Product Warranty (2 years)

Advantech warrants to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for two years from the date of purchase.

This warranty does not apply to any products which have been repaired or altered by persons other than repair personnel authorized by Advantech, or which have been subject to misuse, abuse, accident or improper installation. Advantech assumes no liability under the terms of this warranty as a consequence of such events.

Because of Advantech's high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If an Advantech product is defective, it will be repaired or replaced at no charge during the warranty period. For out-of-warranty repairs, you will be billed according to the cost of replacement materials, service time and freight. Please consult your dealer for more details.

If you think you have a defective product, follow these steps:

1. Collect all the information about the problem encountered. (For example, CPU speed, Advantech products used, other hardware and software used, etc.) Note anything abnormal and list any onscreen messages you get when the problem occurs.
2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information readily available.
3. If your product is diagnosed as defective, obtain an RMA (return merchandize authorization) number from your dealer. This allows us to process your return more quickly.
4. Carefully pack the defective product, a fully-completed Repair and Replacement Order Card and a photocopy proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.
5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

Part No. 2006689801 Edition 2

Printed in Taiwan July 2018

Declaration of Conformity

CE

This product has passed the CE test for environmental specifications. Test conditions for passing included the equipment being operated within an industrial enclosure. In order to protect the product from being damaged by ESD (Electrostatic Discharge) and EMI leakage, we strongly recommend the use of CE-compliant industrial enclosure products.

FCC Class B

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FM

This equipment has passed the FM certification. According to the National Fire Protection Association, work sites are classified into different classes, divisions and groups, based on hazard considerations. This equipment is compliant with the specifications of Class I, Division 2, Groups A, B, C and D indoor hazards.

Technical Support and Assistance

1. Visit the Advantech website at http://support.advantech.com where you can find the latest information about the product.
2. Contact your distributor, sales representative, or Advantech's customer service center for technical support if you need additional assistance. Please have the following information ready before you call:
   - Product name and serial number
   - Description of your peripheral attachments
   - Description of your software (operating system, version, application software, etc.)
   - A complete description of the problem
   - The exact wording of any error messages

Warnings, Cautions and Notes

Warning! *Warnings indicate conditions, which if not observed, can cause personal injury!*

Caution! *Cautions are included to help you avoid damaging hardware or losing data. e.g.*

There is a danger of a new battery exploding if it is incorrectly installed. Do not attempt to recharge, force open, or heat the battery. Replace the battery only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

Note! *Notes provide optional additional information.*

Document Feedback

To assist us in making improvements to this manual, we would welcome comments and constructive criticism. Please send all such - in writing to: support@advantech.com

Packing List

Before setting up the system, check that the items listed below are included and in good condition. If any item does not accord with the table, please contact your dealer immediately.

- SOM-6898 CPU module
- 1 x Heatspreader (1960080159N000)

Safety Instructions

1. Read these safety instructions carefully.
2. Keep this User Manual for later reference.
3. Disconnect this equipment from any AC outlet before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.
4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
7. The openings on the enclosure are for air convection. Protect the equipment from overheating. DO NOT COVER THE OPENINGS.
8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.
12. Never pour any liquid into an opening. This may cause fire or electrical shock.
13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.
14. If one of the following situations arises, get the equipment checked by service personnel:
    - The power cord or plug is damaged.
    - Liquid has penetrated into the equipment.
    - The equipment has been exposed to moisture.
    - The equipment does not work well, or you cannot get it to work according to the user's manual.
    - The equipment has been dropped and damaged.
    - The equipment has obvious signs of breakage.
15. DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE MAY GO BELOW -20° C (-4° F) OR ABOVE 60° C (140° F). THIS COULD DAMAGE THE EQUIPMENT. THE EQUIPMENT SHOULD BE IN A CONTROLLED ENVIRONMENT.
16. CAUTION: DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE RECOMMENDED BY THE MANUFACTURER, DISCARD USED BATTERIES ACCORDING TO THE MANUFACTURER'S INSTRUCTIONS.

The sound pressure level at the operator's position according to IEC 704-1:1982 is no more than 70 dB (A).

DISCLAIMER: This set of instructions is given according to IEC 704-1. Advantech disclaims all responsibility for the accuracy of any statements contained herein.

Safety Precaution - Static Electricity

Follow these simple precautions to protect yourself from harm and the products from damage.

- To avoid electrical shock, always disconnect the power from your PC chassis before you work on it. Don't touch any components on the CPU card or other cards while the PC is on.
- Disconnect power before making any configuration changes. The sudden rush of power as you connect a jumper or install a card may damage sensitive electronic components.

Chapter 1

General Information

This chapter gives background information on the SOM-6898 CPU Computer on Module.

Sections include:

- Introduction
- Specification
- Functional Block Diagram

1.1 Introduction

SOM-6898 is a COM Express Compact module with type 6 pin-out that fully complies with the PICMG (PCI Industrial Computer Manufactures Group) COM.0 R2.1 specification. The CPU module uses an Intel 7th Generation Core i processor and other peripheral chips in a basic size 95x95mm COM Express form factor. SOM-6898 features a 15 watt TDP and is equipped with a power-saving ULV-SoC on new 14nm micro architecture. SOM-6898 supports up to 32GB dual channel DDR4 2133 non-ECC, with higher memory bandwidth for better performance. SOM-6898 is equipped with an integrated Intel Gen 9 LP graphics micro architecture, supplying up to three independently operated 4K displays via DisplayPort. It also supports HW accelerated video decoding for AVC, VC1, MPEG2, HEVC, VP8, JPEG. SOM-6898 I/O includes PCI Express Gen 3, 2 SATA G3, 4 USB 3.0, 8 USB 2.0. Moreover, 5 PCIe x1 (4 PCIe x1 + 1 PCIe x4 (supports up to 5 devices and 8 lanes) can be supported at a time to make the IO design more flexible. In addition, SOM-6898 adds mounting holes around the processor to strengthen the board structure and avoid board bending.

Advantech iManager was designed to satisfy a lot of embedded application requirements such as multi-level watchdog timer, voltage and temperature monitoring, and thermal protection through processor throttling, as well as LCD backlight on/off, brightness control, and embedded storage information. Combined with Advantech SUSI Access, it can remotely monitor and control devices via the internet for easy maintenance. All Advantech COM Express modules integrate iManager and SUSI Access to benefit customer's applications. SOM-6898 is suitable for computing intensive, thermal sensitive, graphics/media intense, and I/O demanding applications.

1.2 Specifications

1.2.1 Board Information

- **Pin Definition:** PICMG COM.0 R2.1 Type 6 pin-out definition
- **Form Factor:** PICMG COM.0 R2.1 Compact Module 95 x 95 mm

1.2.2 System Information

- **CPU:** 7th Gen Intel® Core Processors

CPU	Standard Freq.	Max. Turbo Freq.	Core	Cache (MB)	TDP(W)
i7-7600U	2.8GHz	3.9GHz	2	4	15
I5-7300U	2.6GHz	3.5GHz	2	4	15
i3-7100U	2.4GHz	NA	2	4	15
Celeron 3965U	2.2GHz	NA	2	2	15

- **Memory:** 2 SODIMM socket for DDR4 2133, up to 32 GB
- **BIOS:** AMI UEFI
- **Power management:** Supports power saving modes including Normal / Standby / Suspend modes. ACPI 2.0 compliant.

1.2.3 Display

- **Graphic Core:** Intel® Gen 9 LP Graphic supports full HW accelerated video decoding for AVC/VC1/MPEG2/HEVC/VP8/JPEG.

CPU	Graphics Core	Base Freq.	Max Freq.
i7-7600U	Intel® HD Graphics 620	300MHz	1.15GHz
I5-7300U	Intel® HD Graphics 620	300MHz	1.1GHz
i3-7100U	Intel® HD Graphics 620	300MHz	1GHz
Celeron 3965U	Intel® HD Graphics 610	300MHz	900MHz

- **VGA:** Resolution up to 1920 x 1200
- **LVDS:** Single and dual channel 18/24-bit resolutions up to 1920 x 1200 @ 60 Hz
- **eDP:** OSOM-6898_User_Manual_Ed.2 optional, up to 3840 x 2160 @ 60Hz 24bpp or 4096 x 2304 @ 60Hz 24bpp
- **HDMI/DVI/DP:** Supports 3 ports HDMI (default), DVI, or DP multiplexed.
  Resolution: HDMI up to 4096 x 2160 @24Hz
  DVI up to 1920 x 1080 @ 60 Hz
  DP up to 3840 x 2160 @ 60Hz 24bpp
  or 4096 x 2304 @ 60Hz 24bpp
- **Dual Display:** VGA + LVDS, VGA + HDMI/DVI/DP, LVDS + HDMI/DVI/DP, VGA + eDP (Optional), eDP + HDMI/DVI/DP (Optional), HDMI/DVI/DP + HDMI/DVI/DP (Optional)
- **Triple Display:** VGA + LVDS + HDMI/DVI/DP, VGA + eDP + HDMI/DVI/DP (Optional), eDP + HDMI/DVI/DP + HDMI/DVI/DP (Optional)

1.2.4 Expansion Interface

- **PCI Express x1:** Supports default 5 ports PCIe x1 compliant.
  To PCIe Gen3* (8.0 GT/s) specification, several configurable combinations may need BIOS modifies. Please contact Advantech sales or FAE for more detail.
  (PCIe x1 Port #7 option with SATA2)

	x4	x2	x1
Default	1	0	4
Option 1	0	0	5
Option 2	2	0	0
Option 3	1	2	0
Option 4	1	1	2
Option 5	0	4	0
Option 6	0	2	3

- **Audio Interface:** Intel HD Audio interface
- **LPC Bus:** Yes (24MHz)
- **SMBus:** Yes
- **I2C Bus:** Up to 400KHz
- **SPI:** Supports SPI BIOS only

1.2.5 I/O

- **Ethernet:** Intel I219LM Gigabit LAN supports 10/100/1000 Mbps Speed
- **SATA:** Supports 2 ports SATA 3.0 (6 Gbit/s)
  Support RAID 0/1/5/10, AHCI 1.3
  *optional support 3 SATA 3.0 (6 Gbit/s)
- **USB Interface:** Supports 4 ports USB3.0, 8 ports USB 2.0
- **Serial Port:** Supports 2 ports 2-wire serial port
- **Express Card:** 2 ports
- **Panel Control:** Supports panel backlight on/off control, brightness control
- **Thermal Protection:** Supports thermal shutdown or CPU throttling
- **Watchdog Timer:** 65536 level timer interval, from 0~65535 sec, multi-level, multi-option watchdog timer
- **Smart Fan:** 1 port on Module, 1 port down to carrier board
- **GPIO:** 8-bit GPIO
- **Hardware Monitor:** Vin, 5VSB, RTC Battery
- **TPM:** Optional TPM2.0 (Infineon SLB9665)

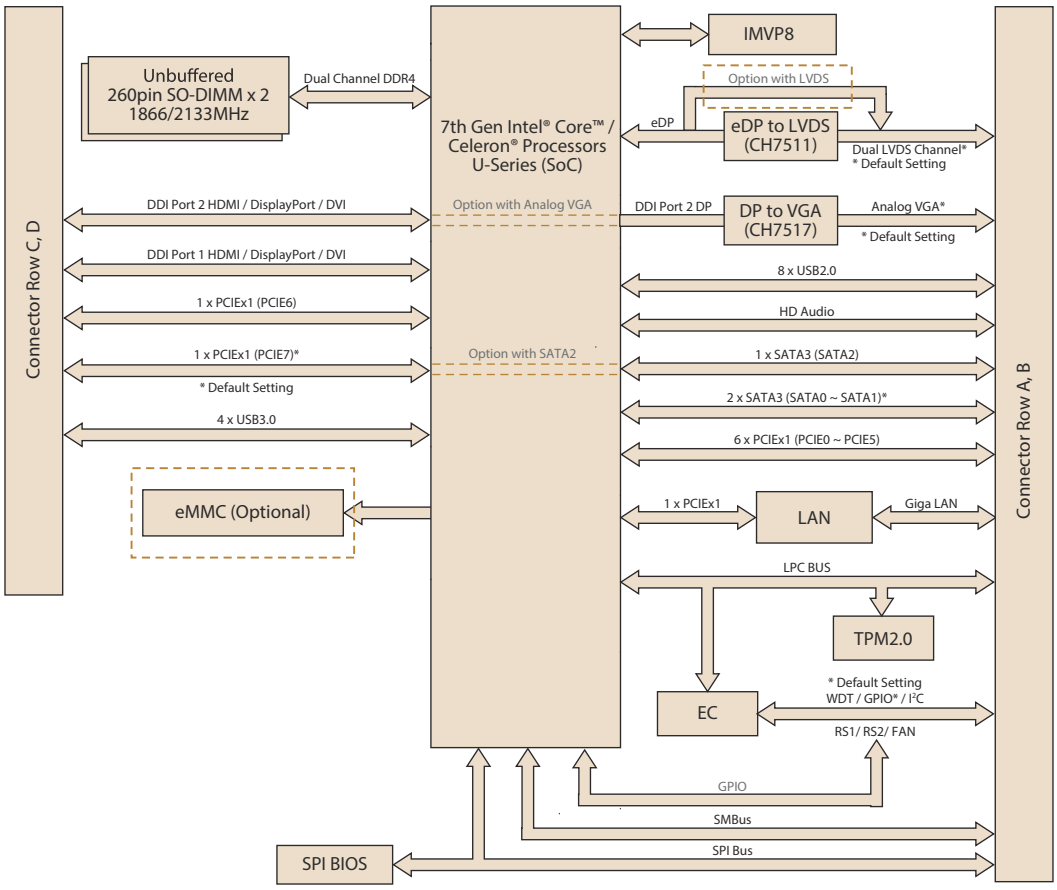
1.2.6 iManager 2.0

Refer to section 4.3.

1.2.7 Mechanical and Environmental Specification

- **Dimensions:** 95 x 95 mm (3.74" x 3.74")
- **Power Type and Supply Voltage:**
  - ATX: +8.5~20V and +4.75~5.25VSB (standby power)
  - AT: +8.5~20V
  - CMOS Battery: +3.3V
- **Power Requirement:**
  - Test condition: SOM-6898C7-U8A1E (i7-7600U), ADVANTECH 16GB SO-DDR4-2133 I-GRD 2PCS, Windows 10 Pro, rated voltage DC +5.0V, +12.0V, +20.0V
  - Idle: 4.16W
  - Max: 24.61W (Burn In Test V8.1 Pro (1016) for 64-bit Windows)
- **Temperature Specification:**
  - Operating: 0 ~ 60° C (32 ~ 140° F)
  - Storage: -40 ~ 85° C (-40 ~ 185° F)
- **Humidity Specification:**
  - Operating: 40° C @ 95% relative humidity, non-condensing
  - Storage: 60° C @ 95% relative humidity, non-condensing

1.3 Functional Block Diagram



Chapter 2

Mechanical Information

This chapter gives mechanical information on the SOM-6898 CPU Computer on Module.

Sections include:

- Board Information
- Mechanical Drawing
- Assembly Drawing

2.1 Board Information

The figures below indicate the main chips on SOM-6898 Computer-on-Module. Be aware of these positions when designing your own carrier board to avoid mechanical issues, as well as designing a thermal solution with contact points for the best thermal dissipation performance.

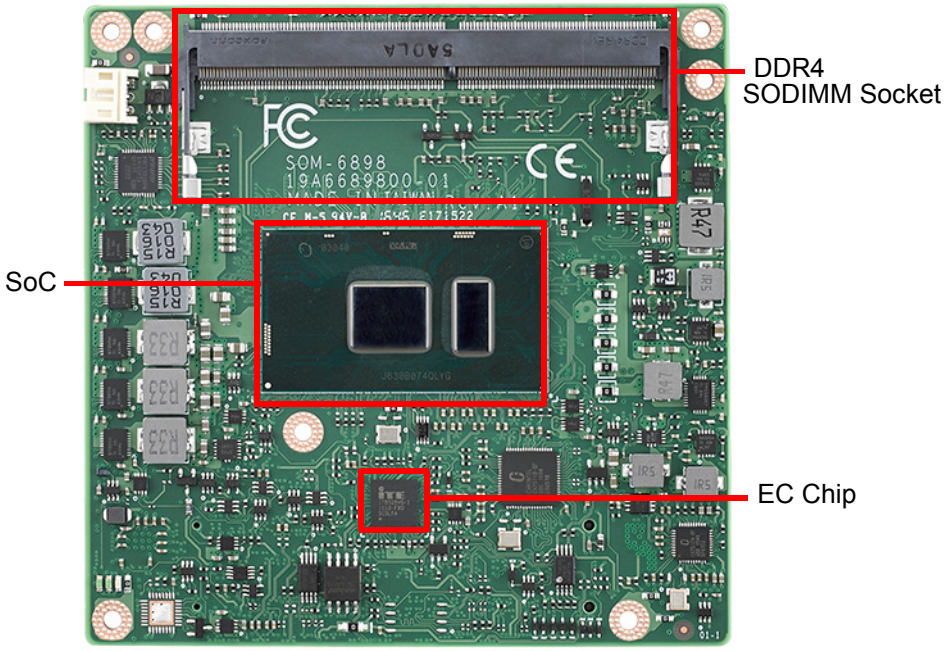


Figure 2.1 Board Chips Identify - Front

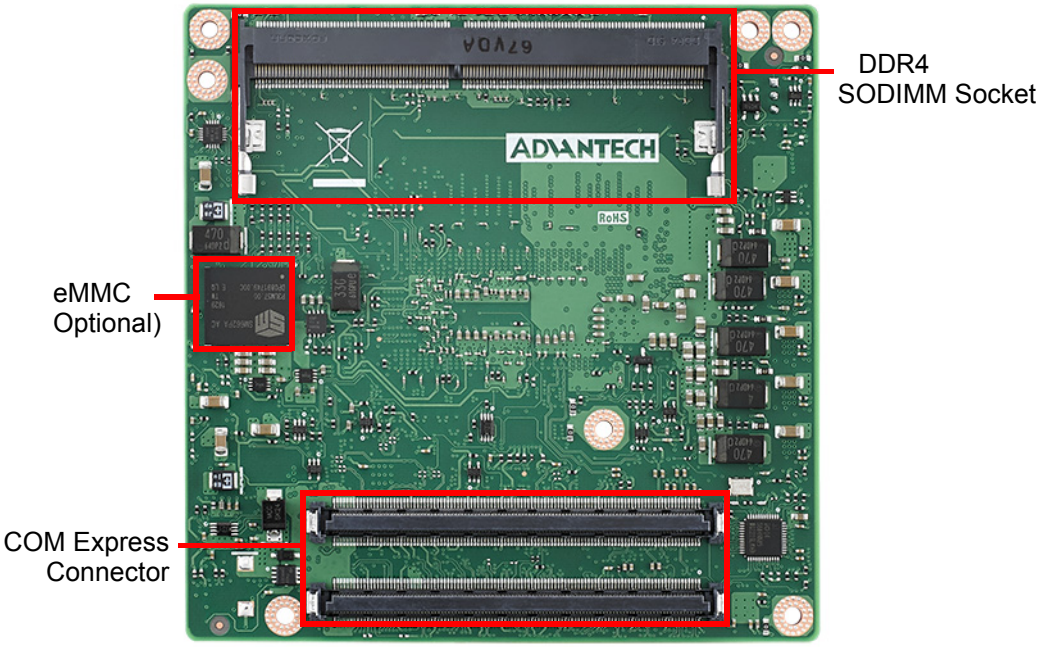

Figure 2.2 Board Chips Identify - Back

2.2 Mechanical Drawing

For more details about 2D/3D models, please look on the Advantech COM support service website http://com.advantech.com.

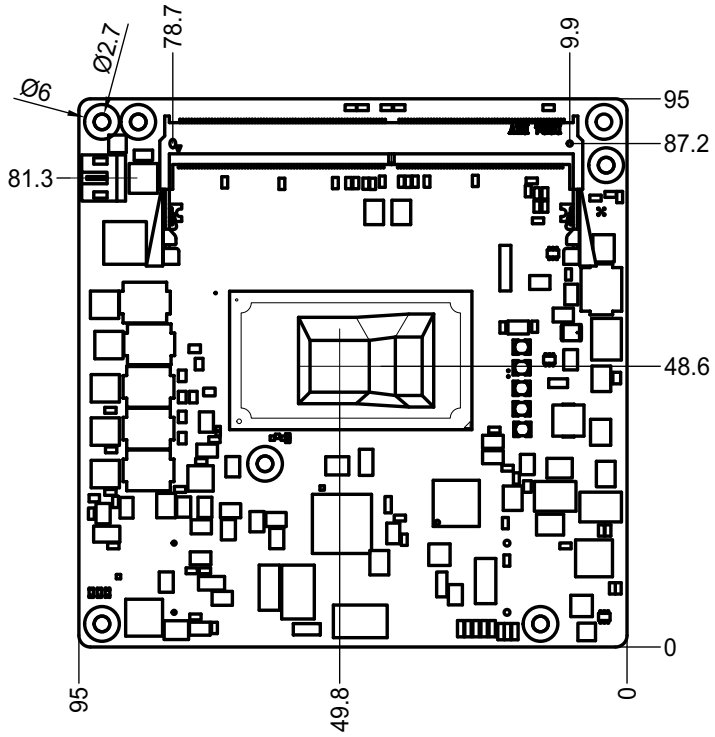

Figure 2.3 Board Mechanical Drawing - Front

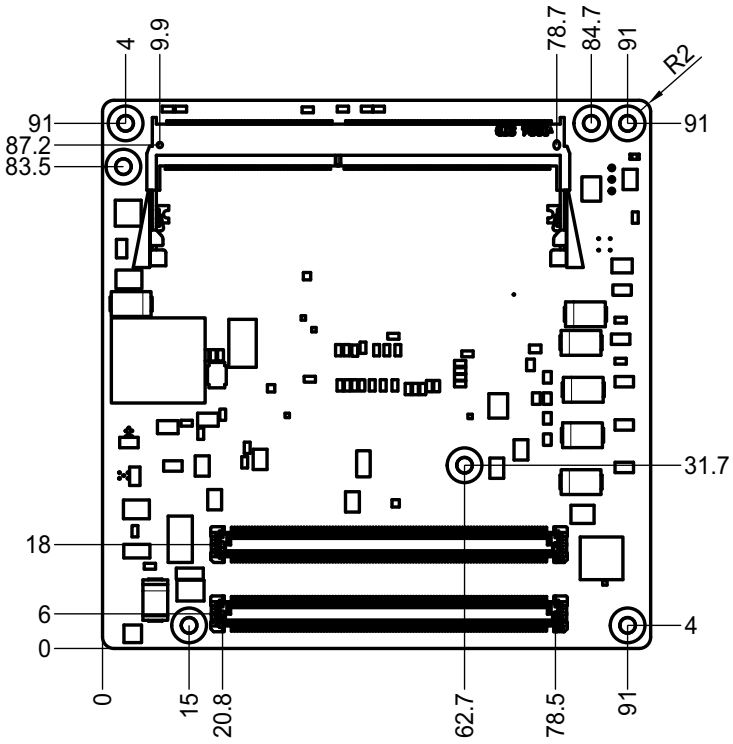

Figure 2.4 Board Mechanical Drawing - Back

2.3 Assembly Drawing

These figures demonstrate the assembly order from the thermal module, COM module to the carrier board.

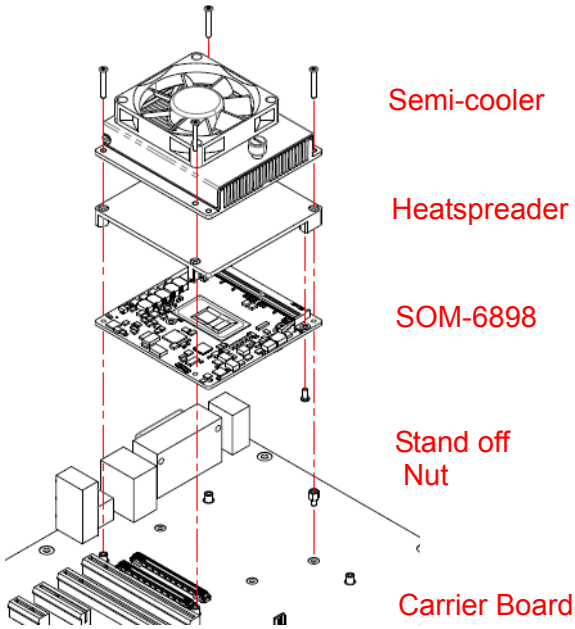

Figure 2.5 Assembly Drawing

2.4 Assembly Drawing

Please consider the CPU and chip height tolerance when designing your thermal solution.

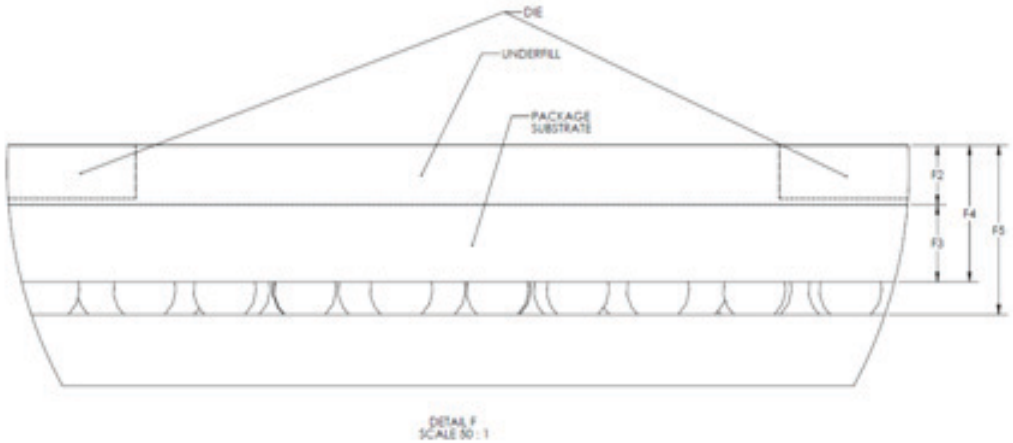

Figure 2.6 Main Chip Height and Tolerance (GT2)

F2=Option1 NOM: 0.315, TOL: ±0.018
Option 2 NOM: 0.415, TOL: ±0.018
F3=Option1 NOM: 0.537, TOL: ±0.07
Option 2 NOM: 0.537, TOL: ±0.07
F4=Option1 NOM: 0.852, TOL: ±0.072
Option 2 NOM: 0.952, TOL: ±0.072
F5=Option1 NOM: 1.08, TOL: ±0.092

NOM: 1.16, TOL: ±0.108 (Post SMT stackup height based on limited data from Intel reference board design)

Chapter 3

BIOS Operation

This chapter gives BIOS setup information for the SOM-6898 CPU Computer on Module.

Sections include:

- Introduction
- Entering Setup
- Hot / Operation Key
- Exit BIOS Setup Utility

With the AMI BIOS Setup Utility, users can modify BIOS settings and control various system features. This chapter describes the basic navigation of the BIOS Setup Utility.

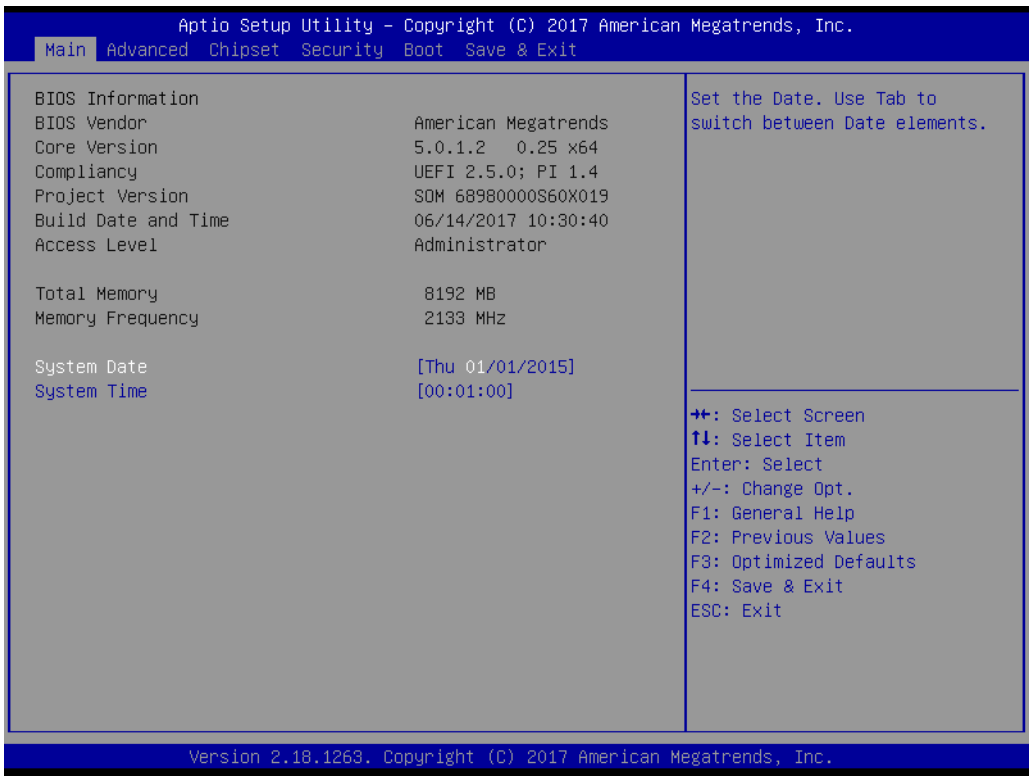

Figure 3.1 Setup program initial screen

AMI's BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This information is stored in flash ROM so it retains setup information when the power is turned off.

3.1 Entering Setup

Turn on the computer and then press <ESC> or <DEL> to enter Setup menu.

3.1.1 Main Setup

When users first enter the BIOS Setup Utility, they will enter the main setup screen. Users can always return to the Main setup screen by selecting the Main tab. There are two Main Setup options. They are described in this section. The Main BIOS setup screen is shown below.

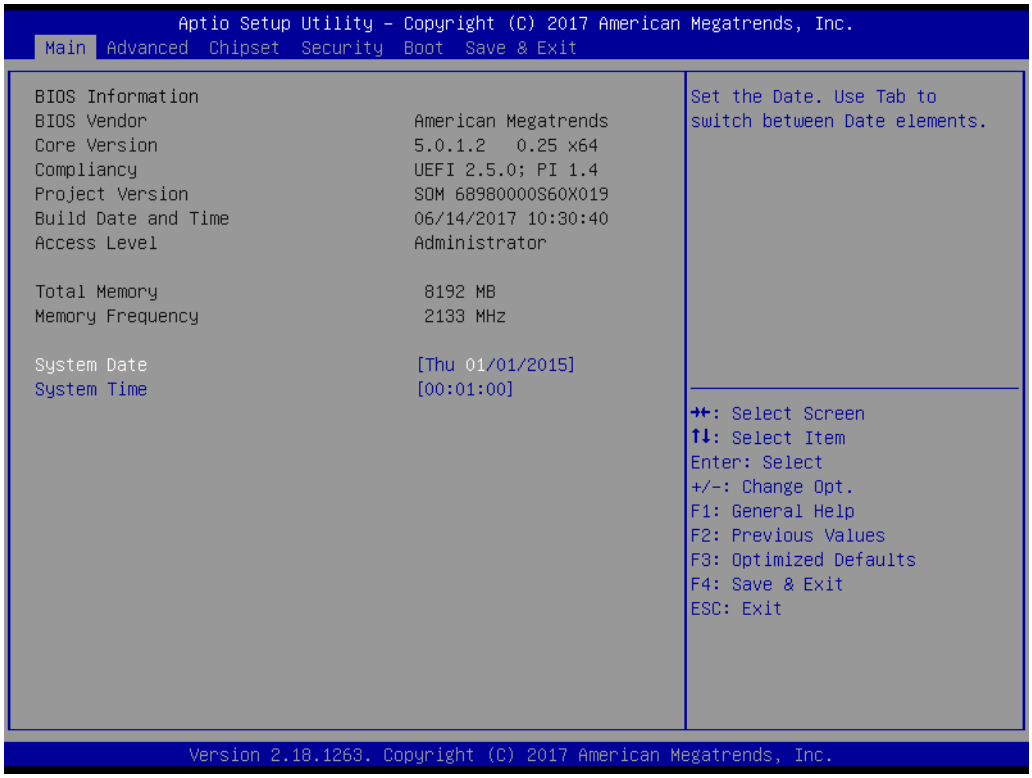

Figure 3.2 Main setup screen

The Main BIOS setup screen has two main frames. The left frame displays all the options that can be configured. Grayed-out options cannot be configured; options in blue can. The right frame displays the key legend.

Above the key legend is an area reserved for a text message. When an option is selected in the left frame, it is highlighted in white. Often a text message will accompany it.

- **System time / System date**

  Use this option to change the system time and date. Highlight System Time or System Date using the <Arrow> keys. Enter new values through the keyboard. Press the <Tab> key or the <Arrow> keys to move between fields.

  - System Date: mm/dd/yyyy
  - System Time: hh/mm/ss

3.1.2 Advanced BIOS Features Setup

Select the Advanced tab from the SOM-6898 setup screen to enter the Advanced BIOS Setup screen. Users can select any item in the left frame of the screen, such as CPU Configuration, to go to the sub menu for that item. Users can display an Advanced BIOS Setup option by highlighting it using the <Arrow> keys. All Advanced BIOS Setup options are described in this section. The Advanced BIOS Setup screens are shown below. The sub menus are described on the following pages.

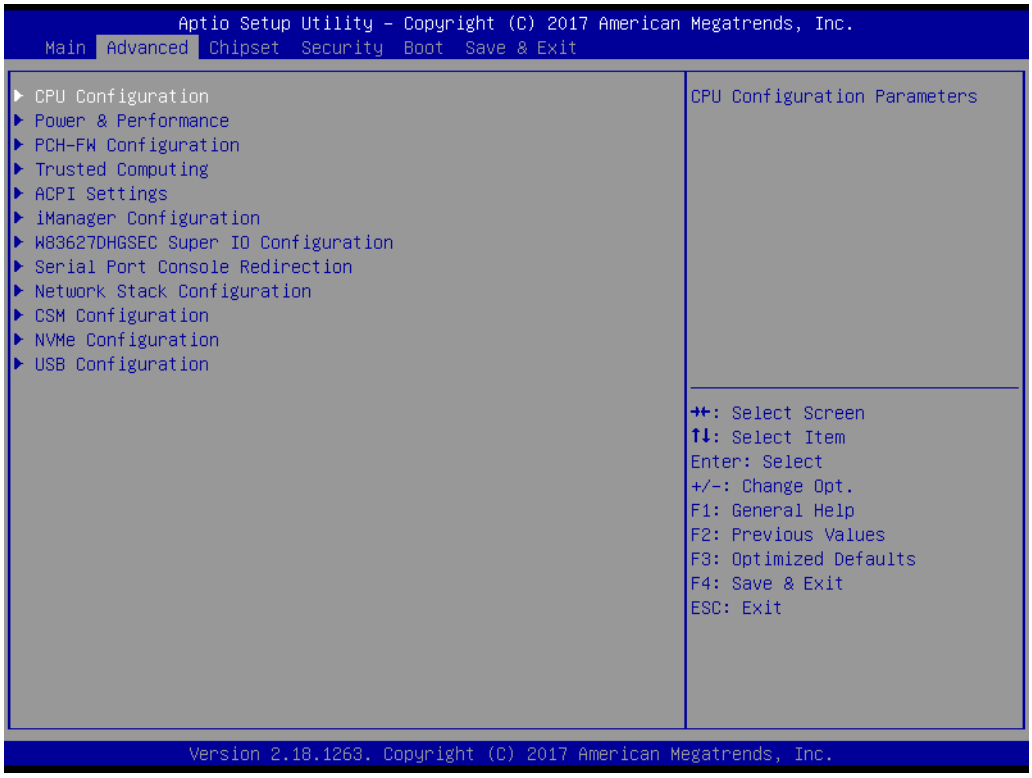

Figure 3.3 Advanced BIOS features setup screen

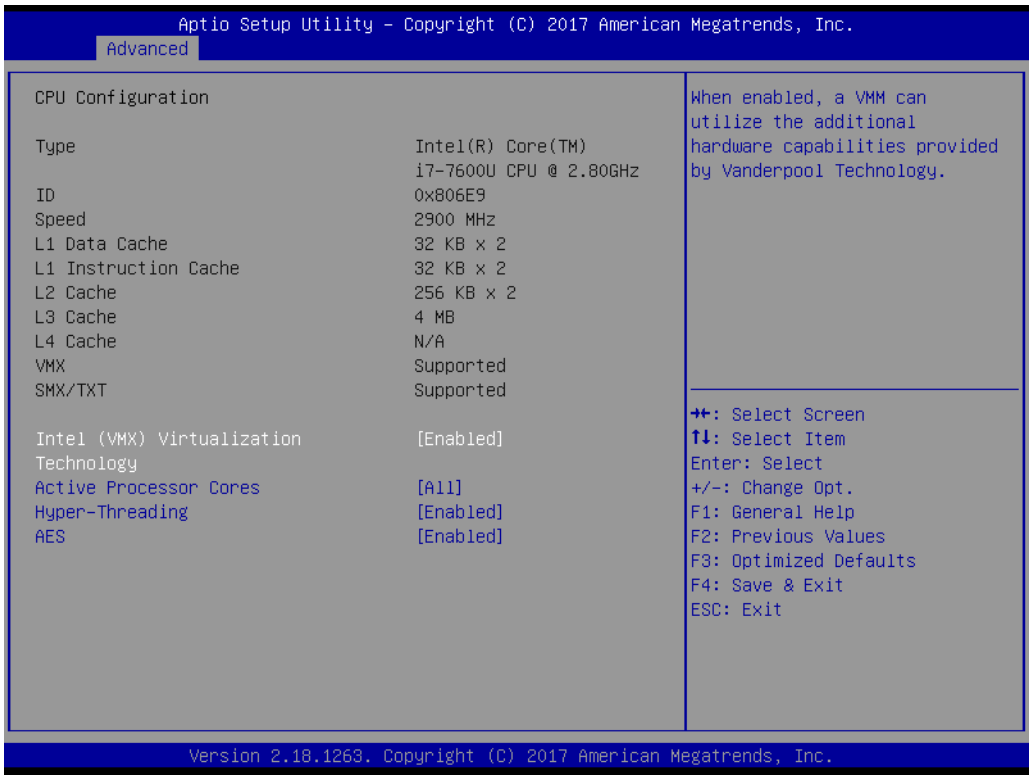
3.1.2.1 CPU Configuration



- **Intel (VMX) Virtualization Technology**
  When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.
- **Active Processor Core**
  Number of cores to enable in each processor package.
- **Hyper-Threading**
  Enabled for Windows XP and Linux (OS optimized for Hyper-Threading Technology) and Disabled for other OS (OS not optimized for Hyper-Threading Technology)
- **AES**
  Enable/Disable AES (Advanced Encryption Standard)

3.1.2.2 Power & Performance

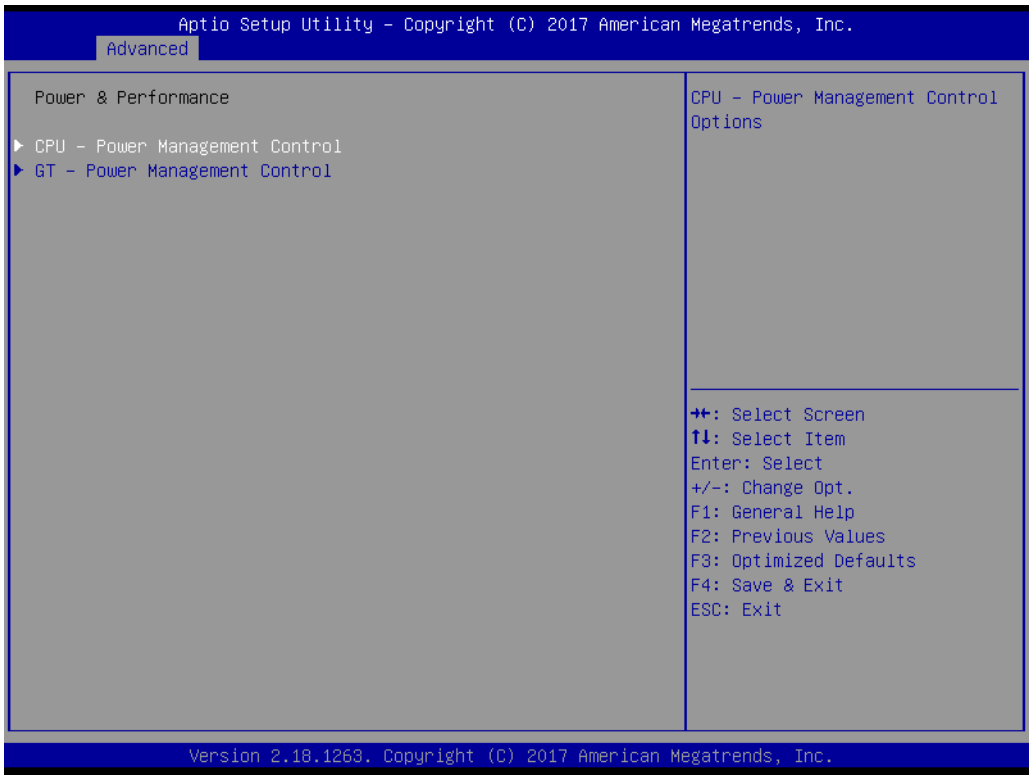


Figure 3.4 Power & Performance

- **CPU- Power Management Control**
  CPU- Power Management Control Options
- **GT- Power Management Control**
  GT- Power Management Control Options

CPU- Power Management Control

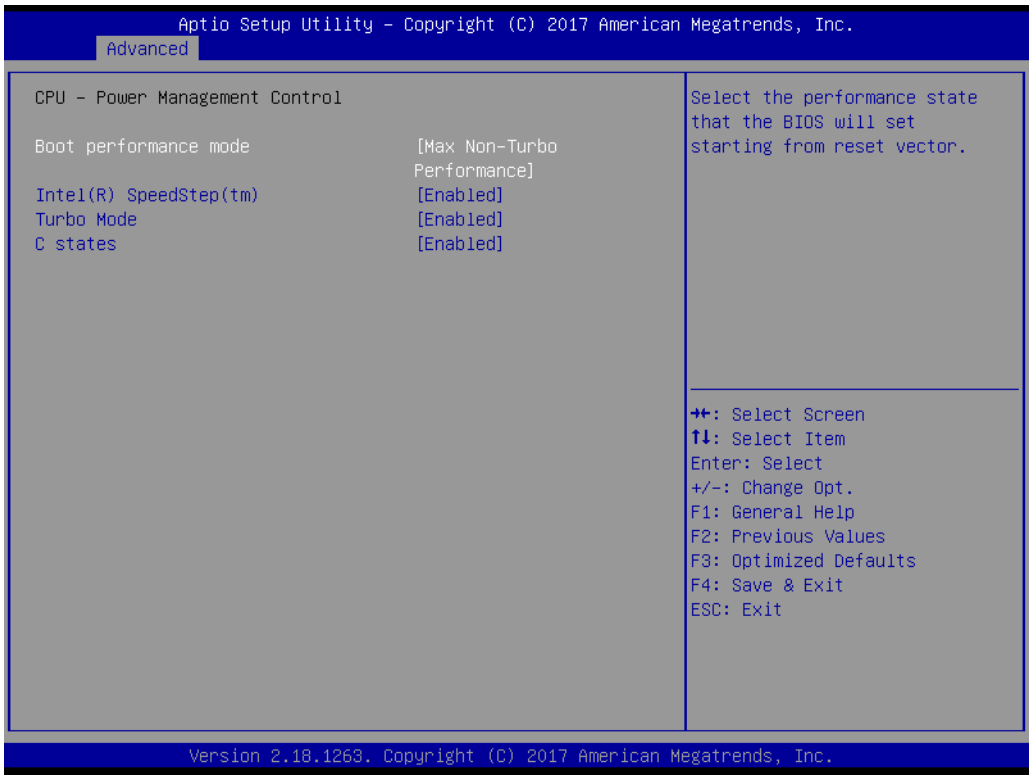

Figure 3.5 CPU- Power Management Control

- **Boot performance mode**
  Select the performance state that the BIOS will set starting from reset vector
- **Intel® SpeedStep™**
  Allows more than two frequency ranges to be supported.
- **Turbo Mode**
  Enable/Disable processor Turbo Mode (requires EMTTM enabled too. AUTO means enabled, unless max turbo ratio is bigger than 16- SKL A0 W/A
- **C state**
  Enable/Disable CPU Power Management. Allows CPU to go to C states when it's not 100% utilized.

GT- Power Management Control

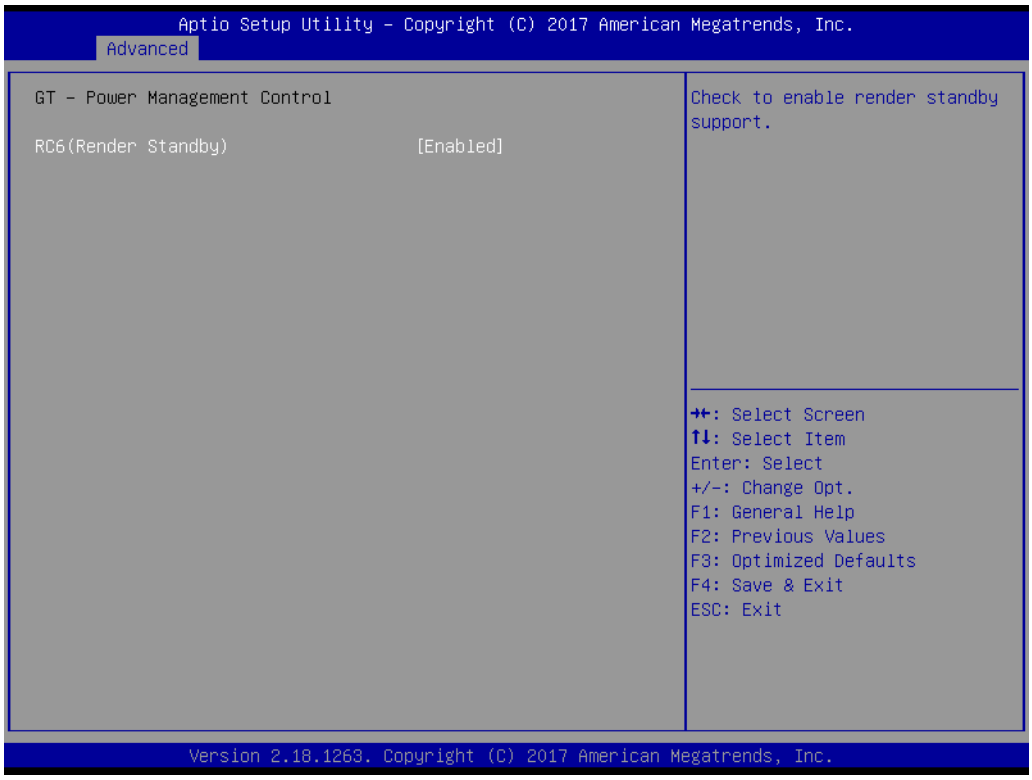

Figure 3.6 GT- Power Management Control

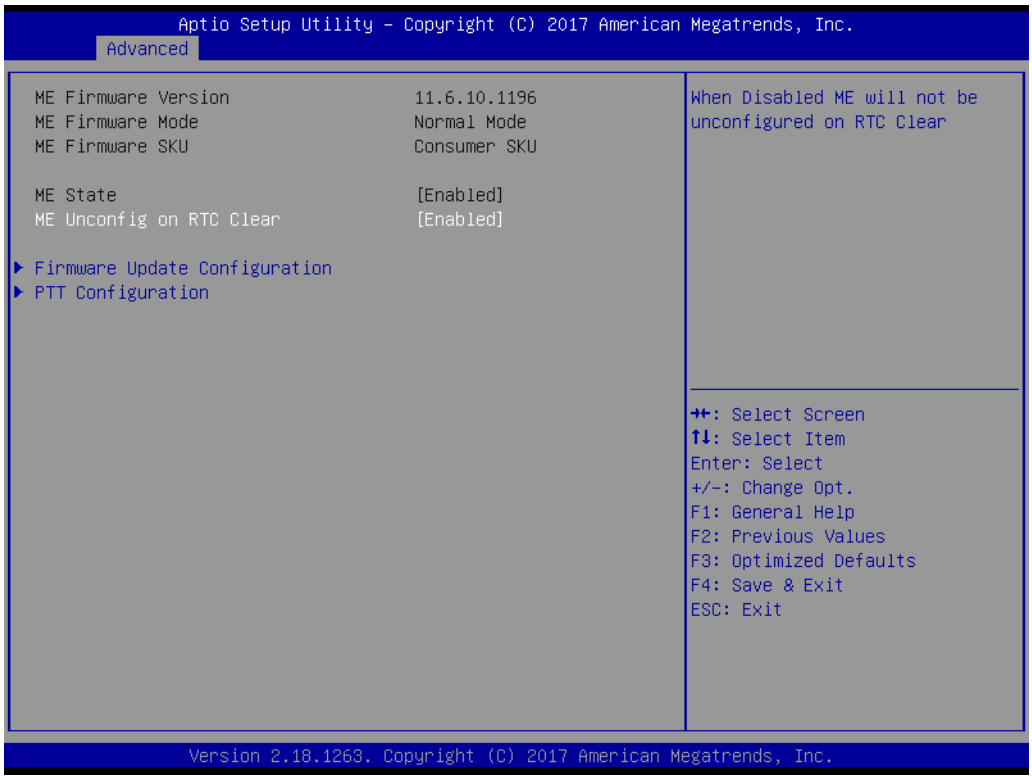
– **RC6 (Render Standby)**
Check to enable render standby support.

3.1.2.3 PCH-FW Configuration



- **ME State**
  Sets ME to soft temporary disabled.
- **Firmware Update Configuration**
  Configures management engine technology parameters.
- **PTT Configuration**
  Configure PTT

Firmware Update Configuration

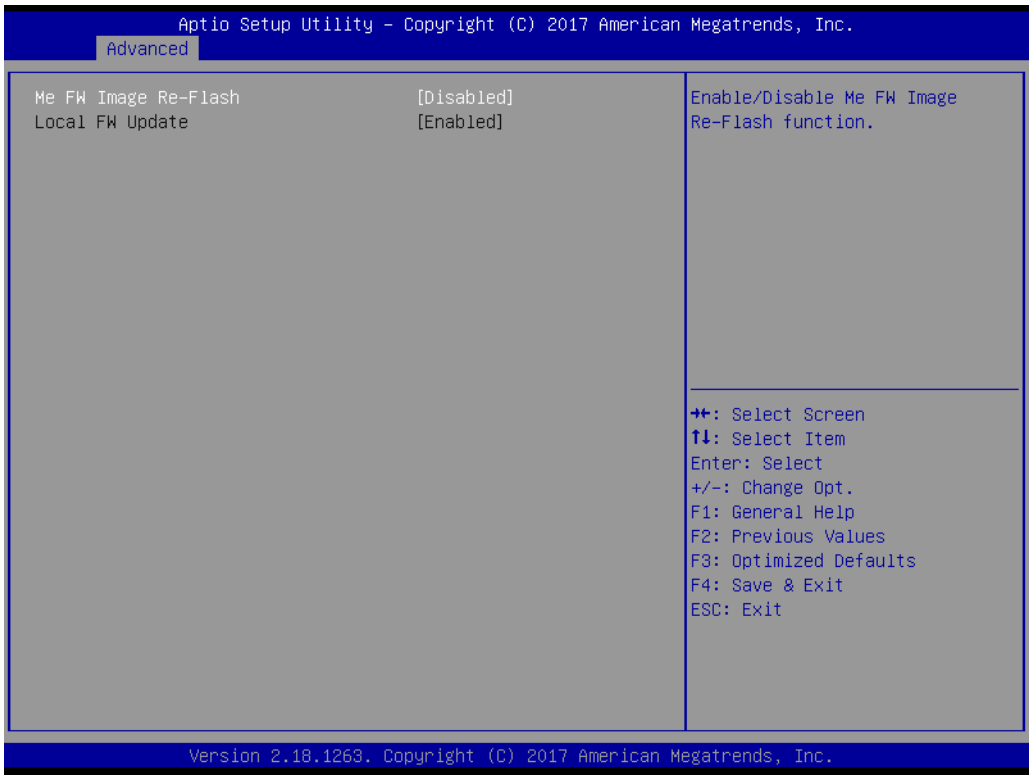


Figure 3.7 Firmware Update Configuration

– **Me FW Image Re-Flash**
Enable/Disable Me FW Image Re-Flash function

PTT Configuration

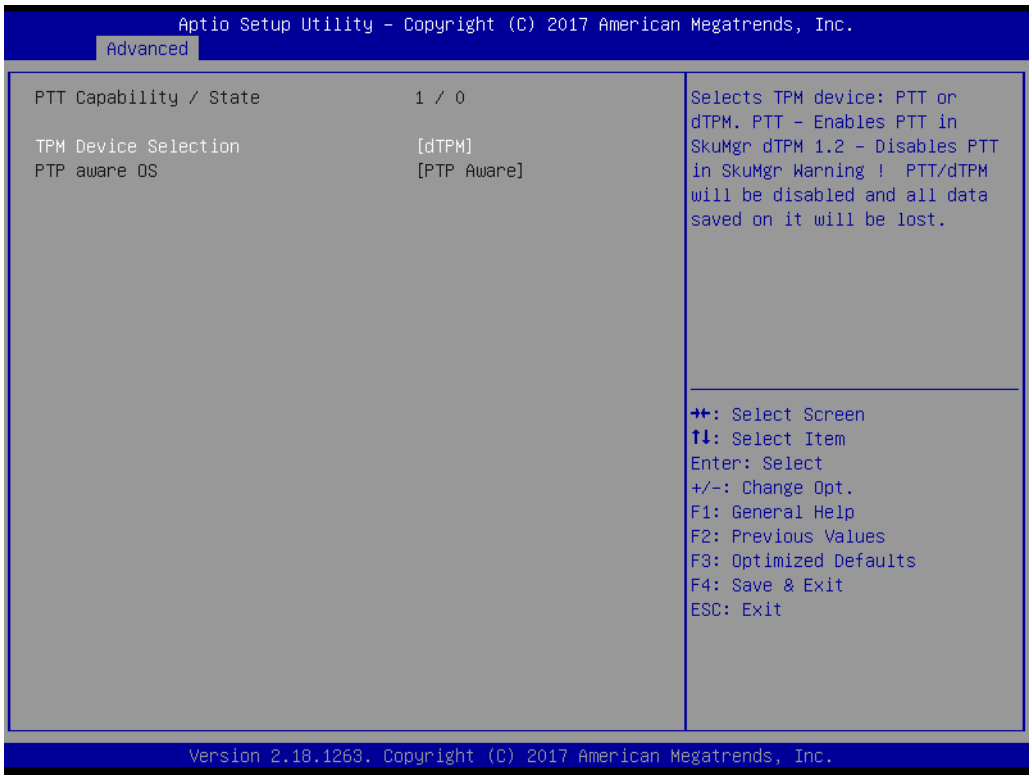

Figure 3.8 PTT Configuration

- **TPM Device Selection**
  Selects TPM device: PTT or dTPM.
  PTT- Enables PTT in SkuMgr
  dTPM 1.2- Disables PTT in SkuMgr Warning!
  PTT/dTPM will be disabled and all data saved on it will be lost.
- **PTP aware OS**
  Select whether or not the OS you will boot to will be PTP aware.

3.1.2.4 Trusted Computing

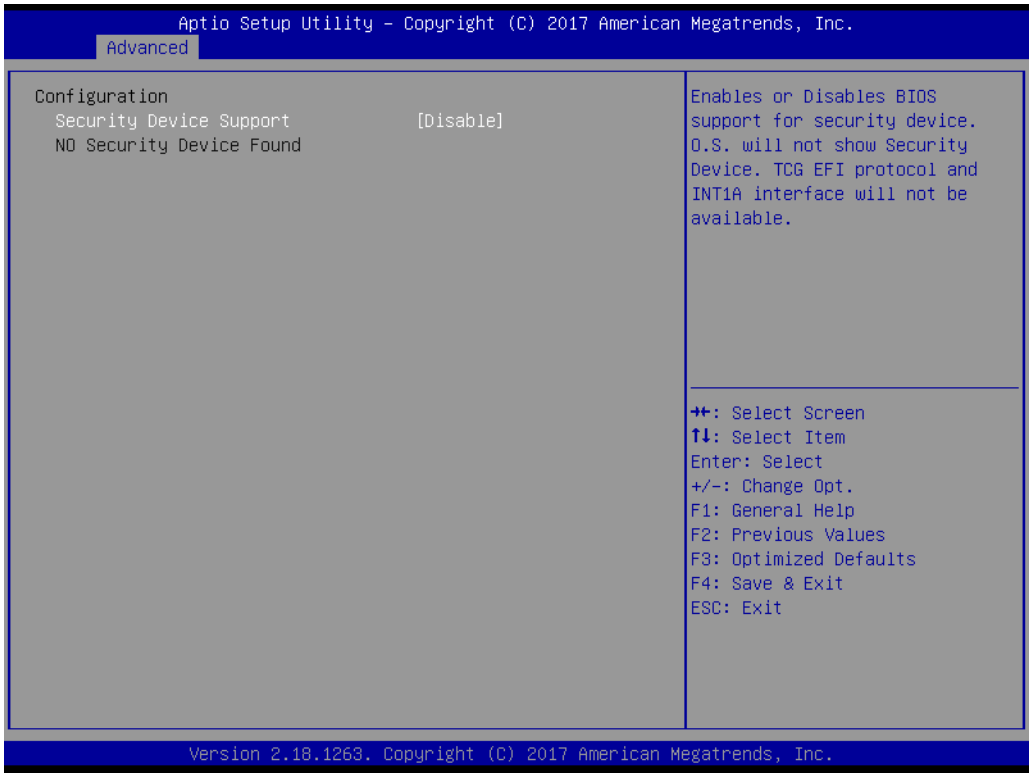

Figure 3.9 Trusted Computing

- **Security Device Support**

  Enables or Disables BIOS support for security devices. OS will not show security device. TCG EFI protocol and INT1A interface will not be available.

3.1.2.5 ACPI Settings

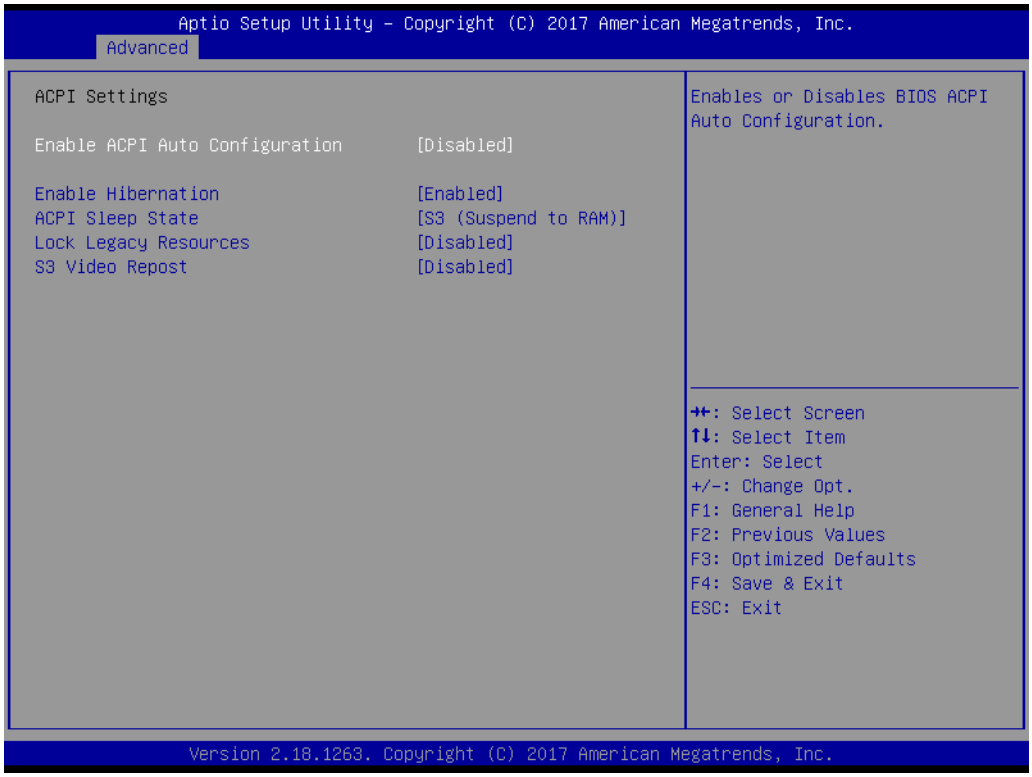

Figure 3.10 ACPI Settings

- **Enable ACPI Auto Configuration**
  Enables or Disables BIOS ACPI Auto Configuration.
- **Enable Hibernation**
  Enables or Disables System ability to Hibernate (OS/S4 Sleep State). This option may be not effective with some OS.
- **ACPI Sleep State**
  Select the highest ACPI sleep state the system will enter when the SUSPEND button is pressed.
- **Lock Legacy Resources**
  Enables or Disables Lock of Legacy Resources
- **S3 Video Repost**
  Enables or Disables Lock of S3 Video Repost

3.1.2.6 iManager Configuration

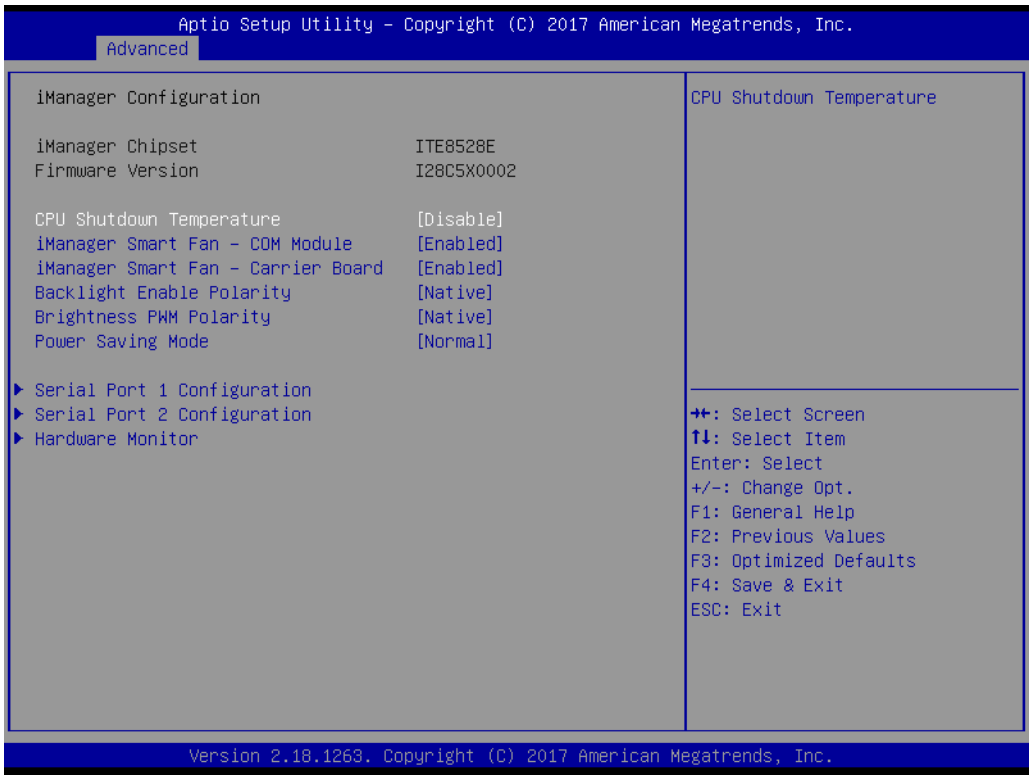

Figure 3.11 iManager Configuration

- **CPU Shutdown Temperature**
  Enable/Disable CPU Shutdown Temperature.
- **iManager Smart Fan – COM Module**
  Control iManager Smart FAN function.
- **iManager Smart Fan – Carrier Board**
  Control iManager Smart FAN Carrier Board function.
- **Backlight Enable Polarity**
  Switch Backlight Enable Polarity for Native or Invert
- **Brightness PWM Polarity**
  Switch Backlight Control Brighness PWM Polarity for Native or Invert
- **Power Saving Mode**
  Select Ite8528 Power Saving Mode
- **Serial Port 1 Configuration**
  Set Parameters of Serial Port 1 (COMA)
- **Serial Port 2 Configuration**
  Set Parameters of Serial Port 2 (COMB)
- **Hardware Monitor**
  Monitor hardware status

Serial Port 1 Configuration

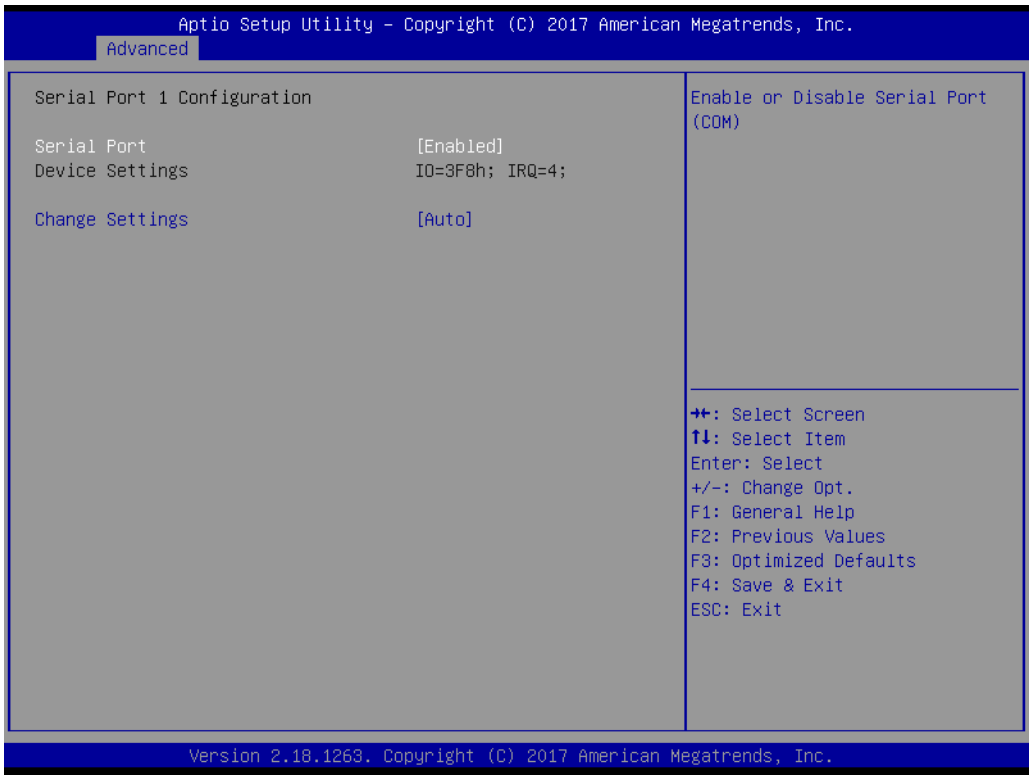

Figure 3.12 Serial Port 1 Configurations

- **Serial Port**
  Enable or disables serial port (COM).
- **Change Settings**
  Select an optimal setting for Super IO device.

Serial Port 2 Configuration

- **COM4 Console Redirection**
  Console Redirection Enable or Disable
- **Legacy Console Redirection Settings**
  Legacy Console Redirection Settings
- **Console Redirection**
  Console Redirection Enable or Disable

Legacy Console Redirection Settings

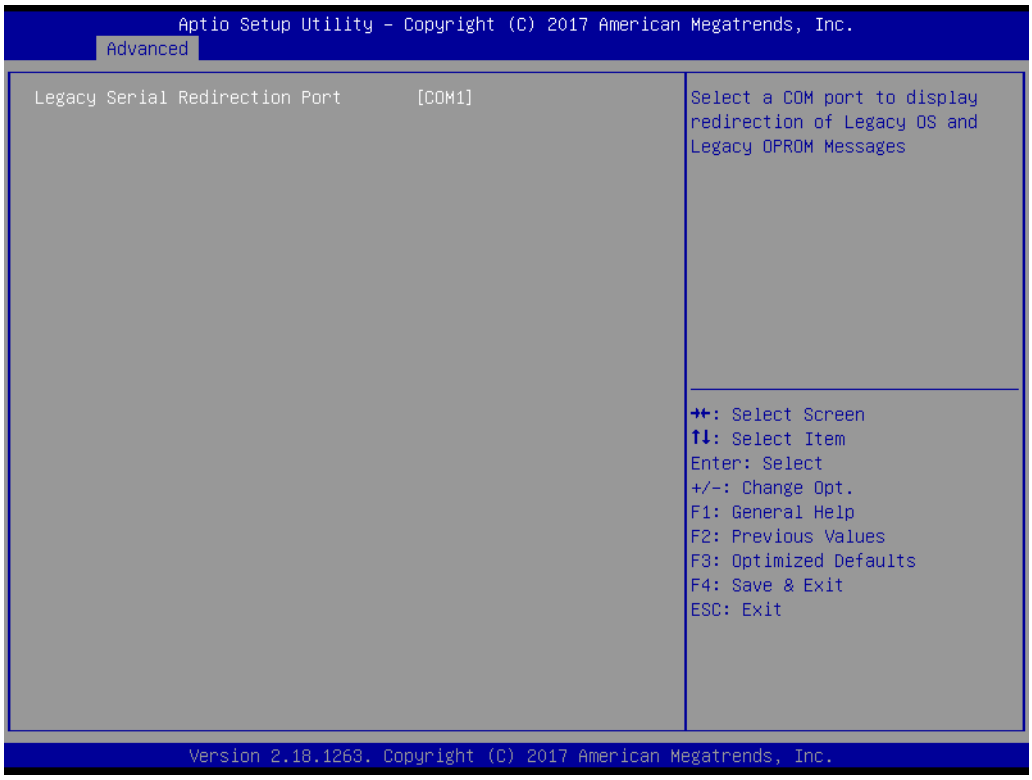

Figure 3.20 Legacy Console Redirection Settings

– **Legacy Serial Redirection Port**
Select a COM port to display redirection of Legacy OS and Legacy OPROM Messages

3.1.2.9 Network Stack Configuration

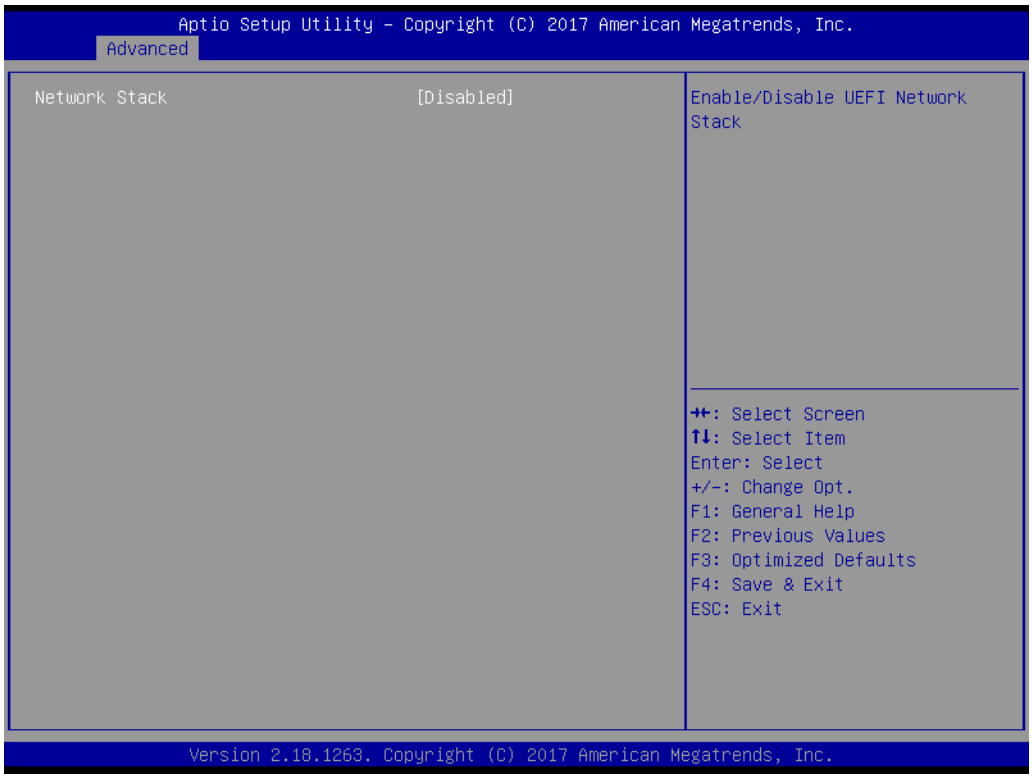

Figure 3.21 Network Stack Configuration

- **Network Stack**
  Enable/Disable UEFI Network Stack.

3.1.2.10 CSM Configuration

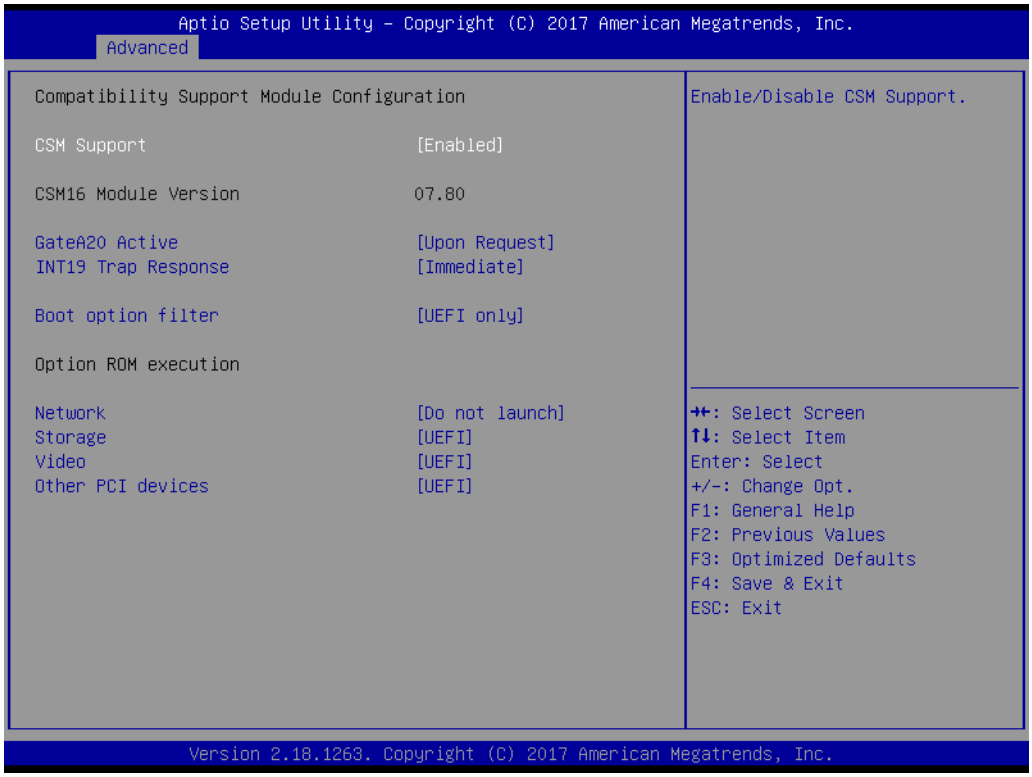

Figure 3.22 CSM Configuration

- **CSM Support**
  Enable/Disable CSM support.
- **GateA20 Active**
  UPON Request- GA20 can be disabled using BIOS services. Do not allow disabling GA20; this option is useful when any RT code is executed above 1MB.
- **INT19 Trap Response**
  BIOS reaction on INT19 trapping by option ROM:
  IMMEDIATE – execute the trap right away;
  POSTPONED – execute the trap during legacy boot.
- **Boot option filter**
  This option controls legacy/UEFI ROMs priority.
- **Network**
  Controls the execution of UEFI and legacy PXE OpROM.
- **Storage**
  Controls the execution of UEFI and legacy storage OpROM.
- **Video**
  Controls the execution of UEFI and legacy video OpROM.
- **Other PCI devices**
  Determines OpROM execution policy for devices other than network, storage, or video.

3.1.2.11 NVMe Configuration

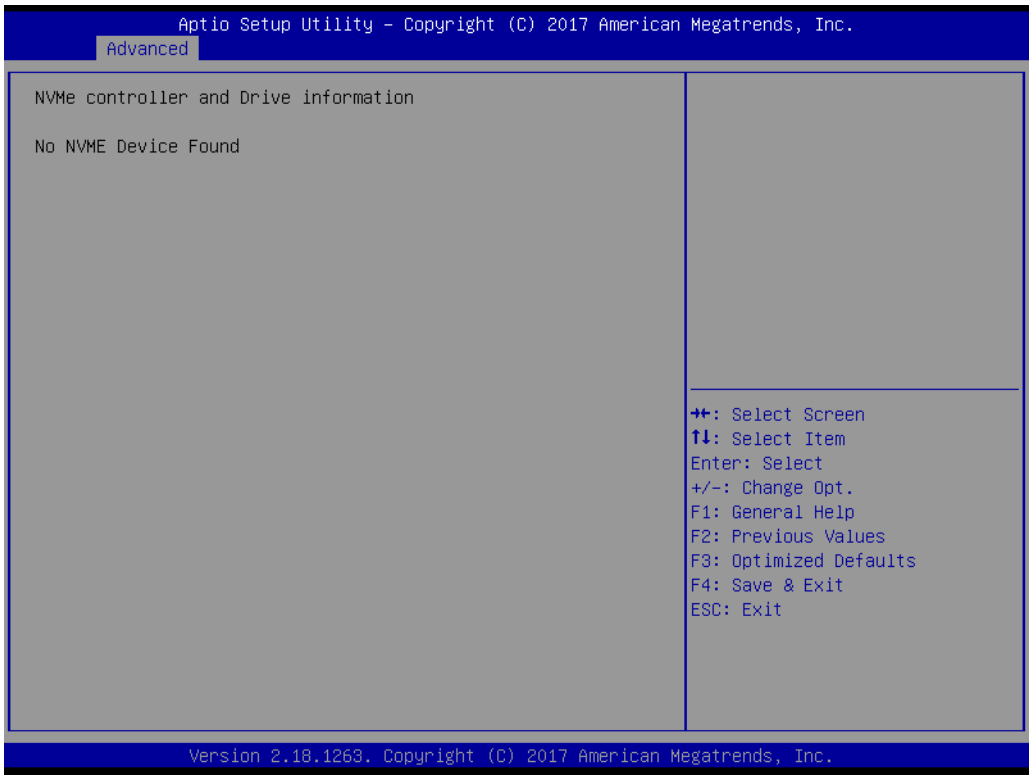

Figure 3.23 NVMe Configuration

- **NVMe Configuration**
  NVMe controller and driver information

3.1.2.12 USB Configuration

Figure 3.24 USB Configuration

- **Legacy USB Support**
  Enables Legacy USB support. Auto option disables legacy support if no USB devices are connected. Disable option will keep USB devices available only for EFI applications.
- **XHCI Hand-off**
  This is a workaround for OS without XHCI ownership change should be claimed by XHCI driver.
- **USB Mass Storage Driver Support**
  Enable/Disable USB Mass Storage Driver Support.
- **Port 60/64 Emulation**
  Enables I/O port 60h/64h emulation support. This should be enabled for the complete USB keyboard legacy support for non-USB aware OS.
- **USB transfer time-out**
  The time-out value for Control, Bulk, and Interrupt transfers.
- **Device reset time-out**
  USB mass storage device Start Unit command time-out.
- **Device power-up delay**
  Maximum time the device will take before it properly reports itself to the Host Controller.
  'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

3.1.3 Chipset

Select the chipset tab from the SOM-6898 setup screen to enter the chipset BIOS Setup screen. You can display a chipset BIOS setup option by highlighting it using the <Arrow> keys. All Plug and Play BIOS setup options are described in this section. The Plug and Play BIOS Setup screen is shown below.

Figure 3.25 Chipset Setup

- **System Agent (SA) Configuration**
  System Agent (SA) Parameters.
- **PCH-IO Configuration**
  PCH Parameters.

3.1.3.1 System Agent (SA) Configuration

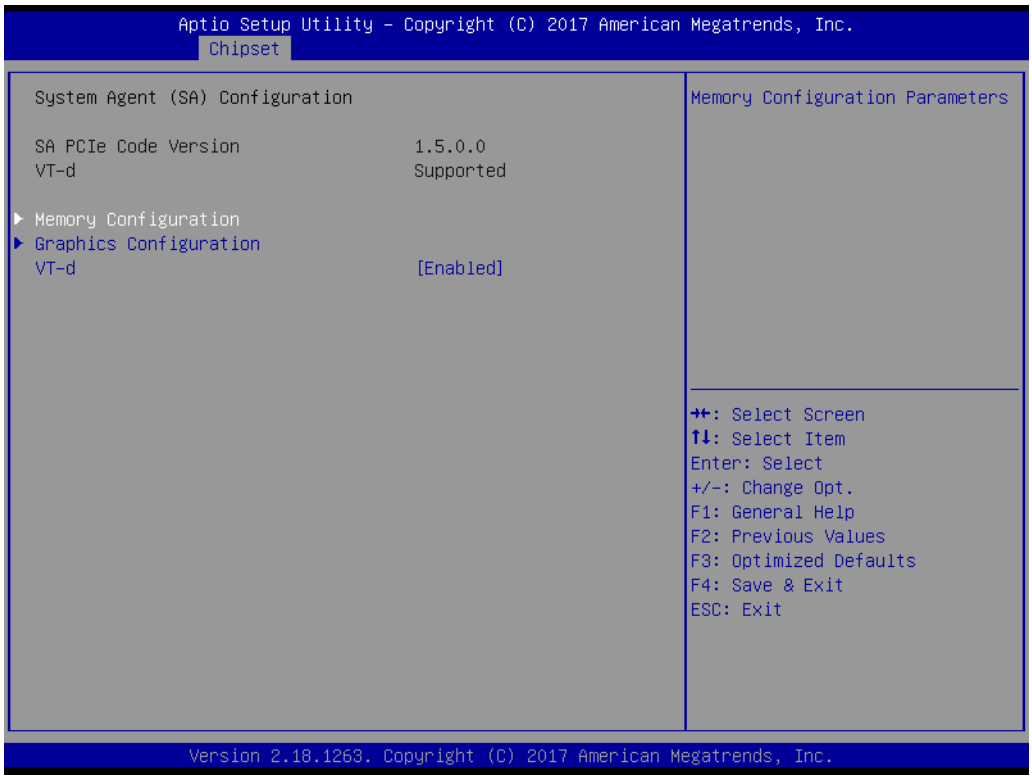

Figure 3.26 System Agent (SA) Configuration

- **Memory Configuration**
  Memory Configuration Parameters
- **Graphics Configuration**
  Graphics Configuration Parameters
- **VT-d**
  VT-d capability.

Memory Configuration

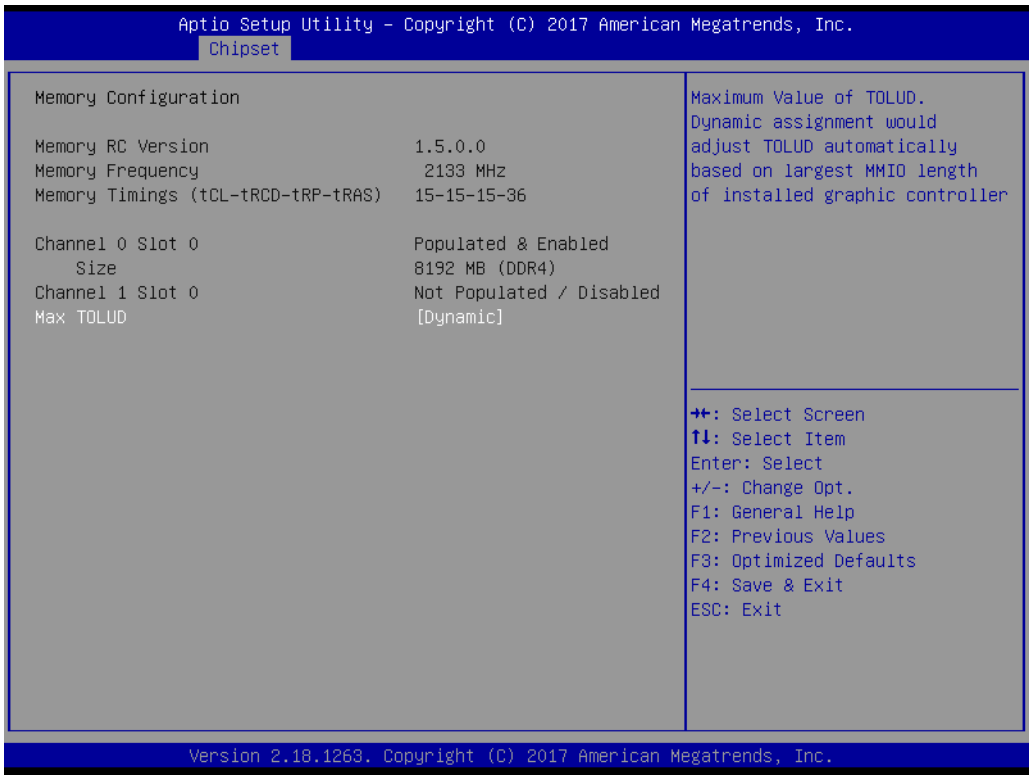

Figure 3.27 Memory Configuration

– **Max TOLUD**

Maximum Value of TOLUD. Dynamic assignment would adjust TOLUD automatically based on largest MMIO length of installed graphic controller.

Graphics Configuration

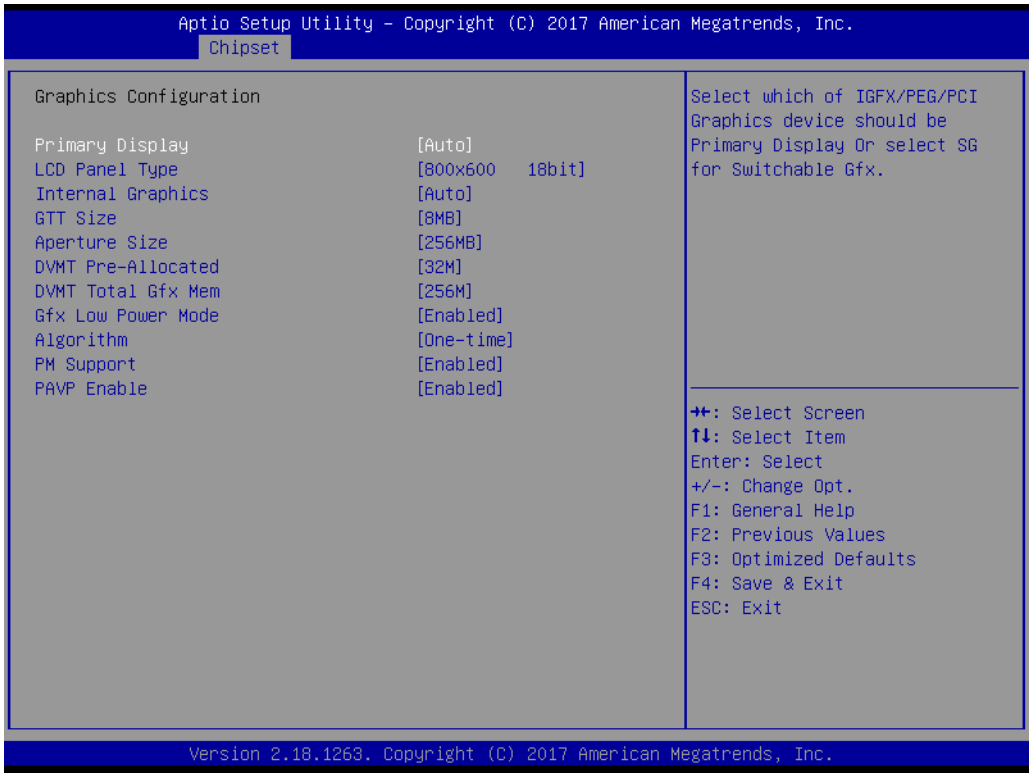

Figure 3.28 Graphics Configuration

- **Primary Display**
  Select which of IGFX/PEG/PCI Graphics device should be Primary Display or select SG for Switchable Gfx.
- **LCD Panel Type**
  Select LCD panel used by Internal Graphics Device by selecting the appropriate setup item.
- **Internal Graphics**
  Keep IGFX enabled based on the setup options.
- **GTT Size**
  Select the GTT size.
- **Aperture Size**
  Select the Aperture Size
  Note: Above 4GB MMIO BIOS assignment is automatically enabled when selecting 2048MB aperture. To use this feature please disable CSM support.
- **DVMT Pre-Allocated**
  Select DVMT 5.0 Pre-Allocated (Fixed) Graphics Memory size used by the Internal Graphics Device.
- **DVMT Toal Gfx Mem**
  Select DVMT 5.0 Total Graphic Memory size used by the Internal Graphics Device.
- **Gfx Low Power Mode**
  This option is applicable for SFF only.
- **Algorithm**
  HDCP Re-encryption Flow.
- **PM Support**
  Enable/Disable PM Support.
- **PAVP Enable**
  Enable/Disable PAVP.

3.1.3.2 PCH-IO Configuration

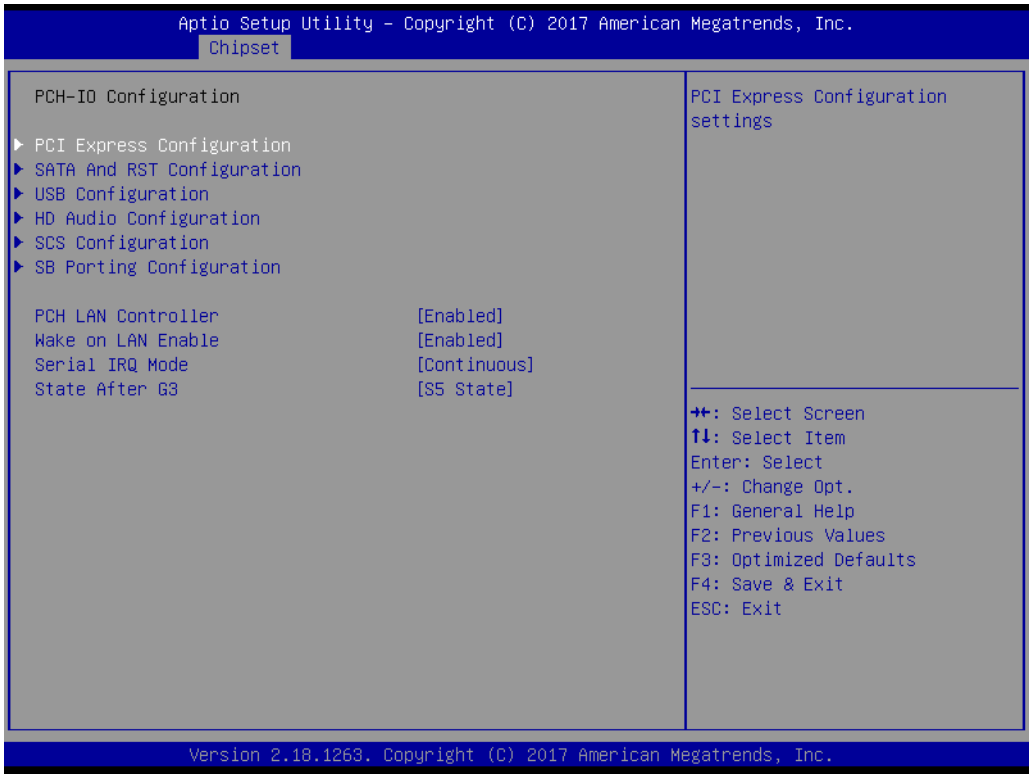

Figure 3.29 PCH-IO Configuration

- **PCI Express Configuration**
  PCI Express configuration settings.
- **SATA And RST Configuration**
  SATA Device Options Settings
- **USB Configuration**
  USB Configuration settings
- **HD Audio Configuration**
  HD Audio Subsystem Configuration Settings
- **SCS Configuration**
  Storage and Communication Subsystem (SCS) Configuration
- **SB Porting Configuration**
  SB Porting Configuration
- **PCH LAN Controller**
  Enable/Disable onboard NIC.
- **Wake on LAN Enable**
  Enable/Disable integrated LAN to wake the system.
- **Serial IRQ Mode**
  Configure Serial IRQ Mode
- **State After G3**
  Specify what state to go to when power is re-applied after a power failure (G3 state).

PCI Express Configuration

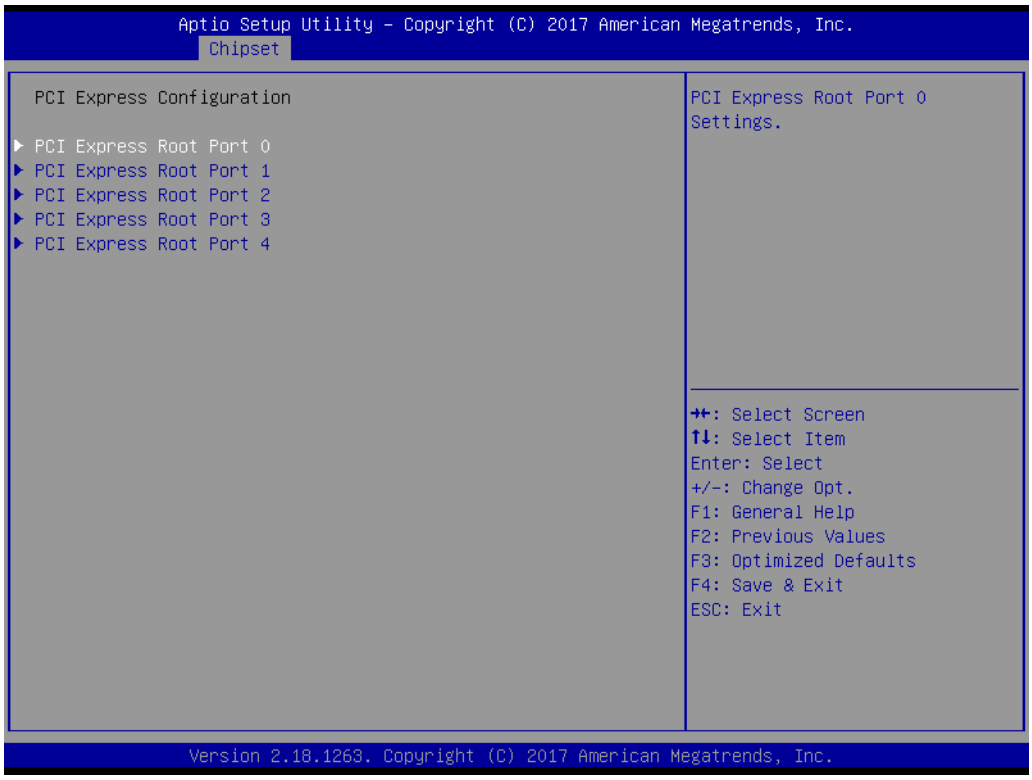

Figure 3.30 PCI Express Configuration

- **PCI Express Root Port 0**
  PCI Express Root Port 0 settings.
- **PCI Express Root Port 1**
  PCI Express Root Port 1 settings.
- **PCI Express Root Port 2**
  PCI Express Root Port 2 settings.
- **PCI Express Root Port 3**
  PCI Express Root Port 3 settings.
- **PCI Express Root Port 4**
  PCI Express Root Port 4 settings.

– **PCI Express Root Port 0 Configuration**

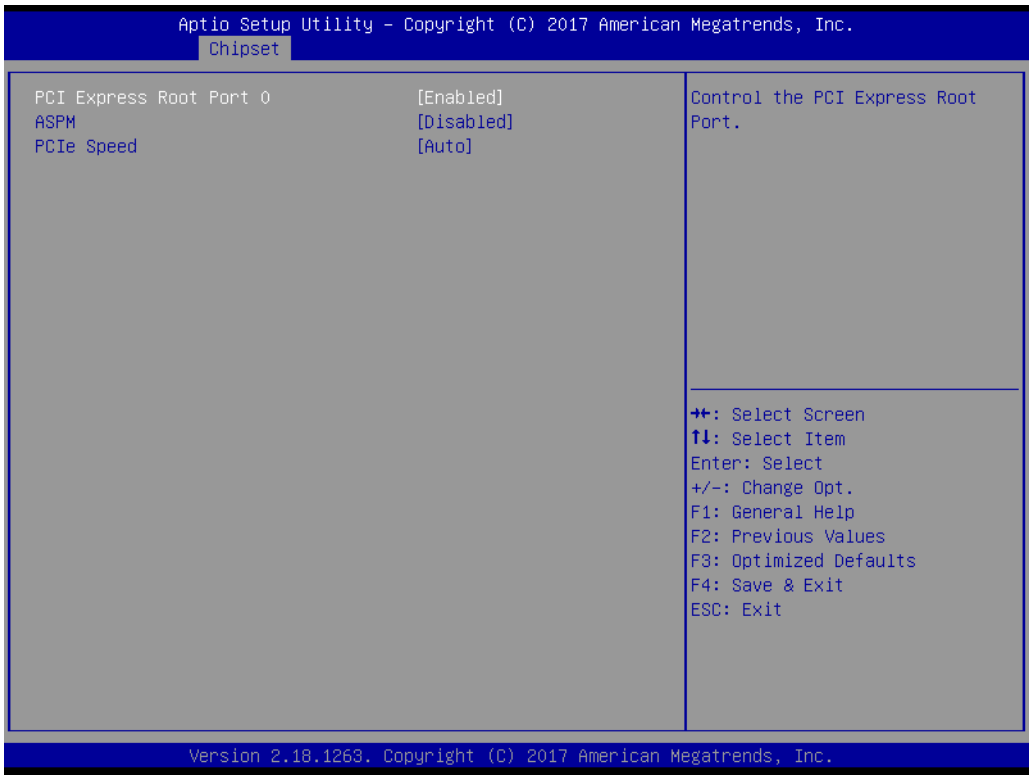

Figure 3.31 PCI Express Root Port 0 Configuration

PCI Express Root Port 0

Control the PCI Express Root Port.

ASPM

Set the ASPM level:
Force L0s – Force all links to L0s state.

Auto – BIOS auto configure

Disable – disable ASPM.

PCIe Speed

Select PCI Express port speed.

– **PCI Express Root Port 1 Configuration**

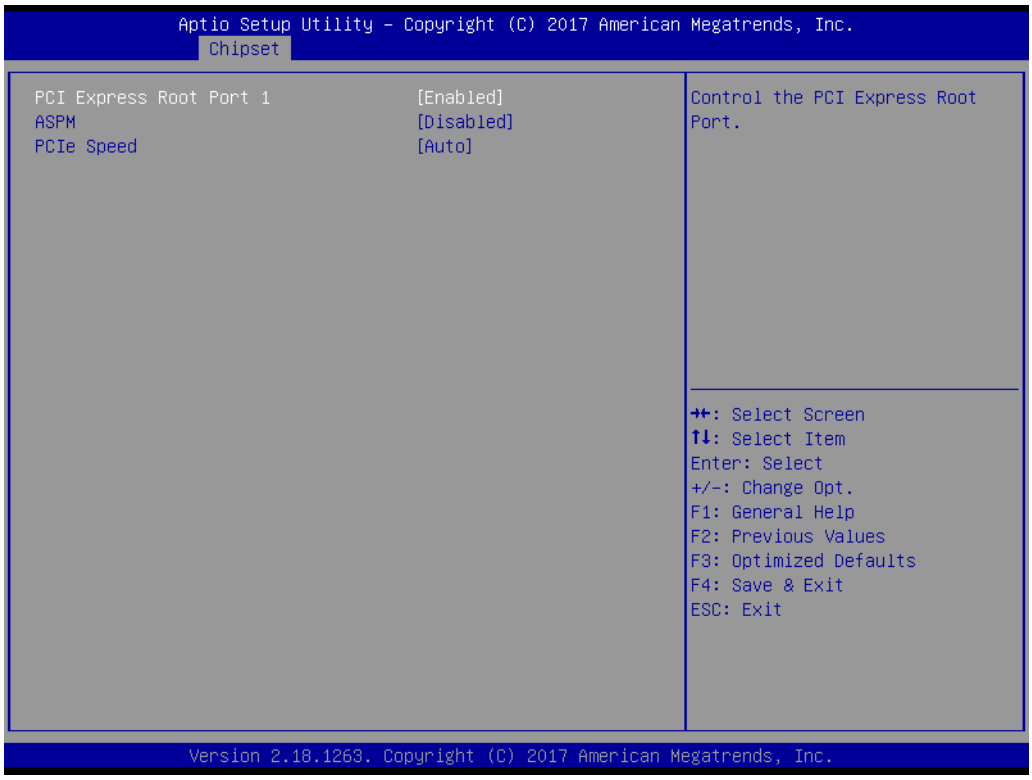

Figure 3.32 PCI Express Root Port 1 Configuration

PCI Express Root Port 1

Control the PCI Express Root Port.

ASPM

Set the ASPM level:
Force L0s – Force all links to L0s state.

Auto – BIOS auto configure

Disable – disable ASPM.

PCIe Speed

Select PCI Express port speed.

– **PCI Express Root Port 2 Configuration**

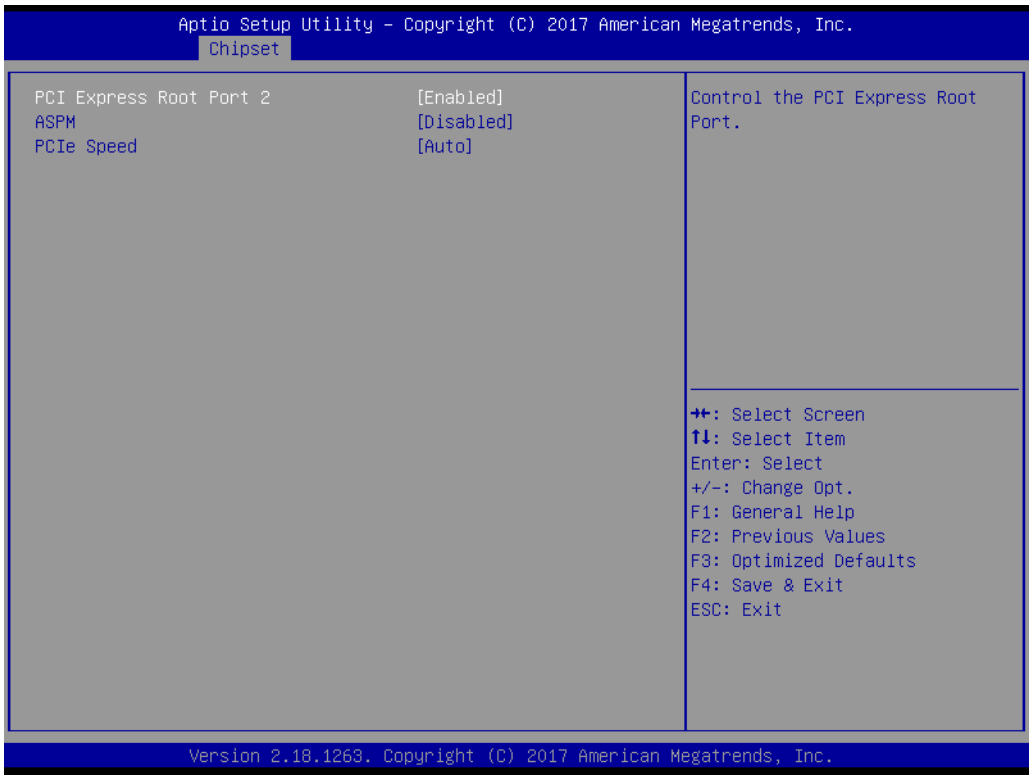

Figure 3.33 PCI Express Root Port 2 Configuration

PCI Express Root Port 2

Control the PCI Express Root Port.

ASPM

Set the ASPM level:
Force L0s – Force all links to L0s state.

Auto – BIOS auto configure

Disable – disable ASPM.

PCIe Speed

Select PCI Express port speed.

– **PCI Express Root Port 3 Configuration**

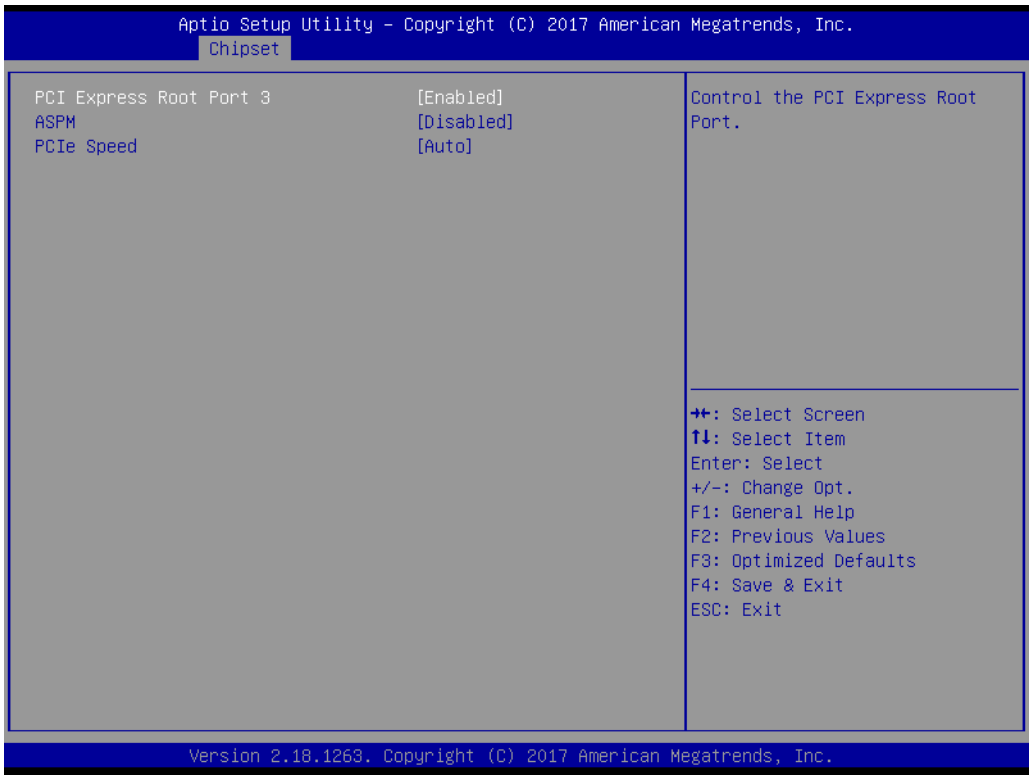

Figure 3.34 PCI Express Root Port 3 Configuration

PCI Express Root Port 3

Control the PCI Express Root Port.

ASPM

Set the ASPM level:
Force L0s – Force all links to L0s state.

Auto – BIOS auto configure

Disable – disable ASPM.

PCIe Speed

Select PCI Express port speed.

– **PCI Express Root Port 4 Configuration**

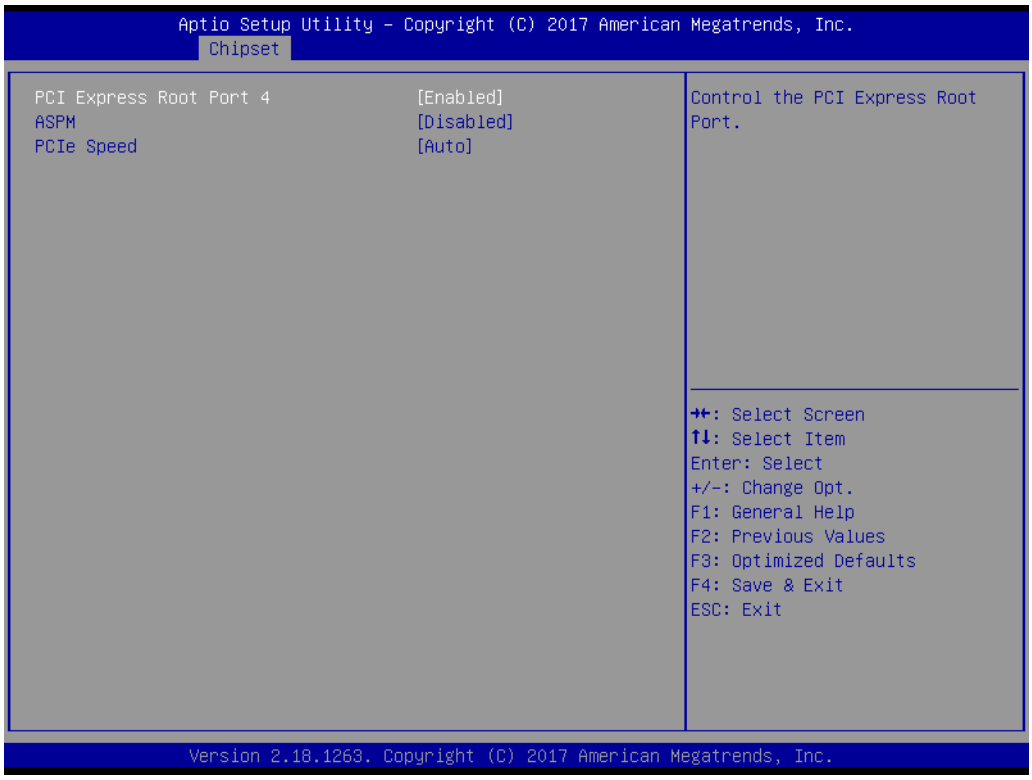

Figure 3.35 PCI Express Root Port 4 Configuration

PCI Express Root Port 4

Control the PCI Express Root Port.

ASPM

Set the ASPM level:
Force L0s – Force all links to L0s state.

Auto – BIOS auto configure

Disable – disable ASPM.

PCIe Speed

Select PCI Express port speed.

SATA And RST Configuration

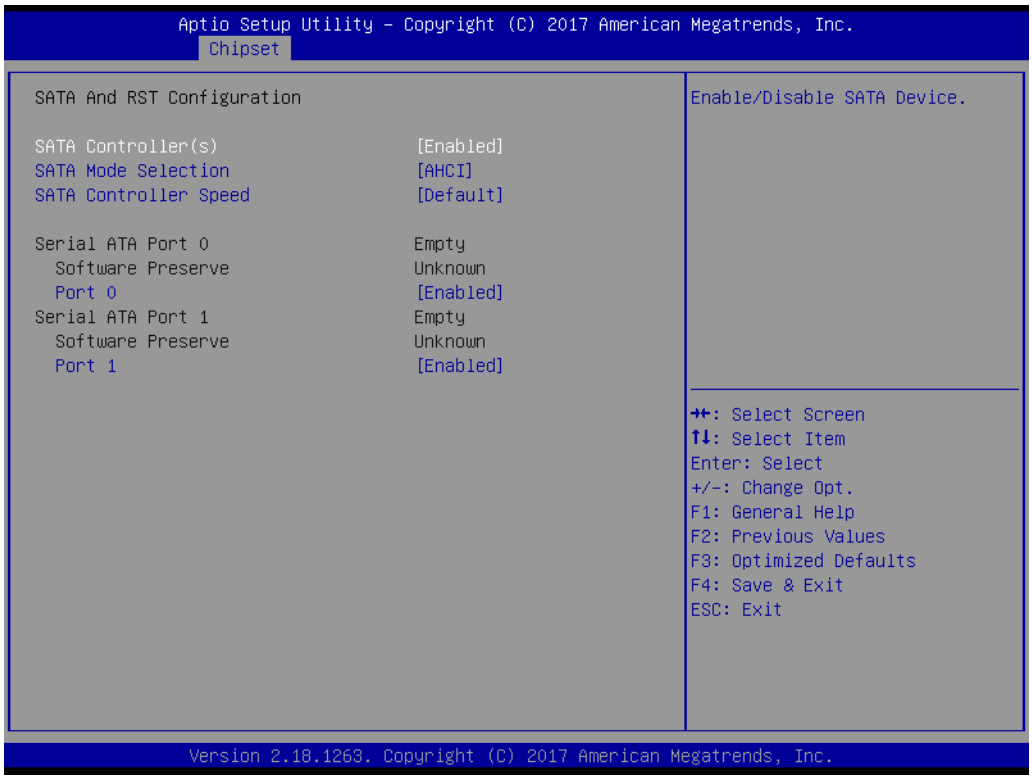

Figure 3.36 SATA And RST Configuration

- **SATA Controller(s)**
  Enable/Disable SATA Device
- **SATA Mode Selection**
  Determines how SATA controller(s) operate.
- **SATA Controller Speed**
  Indicates the maximum speed the SATA controller can support.
- **Port 0**
  Enable or Disable SATA port
- **Port 1**
  Enable or Disable SATA port

USB Configuration

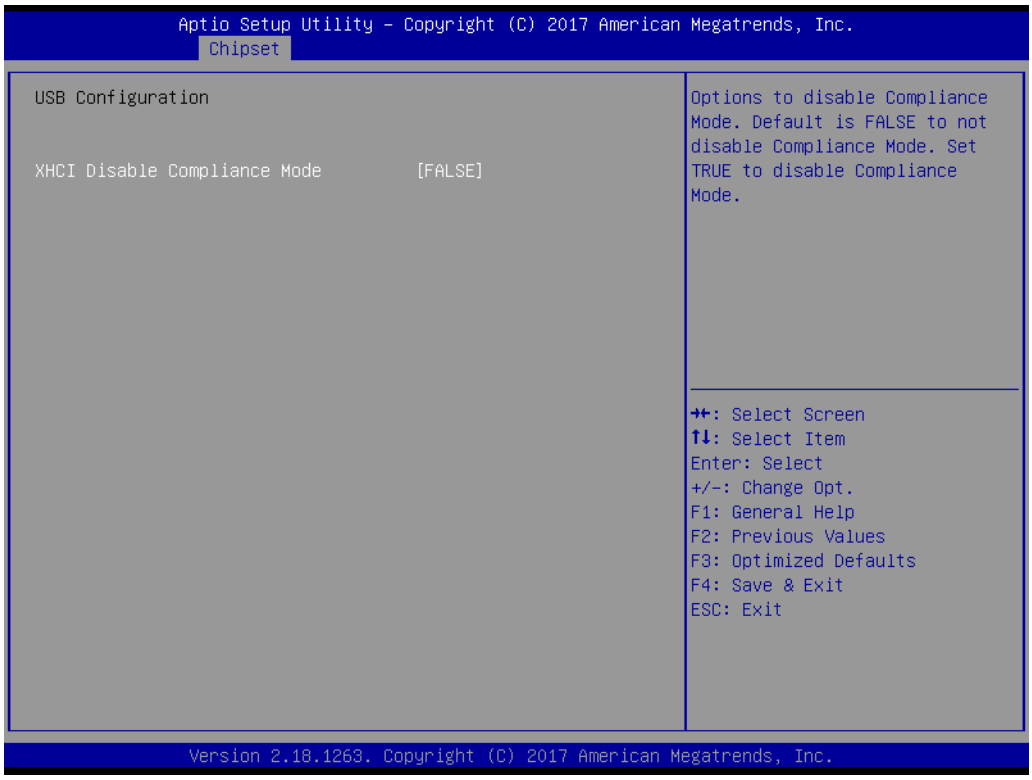

Figure 3.37 USB Configuration

– **XHCI Disable Compliance Mode**

Options to disable Compliance Mode.

Default is False to not disable Compliance Mode. Set TRUE to disable Compliance Mode.

HD Audio Configuration

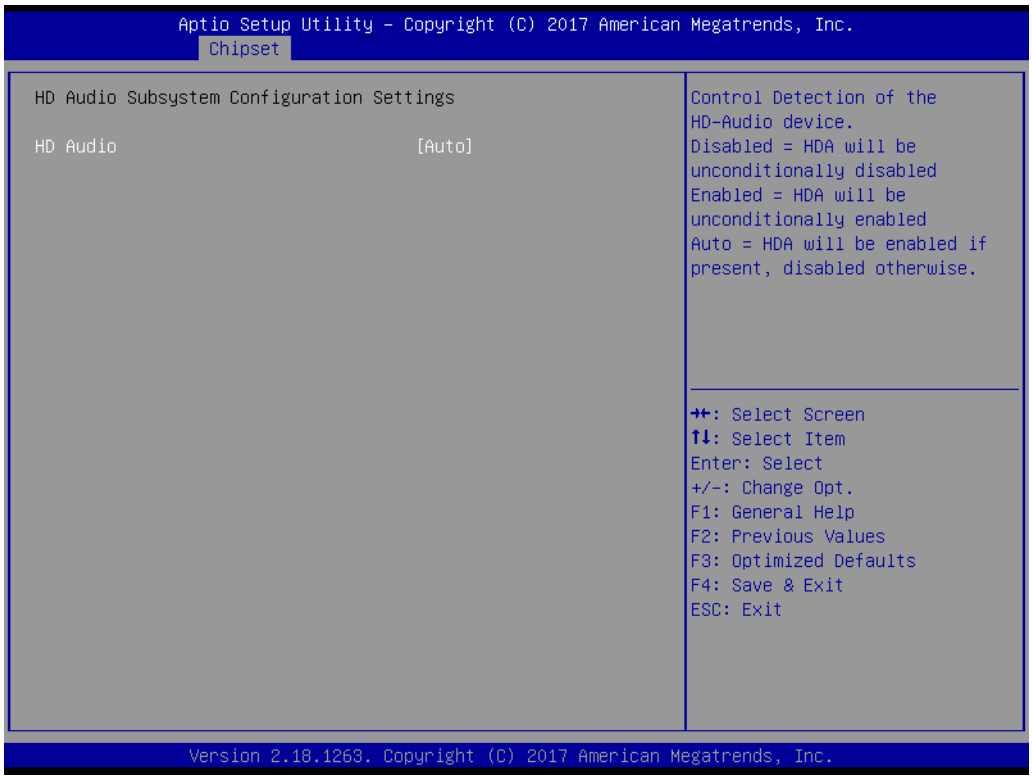

Figure 3.38 HD Audio Configuration

– **HD Audio**
Control Detection of the HD-Audio device.
Disabled= HDA will be unconditionally disabled
Enabled= HDA will be unconditionally enabled
Auto= HDA will be enabled if present, disabled otherwise.

SCS Configuration

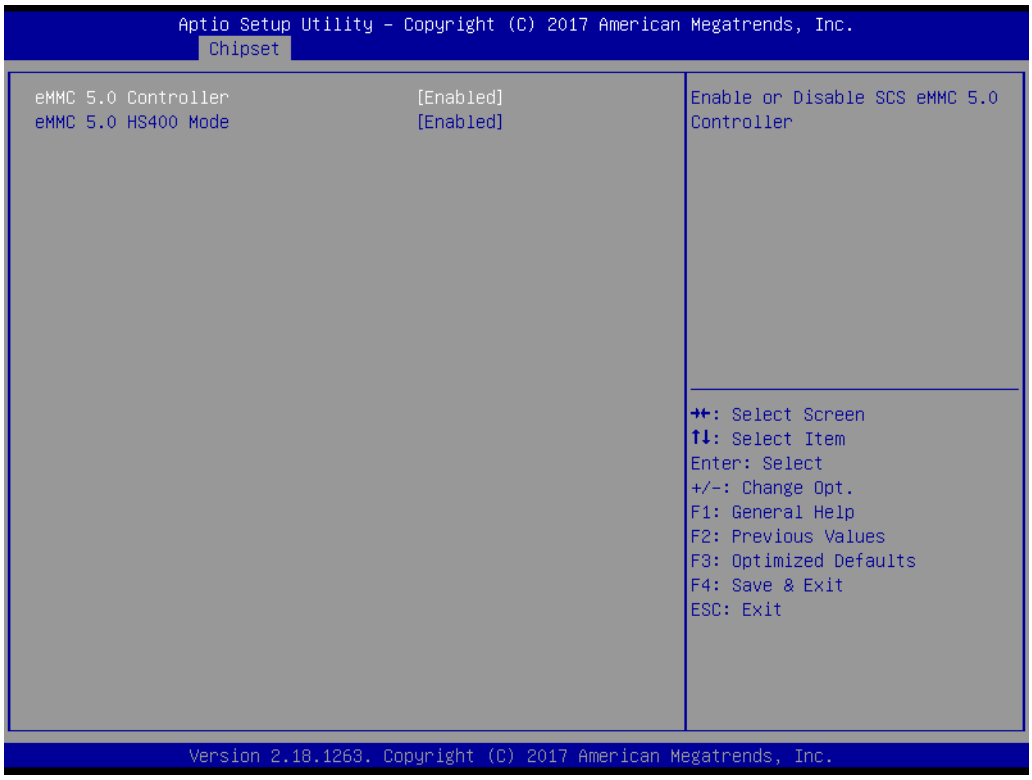

Figure 3.39 SCS Configuration

- **eMMC 5.0 Controller**
  Enable or Disable SCS eMMC 5.0 Controller
- **eMMC 5.0 HS400 Mode**
  Enable or Disable SCS eMMC 5.0 HS400 Controller

SB Porting Configuration

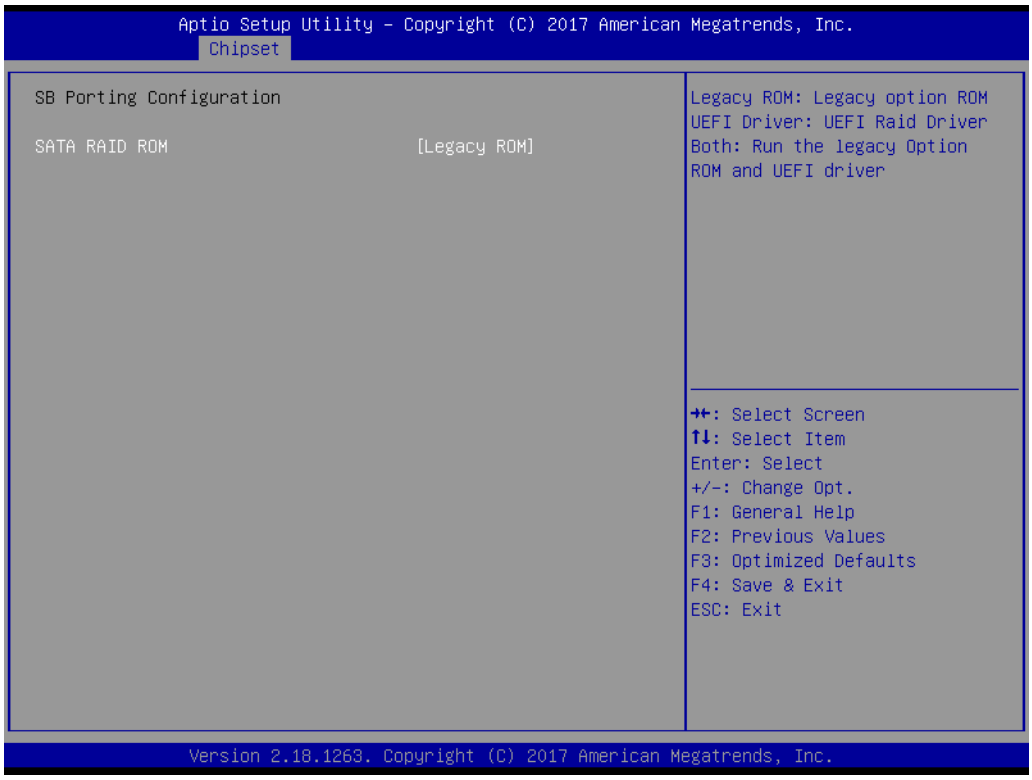

Figure 3.40 SB Porting Configuration

– **SATA RAID ROM**
Legacy ROM: Legacy option ROM
UEFI Driver: UEFI Raid Driver
Both: Run the legacy Option ROM and UEFI driver.

3.1.4 Security Setting

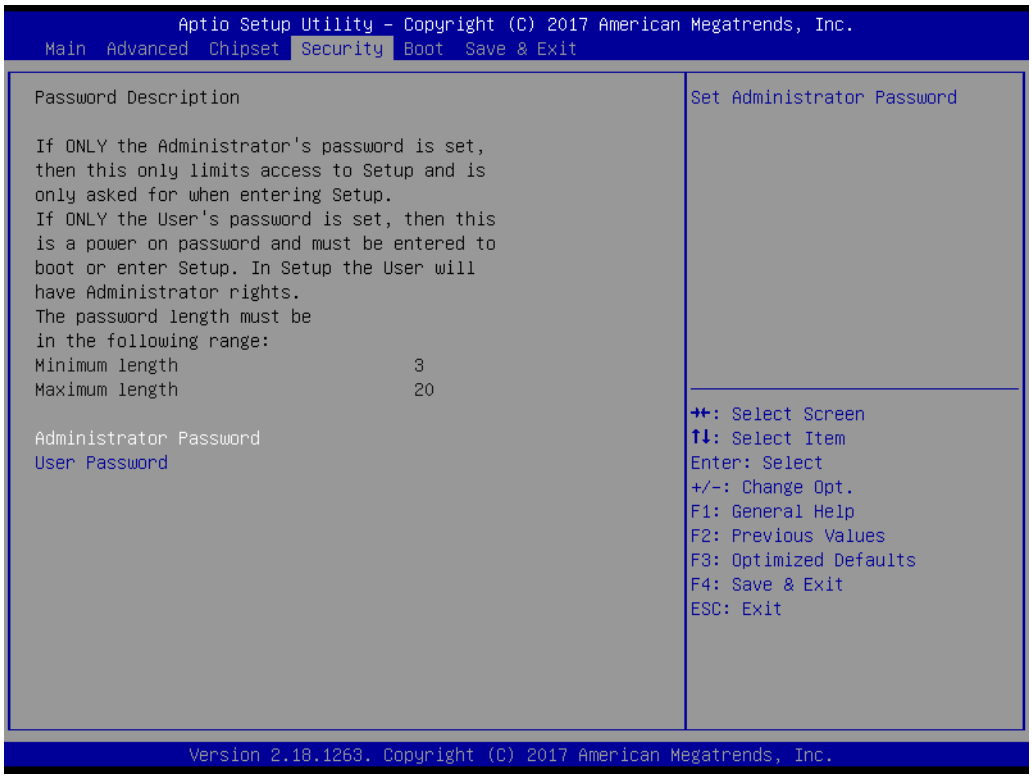

Figure 3.41 Security Setup

Select Security Setup from the SOM-6898 Setup main BIOS setup menu. All Security Setup options, such as password protection is described in this section. To access the sub menu for the following items, select the item and press <Enter>:

Change Administrator / User Password: Select this option and press <ENTER> to access the sub menu, and then type in the password.

3.1.5 Boot Settings

Figure 3.42 Boot Settings

- **Setup Prompt Timeout**
  This item allows users to select the number of seconds to wait for setup activation key.
  Number of seconds to wait for setup activation key.
  65535(0xFFF) means indefinite waiting.
- **Bootup NumLock State**
  Select the keyboard NumLock state
- **Quiet Boot**
  Enable/Disables Quiet Boot option.
- **Fast Boot**
  Enables or disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.
- **New Boot Option Policy**
  Controls the placement of newly detected UEFI boot options.

3.1.6 Save & Exit

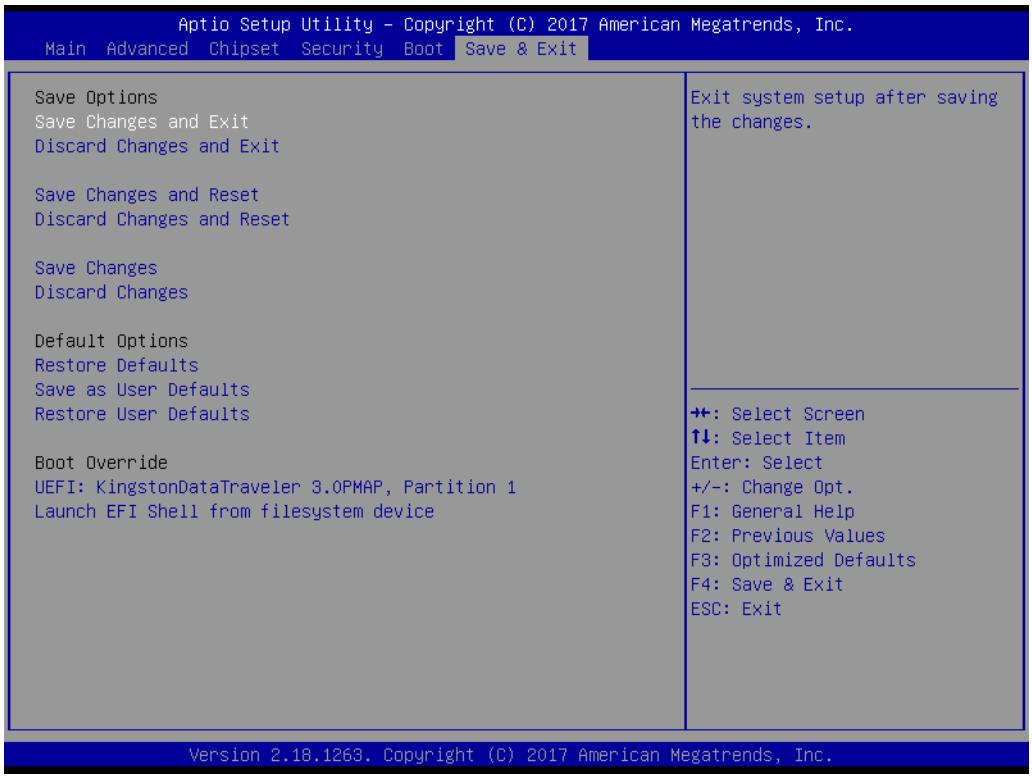

Figure 3.43 Save & Exit

- **Save Changes and Exit**

When users have completed system configuration, select this option to save changes, exit BIOS setup menu and reboot the computer if necessary to take effect all system configuration parameters.

- **Discard Changes and Exit**

Select this option to quit Setup without making any permanent changes to the system configuration.

- **Save Changes and Reset**

When users have completed system configuration, select this option to save changes, exit BIOS setup menu and reboot the computer to take effect on all system configuration parameters.

- **Discard Changes and Reset**

Select this option to quit Setup without making any permanent changes to the system configuration and reboot the computer.

- **Save Changes**

When users have completed system configuration, select this option to save changes without exit BIOS setup menu.

- **Discard Changes**

Select this option to discard any current changes and load previous system configuration.

- **Restore Defaults**

The SOM-6898 automatically configures all setup items to optimal settings when users select this option. Optimal Defaults are designed for maximum system performance, but may not work best for all computer applications. In particular, do not use

the Optimal Defaults if the user's computer is experiencing system configuration problems.

- **Save User Defaults**

When users have completed system configuration, select this option to save changes as user defaults without exit BIOS setup menu.

- **Restore User Defaults**

Restore the User Defaults to all the setup options

- **Launch EFI Shell from file system device**

This items attempts to Launch EFI Shell application (Shell.efi) from one of the available file system devices.

Chapter 4

S/W Introduction & Installation

Sections include:

- S/W Introduction
- Driver Installation
- Advantech iManager

4.1 S/W Introduction

The mission of Advantech Embedded Software Services is to "Enhance quality of life with Advantech platforms and Microsoft Windows embedded technology." We enable Windows Embedded software products on Advantech platforms to more effectively support the embedded computing community. Customers are freed from the hassle of dealing with multiple vendors (Hardware suppliers, System integrators, Embedded OS distributor) for projects. Our goal is to make Windows Embedded Software solutions easily and widely available to the embedded computing community.

4.2 Driver Installation

The Intel Chipset Software Installation (CSI) utility installs the Windows INF files that outline to the operating system how the chipset components will be configured.

4.2.1 Windows Driver Setup

To install the drivers on a windows-based OS, please connect to the internet and go to http://support.advantech.com.tw to download the drivers that you want to install and follow Driver Setup instructions to complete the installation.

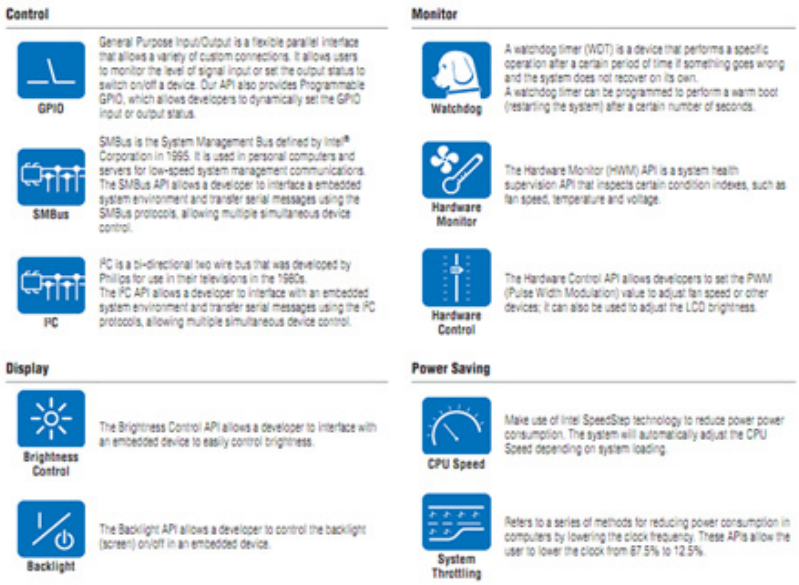
4.2.2 Other OS

To install the drivers for Linux or other OS, please connect to the internet and go to http://support.advantech.com.tw to download the setup file.

4.3 Advantech iManager

Advantech's platforms come equipped with iManager, a micro controller that provides embedded features for system integrators. Embedded features have been moved from the OS/BIOS level to the board level, to increase reliability and simplify integration.

iManager runs whether the operating system is running or not; it can count the boot times and running hours of the device, monitor device health, and provide an advanced watchdog to handle errors as they happen. iManager also comes with a secure & encrypted EEPROM for storing important security keys or other customer information. All the embedded functions are configured through the API and provide corresponding utilities to demonstrate. These APIs comply with PICMG EAPI (Embedded Application Programmable Interface) specifications and makes these embedded features easier to integrate, speed development schedules, and provide customer's with software continuity while upgrading hardware. More details of how to use the APIs and utilities, please refer to the Advantech iManager 2.0 Software API User Manual.



Appendix A

Pin Assignment

This appendix gives you the information about the hardware pin assignment of the SOM-6898 CPU System on Module.

Sections include:

- SOM-6898 Type 6 Pin Assignment

A.1 SOM-6898 Type 6 Pin Assignment

This section gives SOM-6898 pin assignment on COM Express connector which compliant with COMR.0 R2.1 Type 6 pin-out definitions. More details about how to use these pins and get design reference, please contact to Advantech for design guide, checklist, reference schematic, and other hardware/software supports.

Appendix B

Watchdog Timer

This appendix gives you the information about the watchdog timer programming on the SOM-6898 CPU System on Module.

Sections include:

- Watchdog Timer Programming

B.1 Programming the Watchdog Timer

Trigger Event	Note
IRQ	(BIOS setting default disable)**
NMI	N/A
SCI	Power button event
Power Off	Support
H/W Restart	Support
WDT Pin Activate	Support

** WDT new driver support automatically selects available IRQ number from BIOS, and then sets EC. Only Win 10 supports it.

In other OS, it will still use IRQ number from BIOS setting as usual.

For details, please refer to *iManager & Software API User Manual*:

Appendix C

Programming GPIO

This Appendix gives the illustration of the General Purpose Input and Output pin setting.

Sections include:

- System I/O Ports

C.1 GPIO Register

GPIO Byte Mapping	H/W Pin Name
BIT0	GPO0
BIT1	GPO1
BIT2	GPO2
BIT3	GPO3
BIT4	GPI0
BIT5	GPI1
BIT6	GPI2
BIT7	GPI3

For details, please refer to *iManager & Software API User Manual*.

Appendix D

System Assignments

This appendix gives you the information about the system resource allocation on the SOM-6898 CPU System on Module.

Sections include:

- System I/O ports
- Interrupt Assignments
- 1st MB Memory Map

D.1 System I/O Ports

Table D.1: System I/O ports

Addr.Range(Hex)	Device
0000-0CF7	PCI Express Root Complex
0020-0021	Programmable interrupt controller
0024-0025	Programmable interrupt controller

D.2 Interrupt Assignments

Table D.2: Interrupt Assignments	
Interrupt#	**Interrupt Source**
IRQ 0	System Timer
IRQ 1	Standard PS/2 Keyboard
IRQ 3	Communications Port (COM2)
IRQ 4	Communications Port (COM1)
IRQ 5	Communications Port (COM4)
IRQ 6	Communications Port (COM3)
IRQ 7	Printer Port(LPT1)
IRQ 8	System CMOS/real time clock
IRQ 11	Mobile 6th/7th Generation Intel(R) Processor Family I/O Thermal subsystem - 9D31
IRQ 11	Mobile 6th/7th Generation Intel(R) Processor Family I/O SMBUS - 9D23
IRQ 12	Microsoft PS/2 Mouse
IRQ 14	Motherboard resources
IRQ 54~511	Microsoft ACPI-Compliant System
IRQ 16	High Definition Audio Controller
IRQ 20	Intel(R) Serial IO UART Host Controller – 9D27
IRQ 21	Mobile 6th/7th Generation Intel(R) Processor Family I/O SCC: eMMC – 9D2B
IRQ FFFFFFFA(-6)	Intel(R) Management Engine Interface
IRQ FFFFFFFB(-5)	Intel(R) USB 3.0 eXtensible Host Controller – 1.0(Microsoft)
IRQ FFFFFFFC(-4)	Intel(R) HD Graphics 620
IRQ FFFFFFFD(-3)	Intel(R) Ethernet Connection I219-V
IRQ FFFFFFFE(-2)	Standard SATA AHCI Controller

D.3 1st MB Memory Map

Table D.3: 1st MB Memory Map

Addr. Range (Hex)	Device
0x000A0000-0x000BFFFF	PCI Express Root Complex
0x90000000-0xDFFFFFFF	PCI Express Root Complex
0xC0000000-0xCFFFFFFF	Intel(R) HD Graphics 620
0xDE000000-0xDEFFFFFF	Intel(R) HD Graphics 620
0xDF000000-0xDF01FFFF	Intel(R) I210 Ethernet Connection I219-V
0xDF020000-0xDF02FFFF	High Definition Audio Controller
0xDF030000-0xDF03FFFF	Intel(R) USB 3.0 eXtensible Host controller
0xDF040000-0xDF043FFF	High Definition Audio Controller
0xDF044000-0xDF047FFF	Mobile 6th Generation Intel(R) Processor Family I/O PMC - 9D21
0xDF048000-0xDF049FFF	Standard SATA AHCI Controller
0xDF04A000-0xDF04A0FF	Mobile 6th/7th Generation Intel(R) Processor Family I/O SMBUS - 9D23
0xDF04B000-0xDF04BFFF	Mobile 6th/7th Generation Intel(R) Processor Family I/O SCC:eMMC – 9D2B
0xDF04B000-0xDF04BFFF	Mobile 6th/7th Generation Intel(R) Processor Family I/O SCC:SDCard – 9D2D
0xDF04D000-0xDF04D7FF	Standard SATA AHCI Controller
0xDF04E000-0xDF04E0FF	Standard SATA AHCI Controller
0xDF050000-0xDF050FFF	Mobile 6th/7th Generation Intel(R) Processor Family I/O Thermal subsystem - 9D31
0xDFFE0000-0xDFFFFFFF	Motherboard resources
0xE0000000-0xEFFFFFFF	Motherboard resources
0xFD000000-0xFDABFFFF	Motherboard resources
0xFD000000-0xFE7FFFFF	PCI Express Root Complex
0xFDAC0000-0xFEACFFFF	Motherboard resources
0xFDAD0000-0xFEADFFFF	Motherboard resources
0xFDAE0000-0xFEAEFFFF	Motherboard resources
0xFDAF0000-0xFEAFFFFF	Motherboard resources
0xFDB00000-0xFDFFFFFF	Motherboard resources
0xFE000000-0xFE01FFFF	Motherboard resources
0xFE028000-0xFE028FFF	Motherboard resources
0xFE029000-0xFE029FFF	Motherboard resources
0xFE036000-0xFE03BFFF	Motherboard resources
0xFE03D000-0xFE3FFFFF	Motherboard resources
0xFE40E000-0xFE40EFFF	Intel(R) Management Engine Interface
0xFE40F000-0xFE40FFFF	Intel(R) Serial IO UART Host Controller – 9D27
0xFE410000-0xFE7FFFFF	Motherboard resources
0xFED00000-0xFED003FF	High precision event timer
0xFED10000-0xFED17FFF	Motherboard resources
0xFED18000-0xFED18FFF	Motherboard resources
0xFED19000-0xFED19FFF	Motherboard resources
0xFED20000-0xFED3FFFF	Motherboard resources
0xFED45000-0xFED8FFFF	Motherboard resources

Table D.3: 1st MB Memory Map	
0xFED90000-0xFED93FFF	Motherboard resources
0xFEE00000-0xFEEFFFFF	Motherboard resources
0xFF000000-0xFFFFFFFF	Legacy device
0xFF000000-0xFFFFFFFF	Motherboard resources
