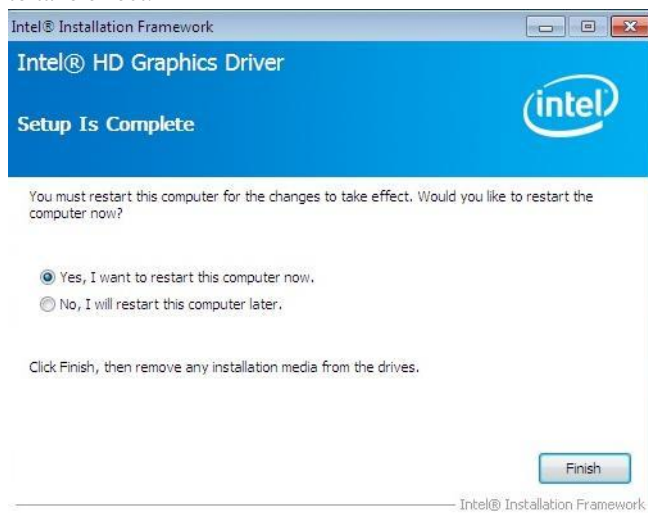

4. Click **Yes** to to agree with the license agreement and continue the installation.

5. On the screen shown below, click **Install** to continue.

6. Setup complete. Click **Finish** to restart the computer and for changes to take effect.

Realtek HD Audio Driver Installation

1. Insert the DVD that comes with the board. Click *Intel* and then *Intel(R) 8 Series Chipset Drivers*.

2. Click *Realtek High Definition Audio Driver*.

3. On the Welcome to the InstallShield Wizard screen, click **Yes** to proceed with and complete the installation process.

4. The InstallShield Wizard Complete. Click **Finish** to restart the computer and for changes to take effect.

LAN Drivers Installation

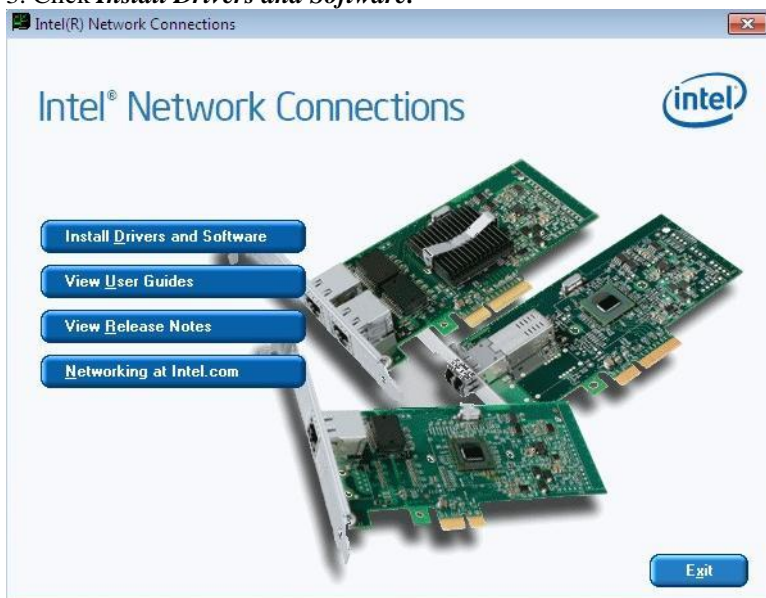

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**.

2. Click **Intel(R) PRO LAN Network Driver**.

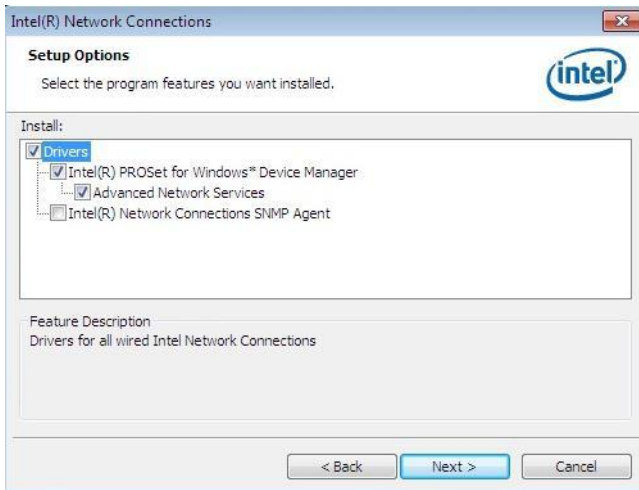

3. Click **Install Drivers and Software**.

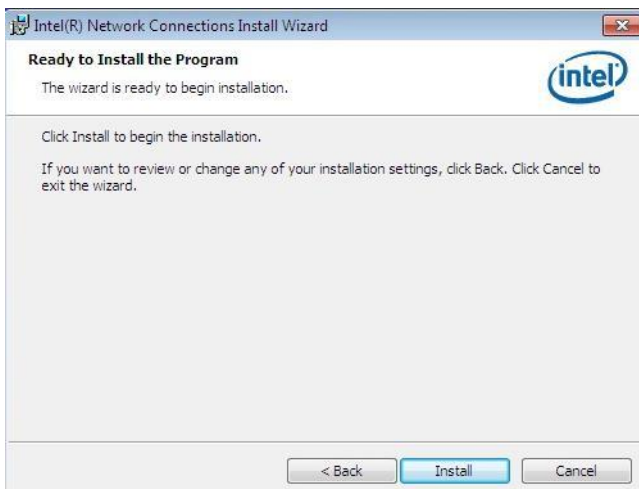

4. When the Welcome screen appears, click **Next**.

5. Click **Next** to agree with the license agreement.
6. Click the checkbox for **Drivers** in the Setup Options screen to select it and click **Next** to continue.

7. The wizard is ready to begin installation. Click **Install** to begin the installation.

8. When InstallShield Wizard is complete, click **Finish**.

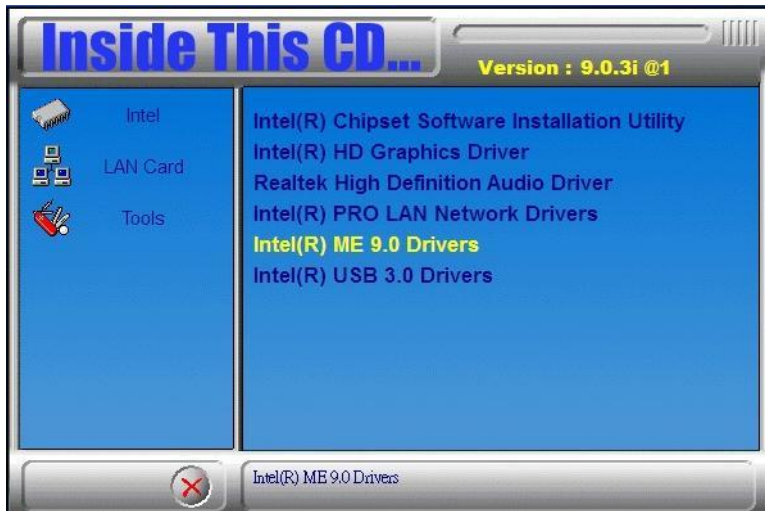

Intel® Management Engine Interface

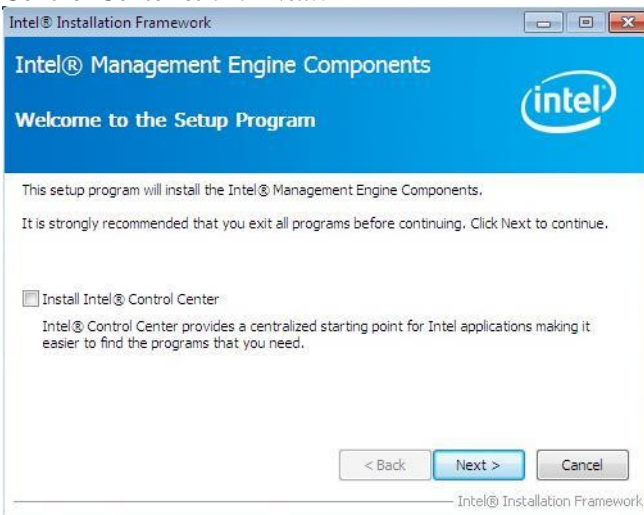

The following application requires Microsoft .NET Framework 3.5 or later: Intel® Management Engine Components. Please install the latest version of Microsoft .NET Framework from Microsoft Download Center to run this application correctly.

Follow the steps below to install the Intel Management Engine.

1. Insert the DVD that comes with the board. Click *Intel* and then *Intel(R) 8 Series Chipset Drivers* and then *Intel(R) AMT 9.0 Drivers*.

2. When the Welcome screen to the InstallShield Wizard for Intel® Management Engine Components, click the checkbox for **Install Intel® Control Center** & click **Next**.

3. Click **Yes** to agree with the license agreement.

4. When the Setup Progress screen appears, click **Next**. Then, click **Finish** when the setup progress has been successfully installed.

Intel® USB 3.0 Drivers

1. Insert the DVD that comes with the board. Click *Intel* and then *Intel(R) 8 Series Chipset Drivers*.

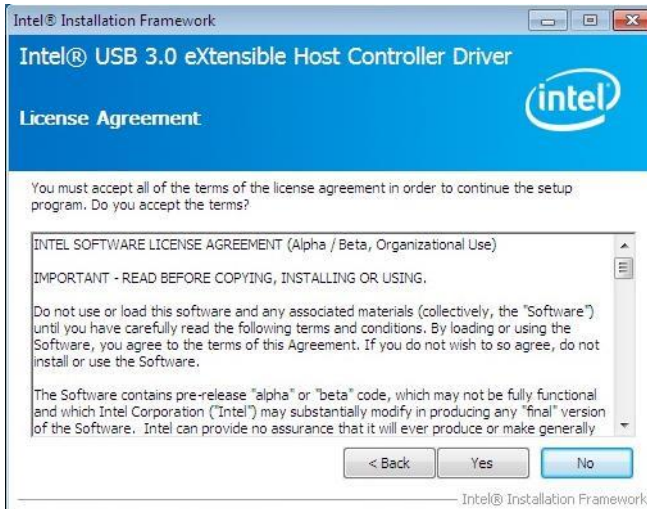

2. Click *Intel(R) USB 3.0 Drivers*.

3. When the Welcome screen to the InstallShield Wizard for Intel® USB 3.0 eXtensible Host Controller Driver, click *Next*.

4. Click *Yes* to agree with the license agreement and continue the installation.

5. On the Readme File Information screen, click **Next** to continue the installation of the Intel® USB 3.0 eXtensible Host Controller Driver.
6. Setup complete. Click **Finish** to restart the computer and for changes to take effect.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
000h - 01Fh	DMA Controller #1
020h - 03Fh	Interrupt Controller #1
040h - 05Fh	Timer
060h - 06Fh	Keyboard Controller
070h - 07Fh	Real Time Clock, NMI
080h - 09Fh	DMA Page Register
0A0h - 0BFh	Interrupt Controller #2
0C0h - 0DFh	DMA Controller #2
0F0h	Clear Math Coprocessor Busy Signal
0F1h	Reset Math Coprocessor
1F0h - 1F7h	IDE Interface
2F8h - 2FFh	Serial Port #2(COM2)
2B0h- 2DFh	Graphics adapter Controller
360h - 36Fh	Network Ports
3F8h - 3FFh	Serial Port #1(COM1)

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System Timer Output
IRQ1	Keyboard
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ8	Real Time Clock
IRQ14	Primary IDE
IRQ15	Secondary IDE

C. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
