To install the M.2 storage, the following steps are required.

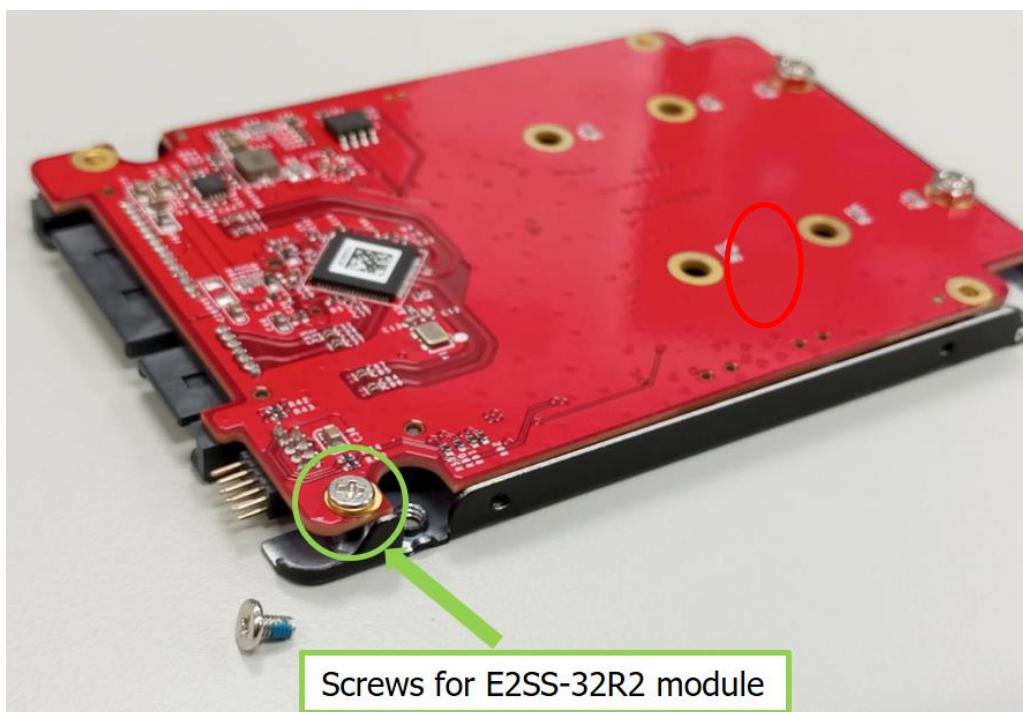

Check the component for button cover, top cover, E2SS-32R2, screws.

Check the screws for each part.

Use the flat screws to fix the M.2 SSD on the RAID module(E2SS-32R2).

Use the screws for to fix the RAID module(E2SS-32R2) on the button cover.

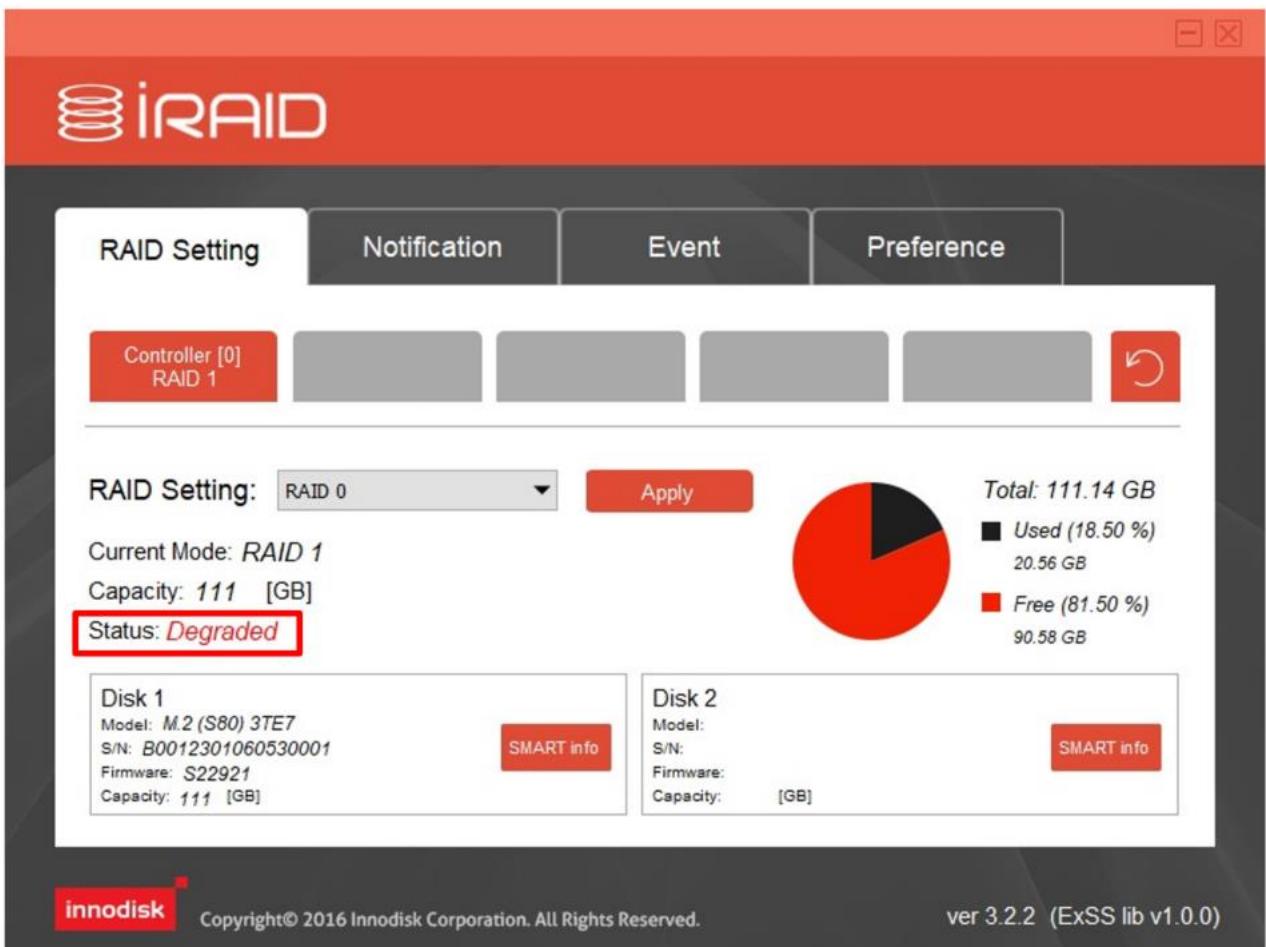

Screw the top cover to the button cover.

## 4. E2SS Rebuild Disk SOP

The SOP is to instruct how to rebuild Disk of E2SS.

1. Prepare a new Disk with the same capacity.
2. Backup the Disk data.
3. If one of the Disk is damaged during RAID 1 mode, the RAID [Status] will be [Degraded], and then use iRAID Tool to confirm which Disk is damage. (The following example is Disk 2.)

4. And then, shut down.

5. Take the following picture as an example, replace the broken Disk with a new one.

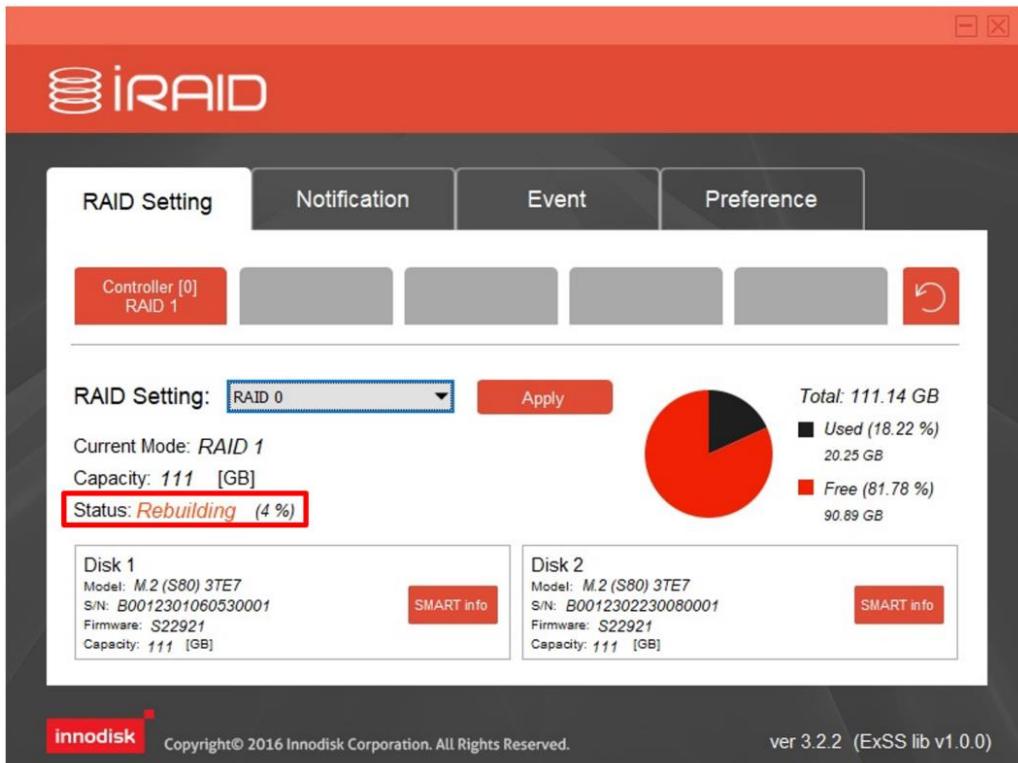

The left side is Disk 2 (PCB print is CON2), so remove the CON2 Disk and install a new Disk to CON2.

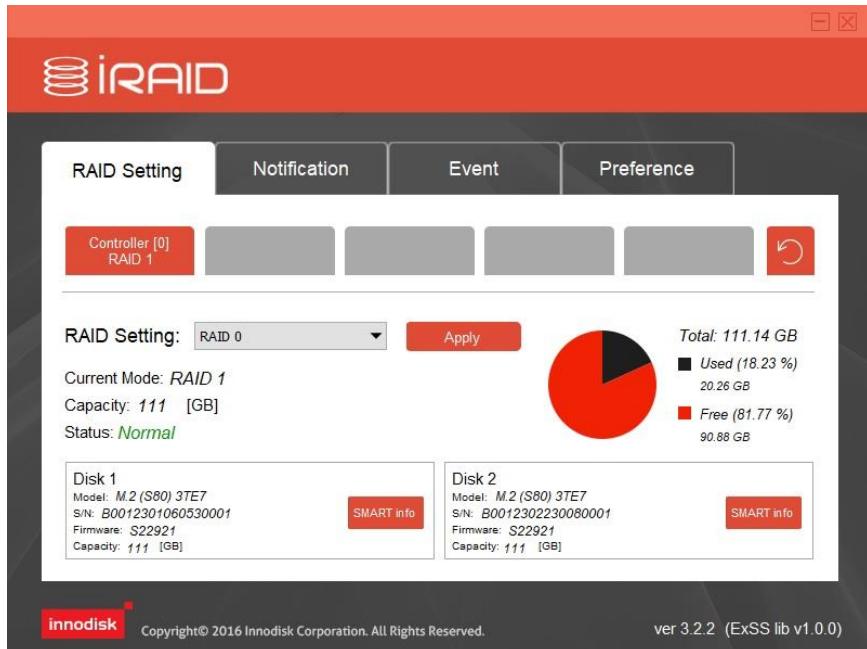

6. Install the new Disk into CON2.

7. Power on.
8. The system will automatically execute “Rebuild” process at this time, and you can see the [Status] is [Rebuilding] via iRAID Tool. (And there is no need to press any buttons.)

9. Finally, it's completed. The [Status] will show [Normal].
