1. Product Overview

1.1 Introduction of Innodisk 1.8" SATA SSD 3SE

Innodisk 1.8" SATA SSD 3SE products provide high capacity flash memory Solid State Drive (SSD) that electrically complies with the Serial ATA (SATA) standard. Innodisk 1.8" SATA SSD 3SE is a SATA III 6.0Gb/s flash based disk, which delivers excellent performance and reliability. Especially, Innodisk 1.8" SATA SSD 3SE is designed for industrial applications, and supports several SATA features, including NCQ and S.M.A.R.T. Innodisk 1.8" SATA SSD are designed to have good performance with no latency. It will effectively reduce the boot up time of the operation system. The power consumption is also much lower than a traditional hard disk drive (HDD).

1.2 Product View and Models

Innodisk 1.8" SATA SSD 3SE is available in follow capacities:

1.8" SATA SSD 3SE 8GB	1.8" SATA SSD 3SE 64GB
1.8" SATA SSD 3SE 16GB	1.8" SATA SSD 3SE 128GB
1.8" SATA SSD 3SE 32GB	1.8" SATA SSD 3SE 256GB

Figure 1: Innodisk 1.8" SATA SSD 3SE

1.3 SATA Interface

Innodisk 1.8" SATA SSD 3SE supports SATA III interface, and is backward compatible with SATA I and SATA II. The SATA III interface can also work with Serial Attached SCSI (SAS) host system, which are located on server motherboards. Innodisk 1.8" SATA SSD 3SE is compliant with Serial ATA Gen 1, Gen 2 and Gen 3 specification (Gen 3 supports 1.5Gbps /3.0Gbps/6.0Gbps data rate). The SATA connector uses a 7-pin signal segment and a 9-pin power segment.

1.4 1.8-inch Form Factor

The Industry-standard 1.8-inch form factor is designed with a metal case because the 1.8-inch is a popular form factor in industrial applications. 1.8-inch is also same form factor for most laptop hard disk drives. Innodisk 1.8" SATA SSD 3SE has a compact size measuring 54.0mm (W) x78.5mm (L) x 5.00mm (H).

2. Product Specifications

2.1 Capacity and Device Parameters

1.8" SATA SSD 3SE device parameters are shown in Table 1.

Table 1: Device parameters

Capacity	LBA	Cylinders	Heads	Sectors	User Capacity(MB)
8GB	15649200	15255	16	63	7641
16GB	31277232	16383	16	63	15272
32GB	62533296	16383	16	63	30533
64GB	125045424	16383	16	63	61057
128GB	250069680	16383	16	63	122104
256GB	500118192	16383	16	63	244198

2.2 Performance

Burst Transfer Rate: 6.0Gbps

Table 2: Performance

Capacity	8GB	16GB	32GB	64GB	128GB	256GB
Sequential Read (max.)	420 MB/sec	420 MB/sec	480 MB/sec	480 MB/sec	490 MB/sec	490 MB/sec
Sequential Write (max.)	120 MB/sec	120 MB/sec	260 MB/sec	410 MB/sec	430 MB/sec	430 MB/sec

Note: Based on CrystalDiskMark 3.01 with file size 1000MB

2.3 Electrical Specifications

2.3.1 Power Requirement

Table 3: Innodisk 1.8" SATA SSD 3SE Power Requirement

Item	Symbol	Rating	Unit
Input Voltage	V _{IN}	+5 DC +- 5%	V

2.3.2 Power Consumption

Table 4: Power Consumption

Mode	Power Consumption (mA)
Read	450 (max.)
Write	600 (max.)
Idle	190 (max.)

* Target: 1.8" SATA SSD 3SE 256GB

2.4 Environmental Specifications

2.4.1 Temperature Ranges

Table 5: Temperature ranges for 1.8" SATA SSD 3SE

Temperature	Range
Operating	Standard Grade: 0°C to +70°C
	Industrial Grade: -40°C to +85°C
Storage	-55°C to +95°C

2.4.2 Humidity

Relative Humidity: 10-95%, non-condensing

2.4.3 Shock and Vibration

Table 6: Shock/Vibration Testing for 1.8" SATA SSD 3SE

Reliability	Test Conditions	Reference Standards
Vibration	7 Hz to 2K Hz, 20G, 3 axis	IEC 68-2-6
Mechanical Shock	Duration: 0.5ms, 1500 G, 3 axis	IEC 68-2-27

2.4.4 Mean Time Between Failures (MTBF)

Table 7 summarizes the MTBF prediction results for various 1.8" SATA SSD 3SE configurations. The analysis was performed using a RAM Commander™ failure rate prediction.

- **Failure Rate:** The total number of failures within an item population, divided by the total number of life units expended by that population, during a particular measurement interval under stated conditions.
- **Mean Time Between Failures (MTBF):** A basic measure of reliability for repairable items: The mean number of life units during which all parts of the item will perform within their specified limits, during a particular measurement interval under stated conditions.

Table 7: 1.8" SATA SSD 3SE MTBF

Product	Condition	MTBF (Hours)
Innodisk 1.8" SATA SSD 3SE	Telcordia SR-332 GB, 25°C	>3,000,000

1.8 CE and FCC Compatibility

1.8" SATA SSD 3SE conforms to CE and FCC requirements.

2.6 RoHS Compliance

1.8" SATA SSD 3SE is fully compliant with the RoHS directive.

2.7 Reliability

Parameter	Value
Read Cycles	Unlimited Read Cycles
Wear-Leveling Algorithm	Supported
Bad Blocks Management	Supported
Error Correcting Code	Supported
TBW (Unit:TB)	
8GB	432 (Sequential Write)
16GB	864 (Sequential Write)
32GB	1728 (Sequential Write)
64GB	3456 (Sequential Write)
128GB	6912 (Sequential Write)
256GB	13824 (Sequential Write)

2.8 Transfer Mode

1.8" SATA SSD 3SE support following transfer mode:

Serial ATA III 6.0Gbps

Serial ATA II 3.0Gbps

Serial ATA I 1.5Gbps

2.9 Pin Assignment

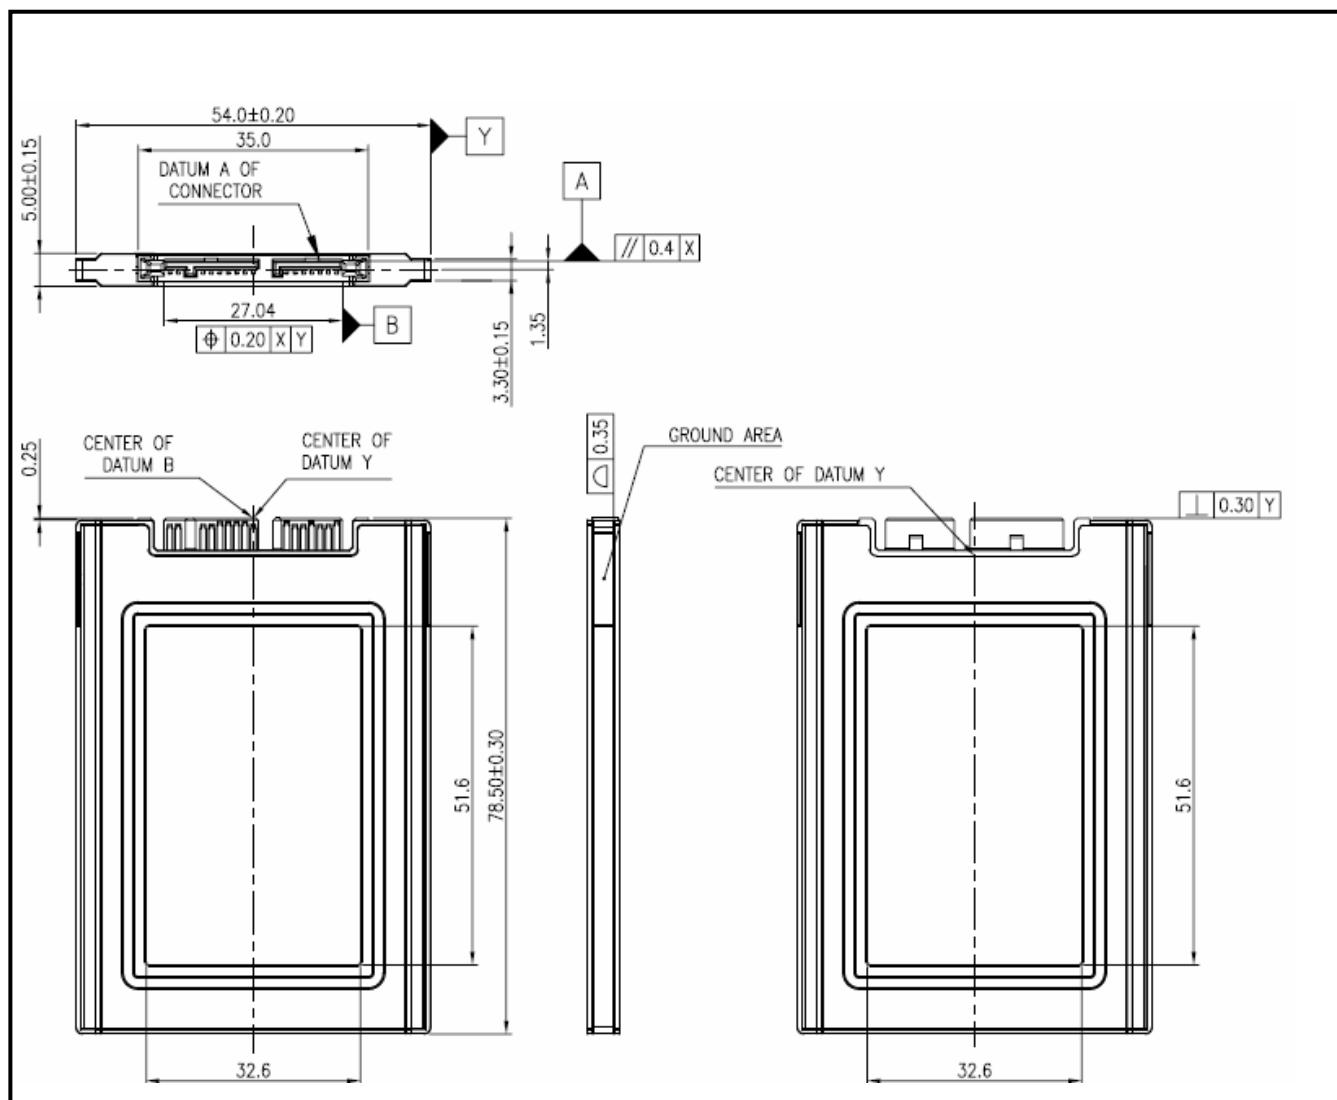

Innodisk 1.8" SATA SSD 3SE uses the standard SATA pin-out. See Table 8 for 1.8" SATA SSD 3SE pin assignment.

Table 8: InnoDisk 1.8" SATA SSD 3SE Pin Assignment

Name	Type	Description
S1	GND	NA
S2	A+	Differential Signal Pair A
S3	A-	
S4	GND	NA
S5	B-	Differential Signal Pair B
S6	B+	
S7	GND	NA

P5	V5	5V Power, Pre-charge
P6	V5	5V Power
P7	R	Reserved
Key	Key	Key
P8	Optional	Vendor Specific
P9	Optional	Vendor Specific

2.10 Mechanical Dimensions

2.11 Assembly Weight

The Innodisk 1.8" SATA SSD 3SE with SLC flash ICs weighs approximately 40 grams for 8GB capacities. The total weight of SSD will be less than 45 grams.

2.12 Seek Time

Innodisk 1.8" SATA SSD 3SE does not have magnetic rotating motor so there is no seek or rotational latency for this drive.

2.13 Hot Plug

The SSD supports the hot plug function and can be removed or connected when the system is powered on. The user has to avoid hot plugging the SSD when it is configured as the boot drive with the operating system installed.

Surprise hot plug : The insertion of a SATA device into a backplane (combine signal and power) that has power present. The device powers up and initiates an OOB sequence.

Surprise hot removal: The removal of a SATA device from a powered backplane, without first being disabled.

2.14 NAND Flash Memory

Innodisk 1.8" SATA SSD 3SE uses Single-Level Cell (SLC) NAND flash memory, which is non-volatile and highly reliable.

3. Theory of Operation

3.1 Overview

Figure 2 shows the operation of Innodisk 1.8" SATA SSD 3SE from the system level, including the major hardware blocks.

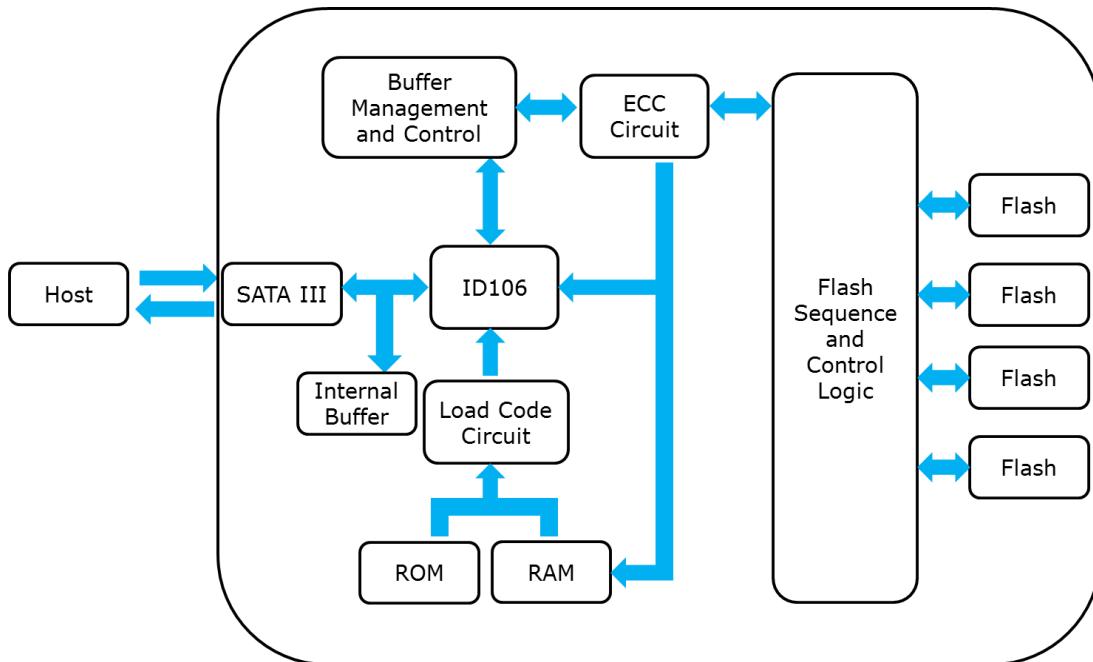

Figure 2: Innodisk 1.8" SATA SSD 3SE Block Diagram

Innodisk 1.8" SATA SSD 3SE integrates a SATA III controller and NAND flash memory. Communication with the host occurs through the host interface using standard Serial ATA protocol. Communication with the flash memory occurs through Innodisk's SATA III controller.

3.2 SATA III Controller

Innodisk 1.8" SATA SSD 3SE is designed with ID 167, a SATA III 6.0Gbps (Gen. 3) controller. The Serial ATA physical link and transport layers are compliant with Serial ATA Gen 1, Gen 2 and Gen 3 specification (Gen 3 supports 1.5Gbps/3.0Gbps/6.0Gbps data rate). The controller has a four channel bandwidth for accessing the NAND flash memory.

3.3 Error Detection and Correction

Highly sophisticated Error Correcting Code algorithms are implemented into the controller. The ECC unit consists of the parity unit (parity-byte generation) and the syndrome unit (syndrome-byte computation). These units implement an algorithm that can correct 40 bits per 1024 bytes in an ECC block. Code-byte generation during write operations, as well as error

detection during read operation, is implemented on the fly without any decrease in performance.

3.4 Wear-Leveling

Flash memory can only be erased a limited number of times. This number is called the **erase cycle limit** or **write endurance limit** and is defined by the NAND flash memory vendor. The erase cycle limit applies to each individual block in the flash device.

Innodisk 1.8" SATA SSD 3SE uses a static wear-leveling algorithm to ensure that consecutive writes of a specific sector are not written physically to the same page/block in the flash. This spreads data usage evenly across all blocks while prolonging the lifecycle of the NAND flash memory.

3.5 Bad Blocks Management

Bad Blocks are blocks that contain one or more invalid bits whose reliability are not guaranteed. Bad Blocks may be present when the SSD is shipped, and may also develop over the lifetime of the SSD. When Bad Blocks are detected, it will be flagged so that block will not be used anymore. Bad Block management, Bad Block replacement, and Error Correcting Code are implemented to avoid storing/accessing data errors. These functions are enabled automatically to transfer data from Bad Blocks to spare blocks, and also correct error bits.

3.6 Power Cycling

Innodisk's power cycling management is a complete data protection system that functions before and after a sudden loss of power to Innodisk's SSD. A Low-power detection circuit terminates data writes before an abnormal power cycle. Once power is restored, table-remapping deletes corrupted data to maintain data integrity. Innodisk's power cycling management also prevents data stored in flash from degrading overtime.

3.7 Garbage Collection/TRIM

Garbage collection and TRIM technology is used to maintain performance consistency by continuously cleaning blocks marked for deletion on SSDs. The garbage collection runs as a background process to have a minimal impact on the controller's resources while combining valid data into available blocks, and erasing blocks marked for deletion. This process also significantly reduces write operations to the drive, thereby increasing the SSD's lifespan.

4. Installation Requirements

4.1 1.8" SATA SSD 3SE Pin Definition

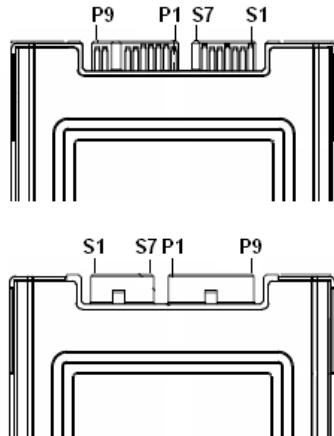

Figure 3: Signal Segment and Power Segment

4.2 Electrical Connections for 1.8" SATA SSD 3SE

A Serial ATA device can be connected to a host system through a cable. The cable should not be longer than one meter. The SATA interface also has a separate connector for the power supply. Please refer to the pin description on Table 8 for further details.

4.3 Form Factor

Please turn off your computer, and open your computer's case. Find one of available 1.8-inch slot, and connect the 1.8" SATA SSD with your computer or connect the SATA data cable, and power cable from your power supply. Please boot the installation Operation System from CD-ROM, and install Operation System into SSD.

4.4 Device Driver

No additional device drivers are required. Innodisk 1.8" SATA SSD 3SE can be configured as a boot device or storage device.

5. Part Number Rule
