# Packing List

---

Before setting up your product, please make sure the following items have been shipped:

| Item                                               | Quantity |
|----------------------------------------------------|----------|
| System kit                                         | 1        |
| Screw I Head for 2.5" HDD M3x8L (25KSG-130081-K1R) | 4        |
| SATA Cable (25CF4-170020-S9R)                      | 1        |
| Terminal Blocks Male Plug (25IO0-5ESDV0-D2R)       | 1        |
| Exsiccator (25g)                                   | 1        |

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

## About this Document

---

This User's Manual contains all the essential information, such as detailed descriptions and explanations on the product's hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the [GIGAIPC.com](http://GIGAIPC.com) for the latest version of this document.

## Safety Precautions

---

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. Make sure the power source matches the power rating of the device.
3. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
4. Always completely disconnect the power before working on the system's hardware.
5. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
6. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
7. Always disconnect this device from any AC supply before cleaning.
8. While cleaning, use a damp cloth instead of liquid or spray detergents.
9. Make sure the device is installed near a power outlet and is easily accessible.
10. Keep this device away from humidity.
11. Place the device on a solid surface during installation to prevent falls
12. Do not cover the openings on the device to ensure optimal heat dissipation.

13. Watch out for high temperatures when the system is running.
14. Do not touch the heat sink or heat spreader when the system is running
15. Never pour any liquid into the openings. This could cause fire or electric shock.
16. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.
17. If any of the following situations arises, please the contact our service personnel:
  - i. Damaged power cord or plug
  - ii. Liquid intrusion to the device
  - iii. Exposure to moisture
  - iv. Device is not working as expected or in a manner as described in this manual
  - v. The device is dropped or damaged
  - vi. Any obvious signs of damage displayed on the device
18. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

## FCC Statement

---

### **Warning!**

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

### **Caution:**

*There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.*

### **Attention:**

*Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.*

## **Chapter 3 – Hardware Information 29**

|        |                                                                 |    |
|--------|-----------------------------------------------------------------|----|
| 3.1    | Jumpers and Connectors .....                                    | 30 |
| 3.2.1  | FAN (FAN connector) .....                                       | 33 |
| 3.2.2  | DC IN (DC IN 1x4pin power connector) .....                      | 34 |
| 3.2.3  | COM1, COM2, COM3, COM4 (Serial port header) .....               | 35 |
| 3.2.4  | SPK_OUT (Speaker out connector) .....                           | 36 |
| 3.2.5  | JCOM1 (RI# pin RI#/5V/12V Select jumper for COM1 port)<br>..... | 37 |
| 3.2.6  | JRS11-JRS14 (RS11-14 select jumper for serial port).....        | 38 |
| 3.2.7  | AT_CN (AT/ATX mode select jumper).....                          | 39 |
| 3.2.8  | LSW (LVDS resolution jumper) .....                              | 40 |
| 3.2.9  | LVDS (LVDS connector).....                                      | 41 |
| 3.2.10 | BKL_CN (Backlight control connector).....                       | 42 |
| 3.2.11 | BUZZER (buzzer header) .....                                    | 43 |
| 3.2.12 | BATTERY (Battery cable connector).....                          | 44 |
| 3.2.13 | SATAPW (SATA power connector).....                              | 45 |
| 3.2.14 | SATAIII (SATA 6Gb/s Connector) .....                            | 46 |
| 3.2.15 | FUSB2_1, FUSB2_2 (USB 2.0 header).....                          | 47 |
| 3.2.16 | GPIO_CNT (General Purpose input/output header) .....            | 48 |
| 3.2.17 | SYS_PANEL (Front panel header) .....                            | 49 |
| 3.2.18 | MPCIE (Mini PCIe slot).....                                     | 50 |

|        |                                                 |    |
|--------|-------------------------------------------------|----|
| 3.2.19 | M2M (M.2 slot, 2242 M-key) .....                | 51 |
| 3.2.20 | SIM_CARD (3G/4G SIM Slot) .....                 | 52 |
| 3.2.21 | SODIMMA, SODIMMB (2 x DDR3L SO-DIMM sockets) .. | 53 |
| 3.2.22 | LAN1, LAN2 (GbE LAN Connectors).....            | 54 |
| 3.2.23 | FUSB30 (USB 3.2 Gen 1 connector) .....          | 55 |
| 3.2.24 | HDMI (HDMI Connector).....                      | 56 |
| 3.2.25 | VGA (VGA port).....                             | 57 |
| 3.2.26 | CLR_CMOS (Clear CMOS jumper).....               | 58 |

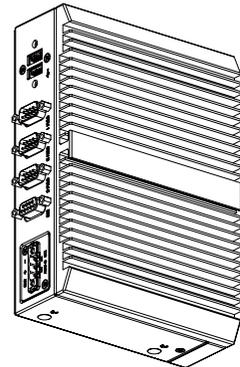

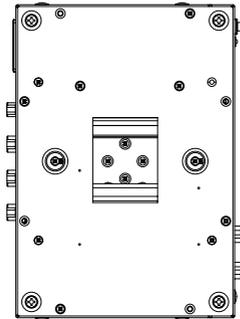

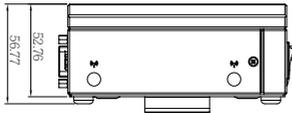

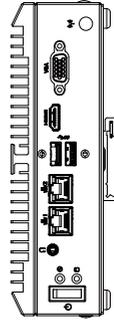

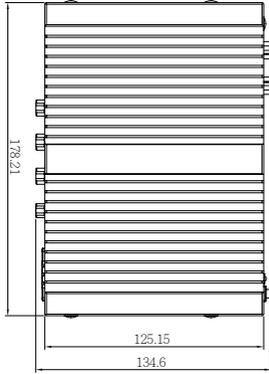

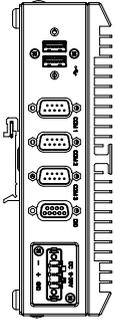

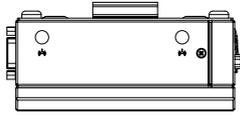

## **Chapter 4 – BIOS 59**

## Chapter 2

---

Chapter 2 – QBiX-Pro-APLC4200H-B1  
Industrial Embedded System Kit

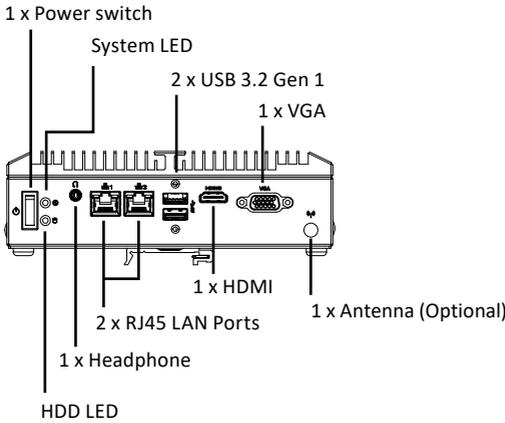

# 2.1 Dimension

---

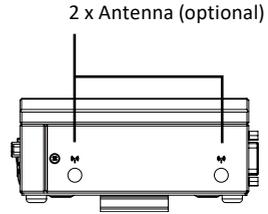

## 2.2 Getting Familiar with Your Unit

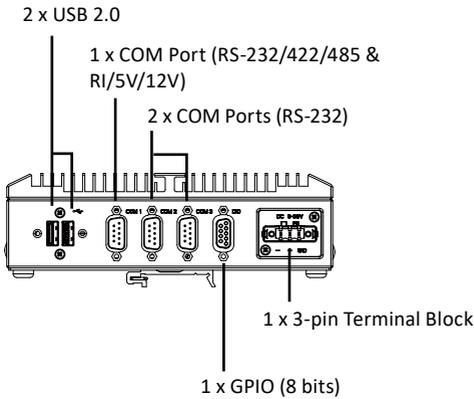

### [Front Side]

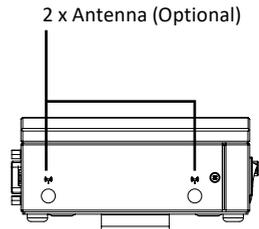

### [Left Side]

### [Rear Side]

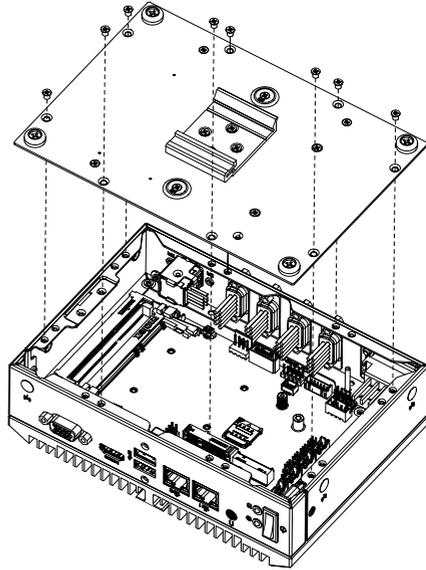

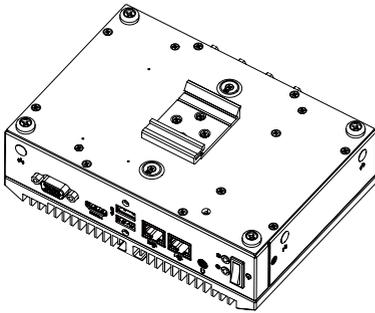

### [Right Side]

## [Install]

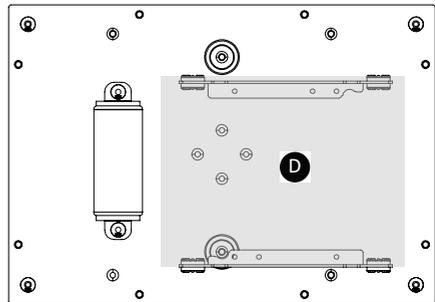

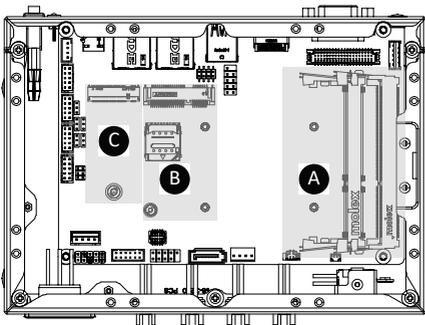

- \* Before opening the case, make sure to unplug the power cord.
- \* Before Connecting the power, make sure to fasten the case securely.

## [Bottom PCB Side]

|   | Information                      |
|---|----------------------------------|
| A | 2 x DDR3L SO-DIMM sockets        |
| B | 1 x Mini PCIe slot with SIM Slot |

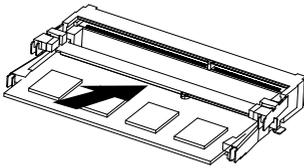

|   | Information                 |
|---|-----------------------------|
| C | 1 x M.2 slot 2242 M-key     |
| D | Support 2.5" Hard drive/SSD |

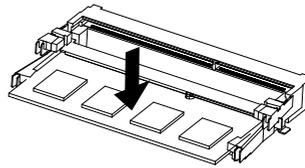

## 2.3 A) Memory Installation: DDR3L SO-DIMM

**1**

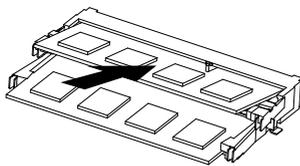

Carefully insert SO-DIMM memory modules.

**2**

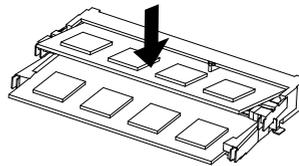

Push down until the modules click into place.

**3**

Carefully insert SO-DIMM memory modules.

**4**

Push down until the modules click into place.

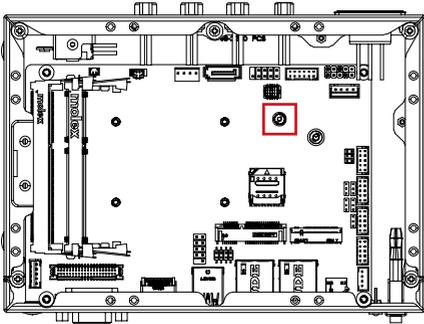

## 2.4 B) Mini PCIe Card Installation: How to safely install the Mini PCIe Card

---

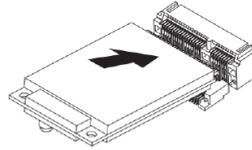

1

Remove the screw from the screw hole (Location : MSO1)

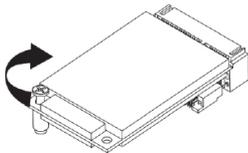

2

Carefully insert the Mini PCIe Card into the slot.

3

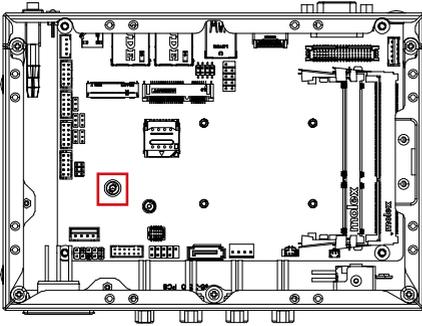

Secure the Mini PCIe Card with screw.

## 2.5 C) M.2 SSD Installation: How to safely install the M.2 2242 SSD

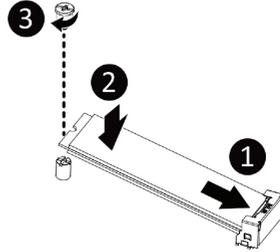

1

Remove the screw from the screw hole (Location : MSO2)

2

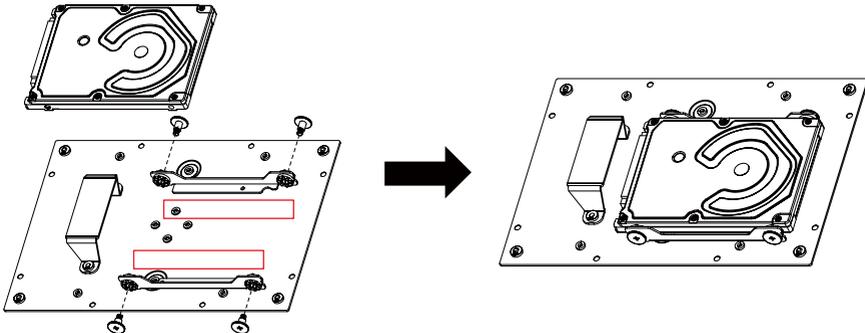

Carefully insert the M.2 SSD into the slot, and secure with the screw.

## 2.6 D) 2.5" HDD/SSD installation: How to install 2.5" HDD/SSD

---

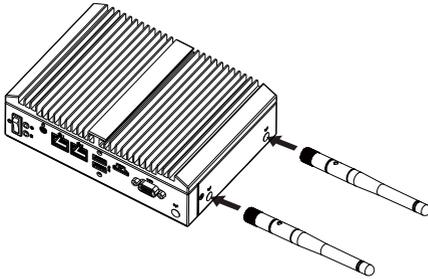

- 1** Remove 2 release papers on the thermal pad. (Located as shown in below red)
- 2** First : assemble the SATA cable and 2.5" HDD/SSD.  
Second : install 2.5" HDD/SSD (Gold finger of 2.5" HDD/SSD must face down), and secure with 4 screws.
- 3** Assemble the SATA cable on the SATA connector, and lock the bottom cover.

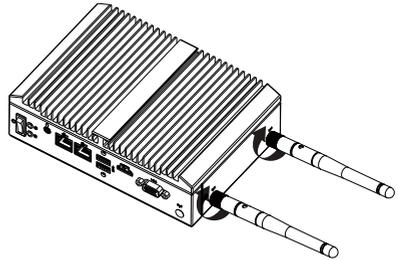

## 2.7 Antenna Installation (Antenna inclusion may vary based on local distribution)

**1**

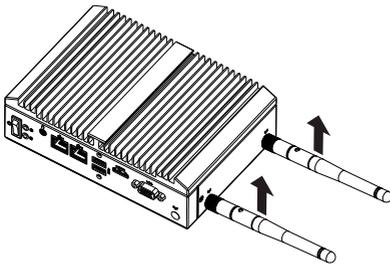

Carefully insert the antennas into the connectors.

**2**

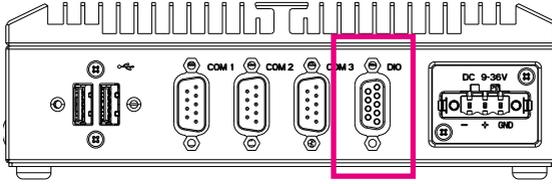

Turn the antennas clockwise until they are completely secure on the connectors.

**3**

Flip up the antenna heads so that they are perpendicular to the machine.

## 2.8 DIO (GPIO) Pin Define

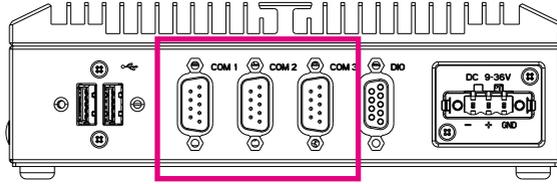

| DIO (GPIO)           |               |
|----------------------|---------------|
|                      |               |
| DIO 25CR5-050600-S9R |               |
| Pin No.              | Pin Define    |
| 1                    | GPIO-output_1 |
| 2                    | GPIO-input_1  |
| 3                    | GPIO-output_2 |
| 4                    | GPIO-input_2  |
| 5                    | GPIO-output_3 |
| 6                    | GPIO-input_3  |
| 7                    | GPIO-output_4 |
| 8                    | GPIO-input_4  |
| 9                    | 5V            |

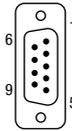

**Caution:** The GPIO 8 bits, on the terminal does not meet limited power source (LPS) requirements. This port is limited to only 5V for the specific end products and are provided with a molded plastic Fire Enclosure. Rated minimum 94V-1 or Metal enclosure.

## 2.9 DB9 COM Pin Define

DB9 COM

25CF8-180620-S9R

| Pin No. | RS-232 | RS-422<br>Full Duplex | RS-485<br>Half Duplex |
|---------|--------|-----------------------|-----------------------|
| 1       | DCD    | TXD-                  | D-                    |
| 2       | RXD    | TXD+                  | D+                    |
| 3       | TXD    | RXD+                  | —                     |
| 4       | DTR    | RXD-                  | —                     |
| 5       | GND    |                       |                       |
| 6       | DSR    | —                     | —                     |
| 7       | RTS    | —                     | —                     |
| 8       | CTS    | —                     | —                     |
| 9       | RI     | —                     | —                     |

## 2.10 Support

---

- For a list of tested memory, M.2, 2.5'' SSD, wireless adapters and OS supported, go to: <http://www.gigaipc.com>
- To download the latest drivers and BIOS updates, go to: <http://www.gigaipc.com>
- For product support, go to: <http://www.gigaipc.com>

## 2.11 Safety and Regulatory Information

---

Risk of explosion if the battery is replaced with an incorrect type. Batteries should be recycled where possible.

Disposal of used Batteries must be in accordance with local environmental regulations.

Failure to use the included Power Adapter may violate regulatory compliance and may expose the user to safety hazards.

**HDMI™**  
HIGH DEFINITION MULTIMEDIA INTERFACE

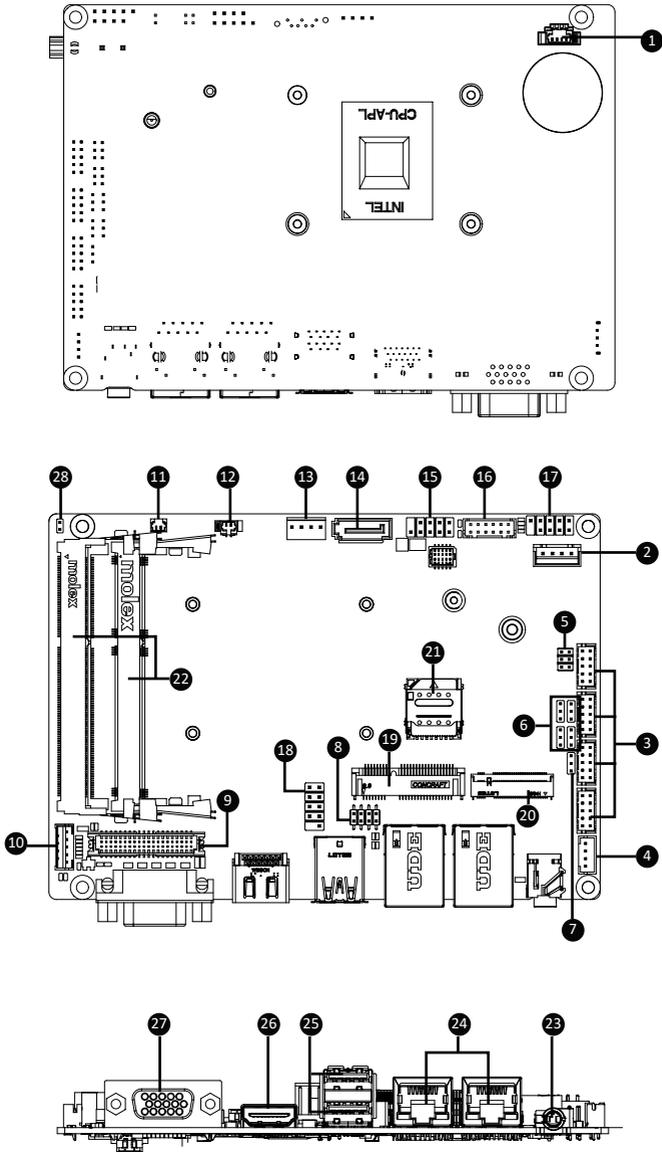

At the end of its serviceable life, this product should not be treated as household or general waste. It should be handed over to the applicable collection point for the recycling of electrical and electronic equipment, or returned to the supplier for disposal.

| 10      | RI         | -                  | -                  |

Connector PN

725-81-10TW00

A2004WV-2X05P46

Vendor

PINREX

JOINT-TECH

Connector type

2x5pin header, pitch 2.0mm

Note :

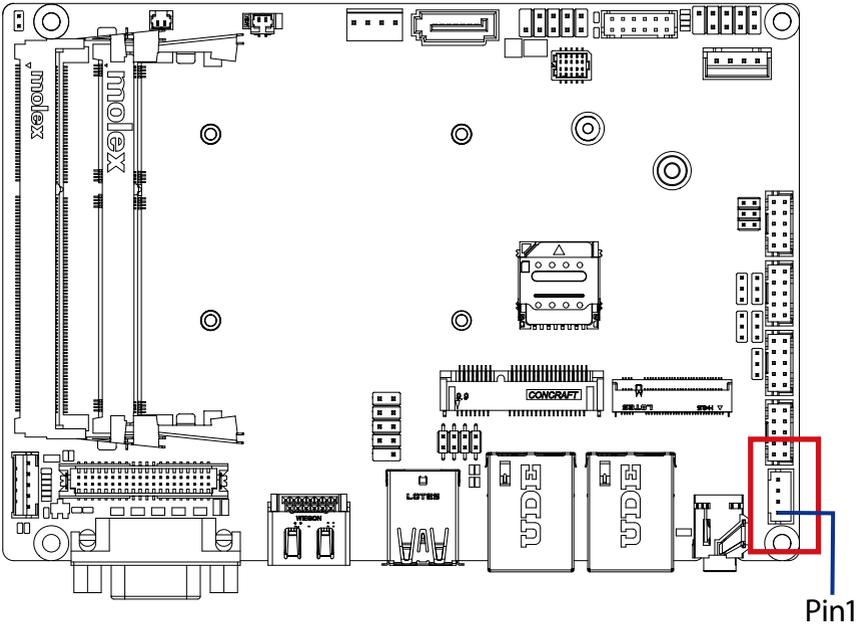

COM1 : Support RS-232/422/485 & RI/5V/12V

For RI/5V/12V jumper setting, please see P. 31

COM2, COM3, COM4 : Support RS-232 only

### 3.2.4 SPK\_OUT (Speaker out connector)

4

| Speaker out connector |  |
|-----------------------|--|
|                       |  |

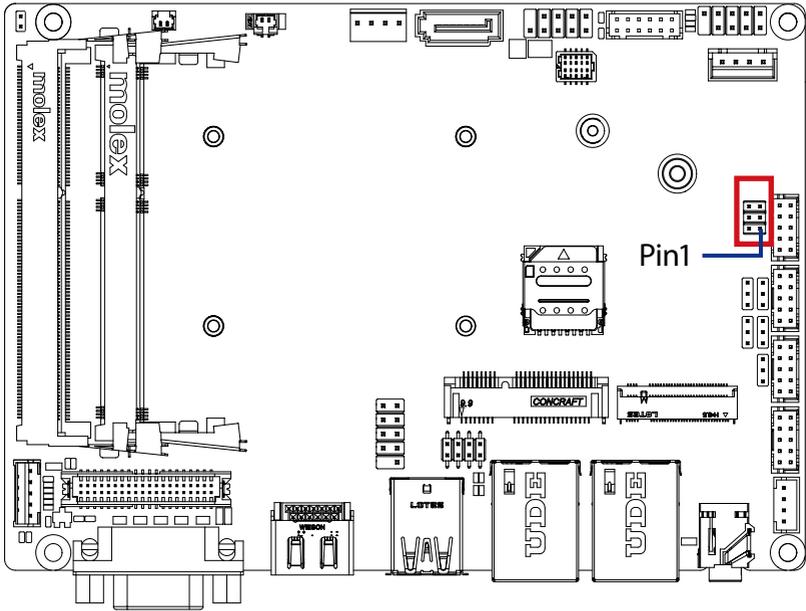

| Pin No. | Definition     |
|---------|----------------|
| 1       | Speaker Out R+ |
| 2       | Speaker Out R- |
| 3       | Speaker Out L- |
| 4       | Speaker Out L+ |

## 3.2.9 LVDS (LVDS connector)

9

LVDS Connector

| Pin No. | Definition | Pin No. | Definition |
|---------|------------|---------|------------|
| 18      | A2-        | 38      | GND        |
| 19      | GND        | 39      | 12V        |
| 20      | GND        | 40      | 12V        |

| Pin No. | Definition | Pin No. | Definition |
|---------|------------|---------|------------|
| 1       | 3.3V       | 21      | A5+        |
| 2       | 5V         | 22      | A4+        |
| 3       | 3.3V       | 23      | A5-        |
| 4       | 5V         | 24      | A4-        |
| 5       | SPECO      | 25      | GND        |
| 6       | SPEDO      | 26      | GND        |
| 7       | GND        | 27      | A7+        |
| 8       | GND        | 28      | A6+        |
| 9       | A1+        | 29      | A7-        |
| 10      | A0+        | 30      | A6-        |
| 11      | A1-        | 31      | GND        |
| 12      | A0-        | 32      | GND        |
| 13      | GND        | 33      | CLK2+      |
| 14      | GND        | 34      | CLK1+      |
| 15      | A3+        | 35      | CLK2-      |
| 16      | A2+        | 36      | CLK1-      |
| 17      | A3-        | 37      | GND        |

For each model support LVDS function.  
But below model no need to add.  
A0~A3 is odd channel 0~3, A4~A7 is even channel.

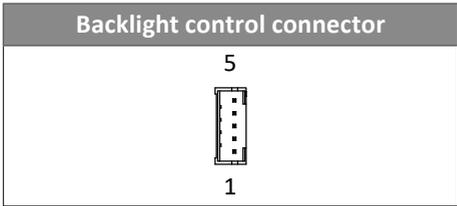

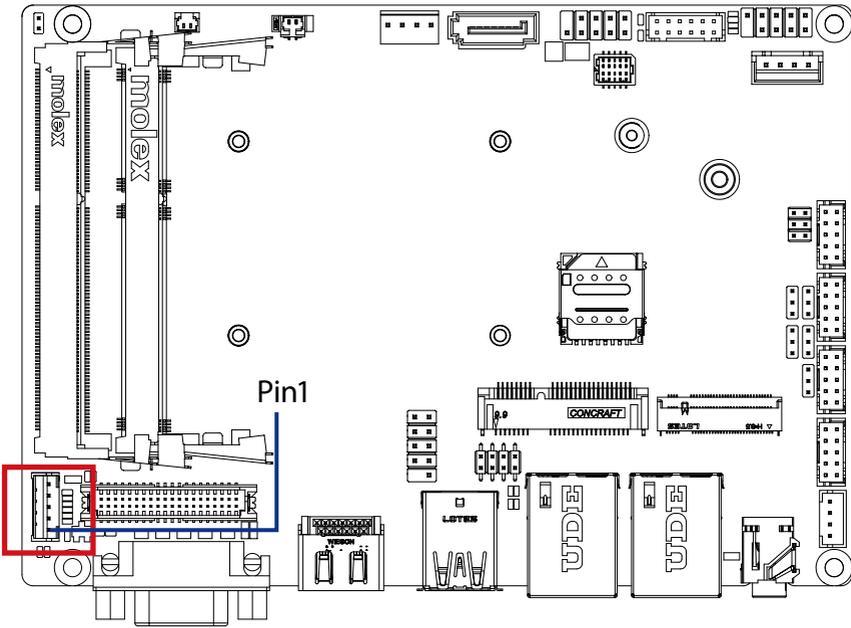

| Connector PN        | Vendor     |
|---------------------|------------|
| 712-76-40GWE0       | PINREX     |
| A1252WV-SF-2X20PD01 | JOINT-TECH |

| Connector type               |
|------------------------------|
| 2x20pin header, pitch 1.25mm |

**Note: \*The LVDS output connector of the unit is only intended to be connected to an UL/IEC/EN approval equipment with fire enclosure.**

### 3.2.10 BKL\_CN (Backlight control connector)

10

# Chapter 4

---

## Chapter 4 – BIOS

## 4.1 Introduction

BIOS (Basic input/output system) provides hardware detailed information and boot-up options, which include firmware to control, set-up and test all hardware settings. Therefore, BIOS is the communication bridge between OS/application software and hardware.

### 4.1.1 How to Entering into BIOS menu

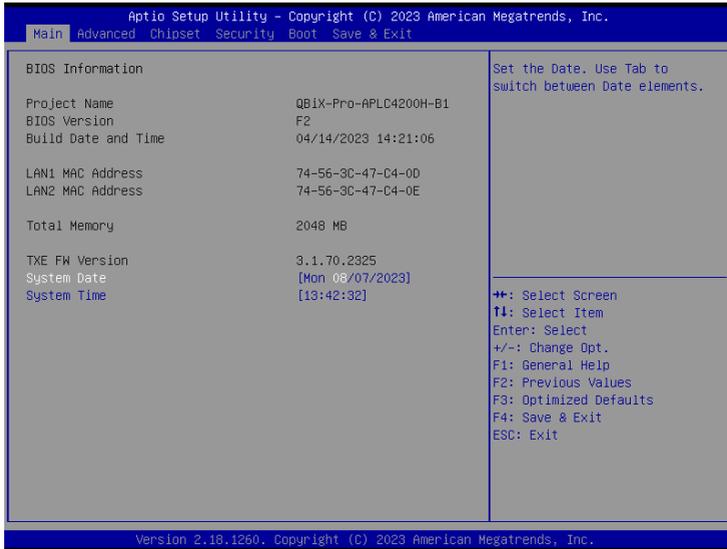

Once the system is power on, press the <DEL> key as soon as possible to access into BIOS Setup program.

### 4.1.2 Function Keys to setup in BIOS Setup program

| Function keys | Description                                |
|---------------|--------------------------------------------|
| →←            | Select Screen                              |
| ↑↓            | Select Item                                |
| Enter         | Execute command or enter the submenu       |
| +             | Increase the numeric value or make changes |
| —             | Decrease the numeric value or make changes |
| F1            | General Help                               |
| F2            | Previous Values                            |
| F3            | Load Optimized Defaults Settings           |
| F4            | Save changes & Exit the BIOS Setup program |
| ESC           | Exit the BIOS Setup program                |

## 4.2 The Main Menu

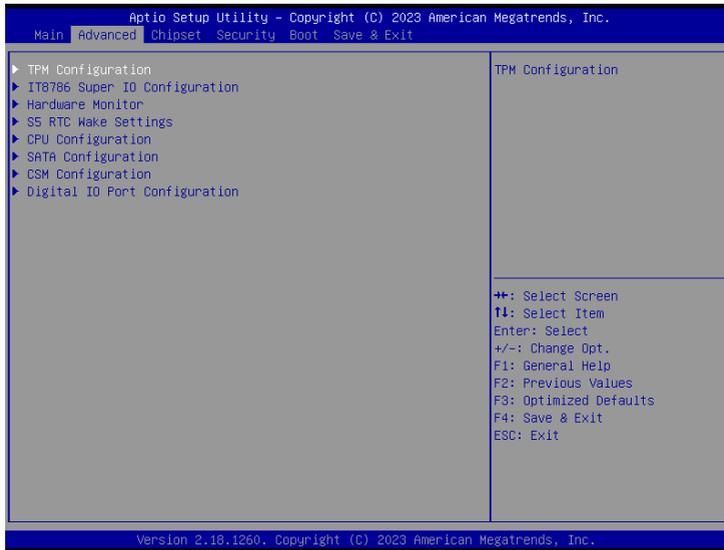

The main menu shows the basic system information. Use arrow keys to move among the items.

| Items               | Description                                                         |
|---------------------|---------------------------------------------------------------------|
| Project Name        | Shows Project name information                                      |
| BIOS Version        | Shows the BIOS version of the system                                |
| Build Date and Time | Shows the Build Date and Time when the BIOS was created.            |
| LAN1 MAC Address    | Shows LAN1 MAC Address information                                  |
| LAN2 MAC Address    | Shows LAN2 MAC Address information                                  |
| Total Memory        | Shows the total memory size of the installed memory                 |
| TXE FW version      | Shows ME firmware version                                           |
| System Date         | Set the Date for the system<br>(Format : Week - Month - Day - Year) |
| System Time         | Set the time for the system<br>(Format : Hour - Minute - Second)    |

## 4.3 Advanced

The Advanced menu is to configure the functions of hardware settings through submenu. Use arrow keys to move among the items, and press <Enter> to access into the related submenu.

### 4.3.1 TPM Configuration

Use TPM Configuration submenu to choose TPM interface.

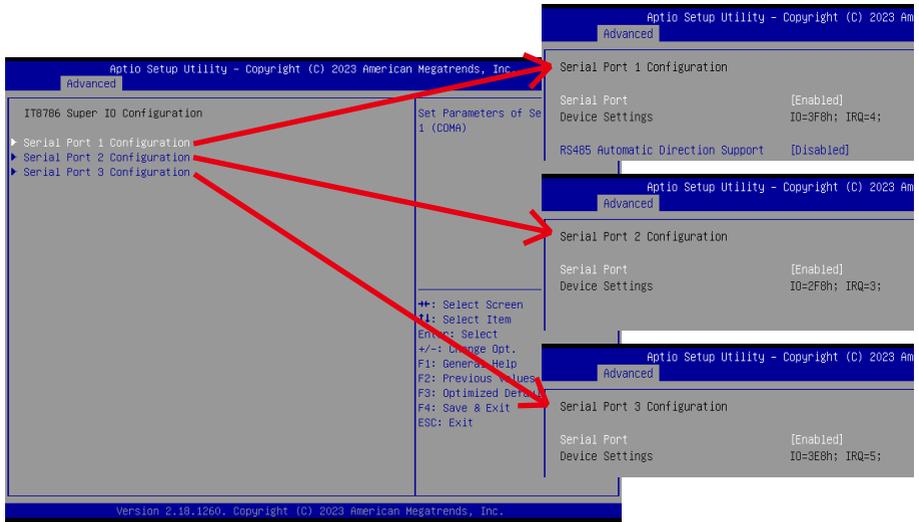

| Item | Description                                                                        |
|------|------------------------------------------------------------------------------------|
| fTPM | <b>Enabled : Enables fTPM (Default setting)</b><br><b>Disabled : Disables fTPM</b> |

Trusted Computing : Shows TPM information, and TPM module configuration setting.

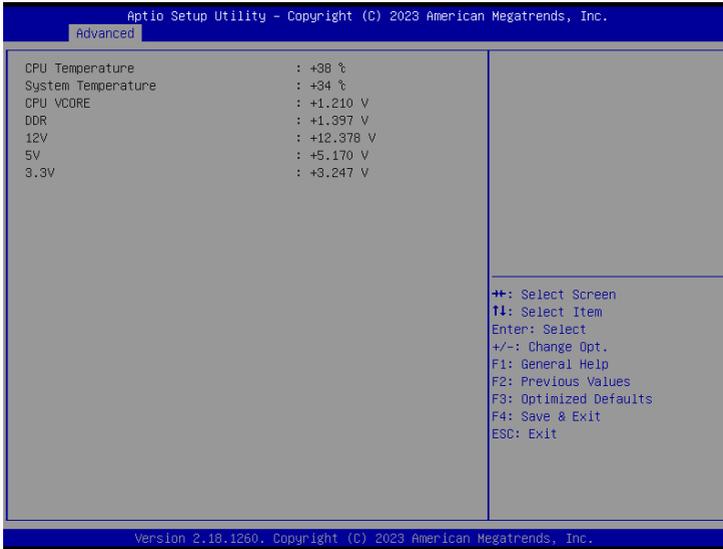

| Item                    | Description                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------|
| Security Device support | Enabled : Enables TPM feature (Default setting)<br>Disabled : Disables TPM feature              |
| Pending operation       | None : No execution will be conducted (Default setting)<br>TPM clear : Set to clear data on TPM |

### 4.3.2 IT8786 Super IO Configuration

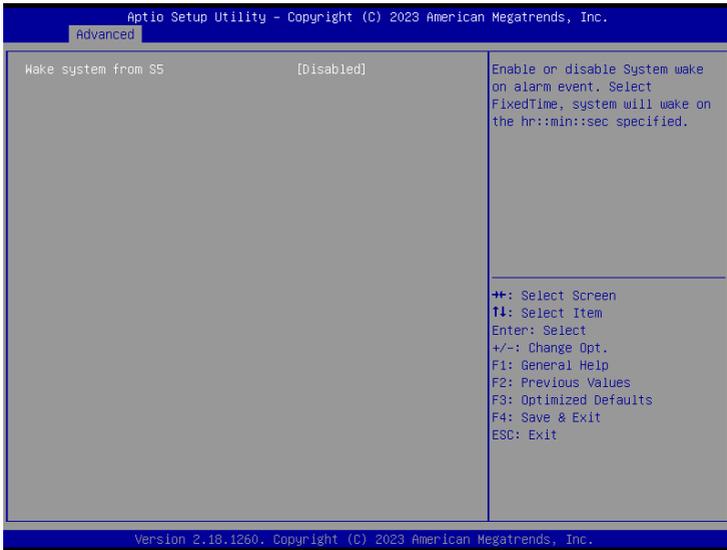

| Item                               | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Serial Port 1 Configuration</b> | <p>Press [Enter] to configure advanced items :</p> <p>Serial Port :<br/> <b>Enabled : Enables allows you to configure the serial port settings</b><br/> <b>Disabled : if Disabled, displays no configuration for the serial port</b></p> <p>Device settings :<br/>                     Display the specified Serial Port base I/O address and IRQ</p> <p>RS485 Automatic Direction Support :<br/> <b>Enabled : Enables RS485 Automatic Direction Support function</b><br/> <b>Disabled : Disables RS485 Automatic Direction Support function (Default setting)</b></p> |
| <b>Serial Port 2 Configuration</b> | <p>Press [Enter] to configure advanced items :</p> <p>Serial Port :<br/> <b>Enabled : Enables allows you to configure the serial port settings</b><br/> <b>Disabled : if Disabled, displays no configuration for the serial port</b></p>                                                                                                                                                                                                                                                                                                                               |
| <b>Serial Port 3 Configuration</b> | <p>Device settings :<br/>                     Display the specified Serial Port base I/O address and IRQ</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

### 4.3.3 Hardware Monitor

| Item                      | Description                      |
|---------------------------|----------------------------------|
| <b>CPU temperature</b>    | Shows current CPU temperature    |
| <b>System temperature</b> | Shows current system temperature |

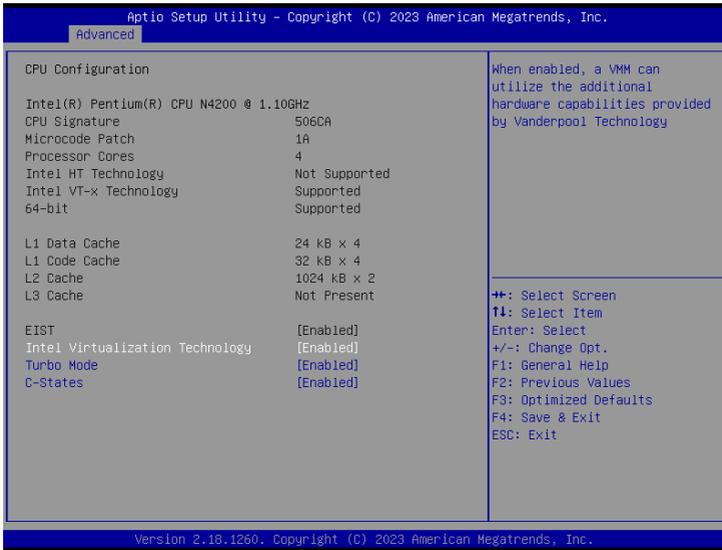

## 4.3.4 S5 RTC Wake Settings

| Item                | Description                                                                                                                                                                                                                                      |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Wake system from S5 | <p>Enable or Disable System to wake on a specific time.</p> <p><b>Disabled : Disables system to wake on a specific time (Default setting)</b></p> <p><b>Fixed Time : Enables system to wake on a specific time (Format : hr : min : sec)</b></p> |

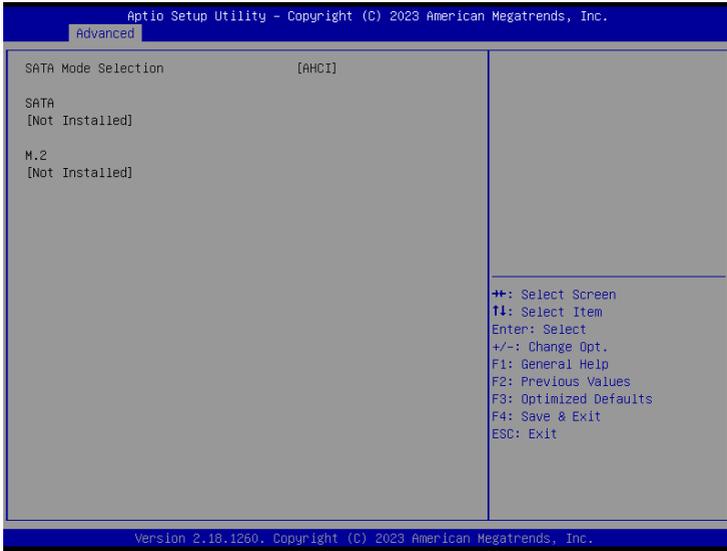

### 4.3.5 CPU Configuration

This submenu shows detailed CPU informations.

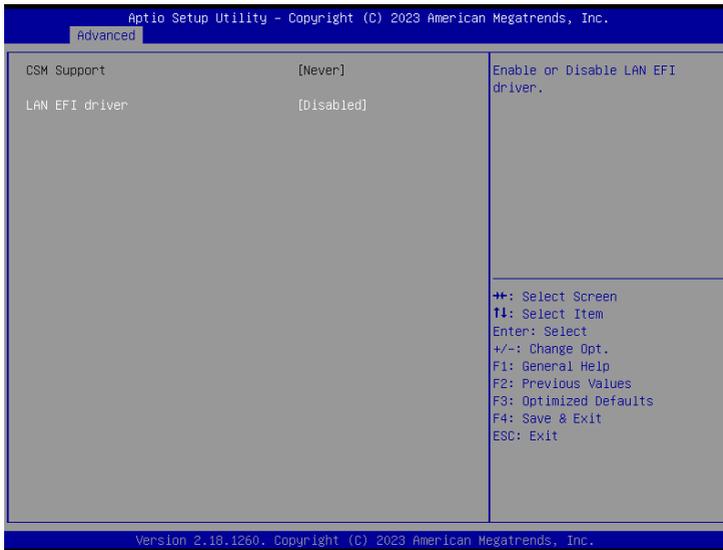

| Item                                   | Description                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>EIST</b>                            | According to System loading, Enhanced Intel SpeedStep Technology (EIST) will automatically adjust the CPU voltage and core frequency to decrease heat and power consumption for power saving.<br><b>Enabled : Enables EIST Technology (Default setting)</b><br><b>Disabled : Disables EIST Technology</b>                                                                                      |
| <b>Intel Virtualization Technology</b> | Virtualization enhanced by Intel® Virtualization Technology will allow a platform to run multiple operating systems and applications in independent partitions. With virtualization, one computer system can function as multiple virtual systems.<br><b>Enabled : Enables Intel Virtualization Technology (Default setting)</b><br><b>Disabled : Disables Intel Virtualization Technology</b> |
| <b>Turbo Mode</b>                      | <b>Enabled : Enables Turbo Mode (Default setting)</b><br><b>Disabled : Disables Turbo Mode</b>                                                                                                                                                                                                                                                                                                 |
| <b>C-states</b>                        | Command CPU to enter into low power consumption mode when CPU is under idle mode.<br><b>Enabled : Enables C states (Default setting)</b><br><b>Disabled : Disables C states</b>                                                                                                                                                                                                                |

## 4.3.6 SATA Configuration

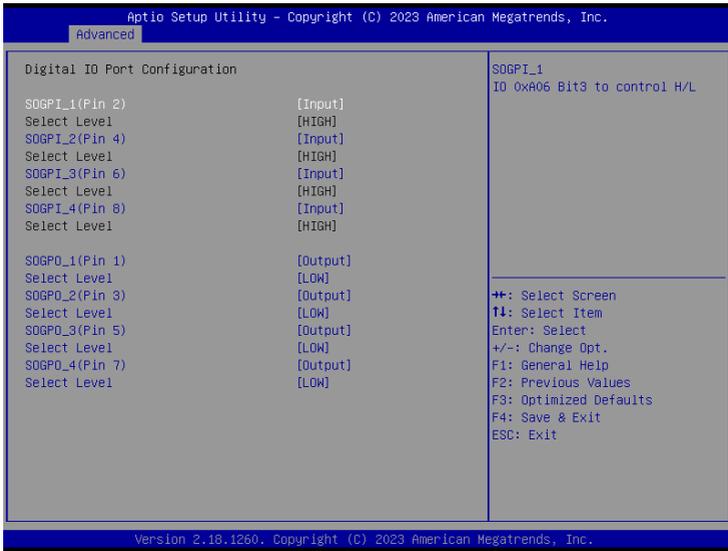

| Item                       | Description                                                                   |
|----------------------------|-------------------------------------------------------------------------------|
| <b>SATA Mode Selection</b> | <b>AHCI : Configures the SATA controllers to AHCI mode. (Default setting)</b> |
| <b>SATA</b>                | shows 2.5" SATA HDD/SSD information                                           |
| <b>M.2</b>                 | shows M.2 SATA interface SSD information                                      |

## 4.3.7 CSM Configuration

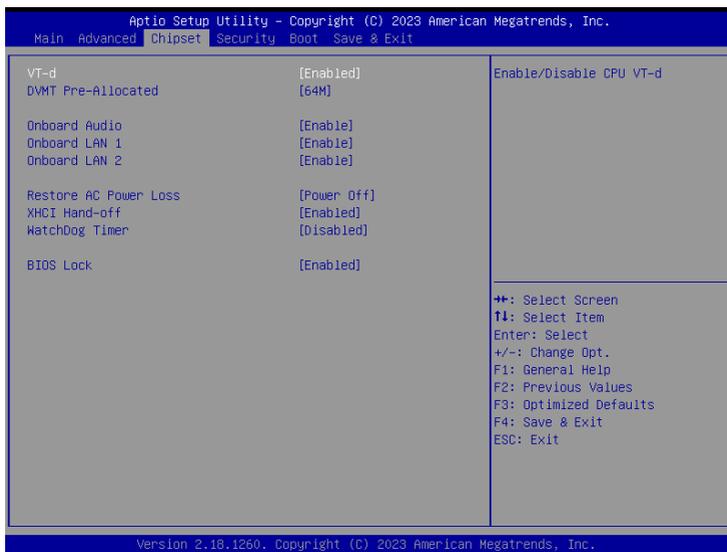

| Item                  | Description                                                                                                                                                                    |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CSM Support</b>    | <b>Never : UEFI Mode only (Default setting)</b>                                                                                                                                |
| <b>LAN EFI driver</b> | When system is power on, install LAN driver under UEFI mode.<br><b>Disabled : Disables UEFI Network Stack (Default setting)</b><br><b>Enabled : Enables UEFI Network Stack</b> |

### 4.3.8 Digital IO Port Configuration

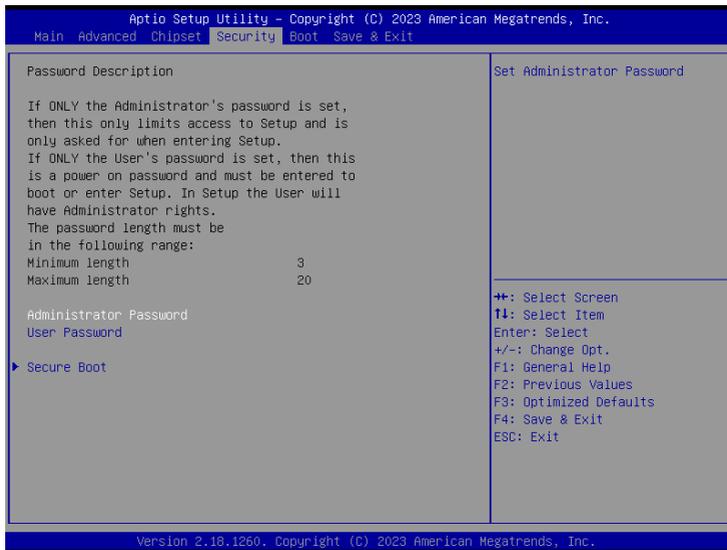

| Item                                                                                                 | Description                                      |
|------------------------------------------------------------------------------------------------------|--------------------------------------------------|
| <b>SOGPI_1 (Pin 2)</b><br><b>SOGPI_2 (Pin 4)</b><br><b>SOGPI_3 (Pin 6)</b><br><b>SOGPI_4 (Pin 8)</b> | Configure Digital IO Input values for each pin.  |
| <b>SOGPO_1 (Pin 1)</b><br><b>SOGPO_2 (Pin 3)</b><br><b>SOGPO_3 (Pin 5)</b><br><b>SOGPO_4 (Pin 7)</b> | Configure Digital IO Output values for each pin. |

## 4.4 Chipset

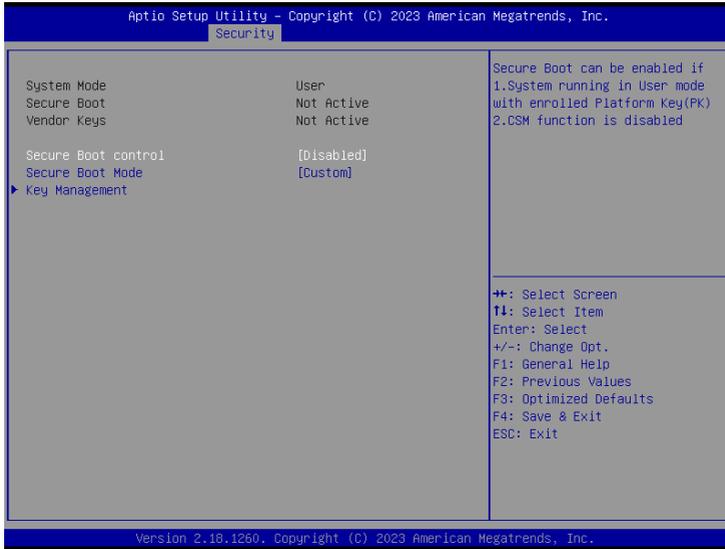

| Item                           | Description                                                                                                                                                                                                                                                                                              |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| VT-d                           | <b>Enabled : Enables VT-d function (Default setting)</b><br><b>Disabled : Disables VT-d function</b>                                                                                                                                                                                                     |
| DVMT Pre-Allocated             | Use DVMT Pre-Allocated to set the amount of system memory which is installed to the integrated graphics processor<br><b>Option items : 32M , 64M(Default setting) , 128M , 256M</b>                                                                                                                      |
