# Warning!

---

This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions manual, it may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.

Electric Shock Hazard – Do not operate the machine with its back cover removed. There are dangerous high voltages inside.

## Caution

**Risk of explosion if the battery is replaced with an incorrect type.**

**Batteries should be recycled where possible. Disposal of used batteries must be in accordance with local environmental regulations.**

## Packing List

Accessories (as ticked) included in this package are:
<input type="checkbox"/> Adaptor
<input type="checkbox"/> Driver & manual CD disc
<input type="checkbox"/> Other. _____ (please specify)

## Safety Precautions

Follow the messages below to prevent your systems from damage:

- ◆ Avoid your system from static electricity on all occasions.
- ◆ Prevent electric shock. Don't touch any components of this card when the card is power-on. Always disconnect power when the system is not in use.
- ◆ Disconnect power when you change any hardware devices. For instance, when you connect a jumper or install any cards, a surge of power may damage the electronic components or the whole system.

# Getting Started

## 1.1 Features

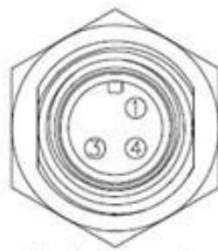

- 15"~23.8" Fanless Stainless Steel Panel PC
- 12th /13th Gen. Intel® Core i3/i5 BGA type Processors
- True Flat Front Bezel Design and Grade 304 Stainless Steel Enclosure (Grade 316 for Option)
- Support Projective capacitive touch/Resistive touch window
- Touch on/off Button on the Side Edge for Hygienic Cleaning
- Totally IP66/IP69K for meet indoor/semi-outdoor waterproof applications
- M12 Connectors with waterproof caps
- 9~36V DC wide-ranging power input
- Support Ergonomic Versatile Mounting: Yoke Mounting / VESA Mounting

## 1.5 Brief Description of VITAM-9XXD Series

There are 15", 15.6", 17", 19", 21.5", and 23.8" new generation adopt the SUS304 grade stainless steel housing (SUS316 grade for option) panel PC in VITAM-9XXD series, which comes with 100% dust and waterproof guarantee, and the all-in-one fanless design. It is powered by 12<sup>th</sup>/13<sup>th</sup> Gen. Intel Core i3-1215U/i5-1235U and i3-1315UE/i5-1335UE processor, 2 x SO-DIMM up to 64GB DDR4 3200MHz memory, and 1 x M.2 M-Key 2280 space for storage. VITAM-9XXD series is wide range DC 9~36V power input and IP66/IP69K rated with M12 connectors. Furthermore, the models support resistive touch and projected capacitive touch for option, and can be high brightness LCD and optical bonding designed for option. It supports touch on/off button on the side edge for hygienic cleaning and ergonomic versatile mounting: Yoke mounting and space-saving VESA mounting.

## 2. DDR4 1,DDR4 2:

**(SO-DIMM 260Pin slot) DDR4 memory socket**, the socket is located at the top of the board and supports 260Pin 1.2V DDR4 SO-DIMM memory module up to 64GB.

Max Memory Size (dependent on memory type).

## 3. VBAT1:

(1.25mm Pitch 1x2 wafer Pin Header) 3.0V Li battery is embedded to provide power for CMOS.

Pin#	Signal Name
Pin1	VCC_RTC
Pin2	GND

## 4. CLR\_CMOS1:

CMOS clear switch, CMOS clear operation will permanently reset old BIOS settings to factory defaults.

### **Procedures of CMOS clear:**

- Turn off the system and unplug the power cord from the power outlet.
- To clear the CMOS settings, close CLR\_CMOS1 for 1 second
- Power on the system again.
- When entering the POST screen, press the <DEL> key to enter CMOS Setup Utility to load optimal defaults.
- After the above operations, save changes and exit BIOS Setup.

## 5. CPU\_FAN1:

(1.25mm Pitch 1x2 wafer Pin Header) Fan connector, cooling fans can be connected directly for use.

Pin#	Signal Name
1	GND
2	VCC(5V_S0)

Note:

Output power of cooling fan must be limited under 3W.

#### 6. DC IN1:

(5.08mm Pitch 1x2 Pin Connector) DC9~36V System power input connector.

Pin#	Power Input
Pin1	DC_IN+ (DC+9V~36V)
Pin2	DC_IN- (Ground)

## **Chapter 4                      Installation of Drivers**

---

This chapter describes the installation procedures for software and drivers under the windows 10. The software and drivers are included with the motherboard. The contents include Intel Chipset, Graphics chipset driver, Audio driver, LAN driver and Intel® management engine interface. The instructions are as below.

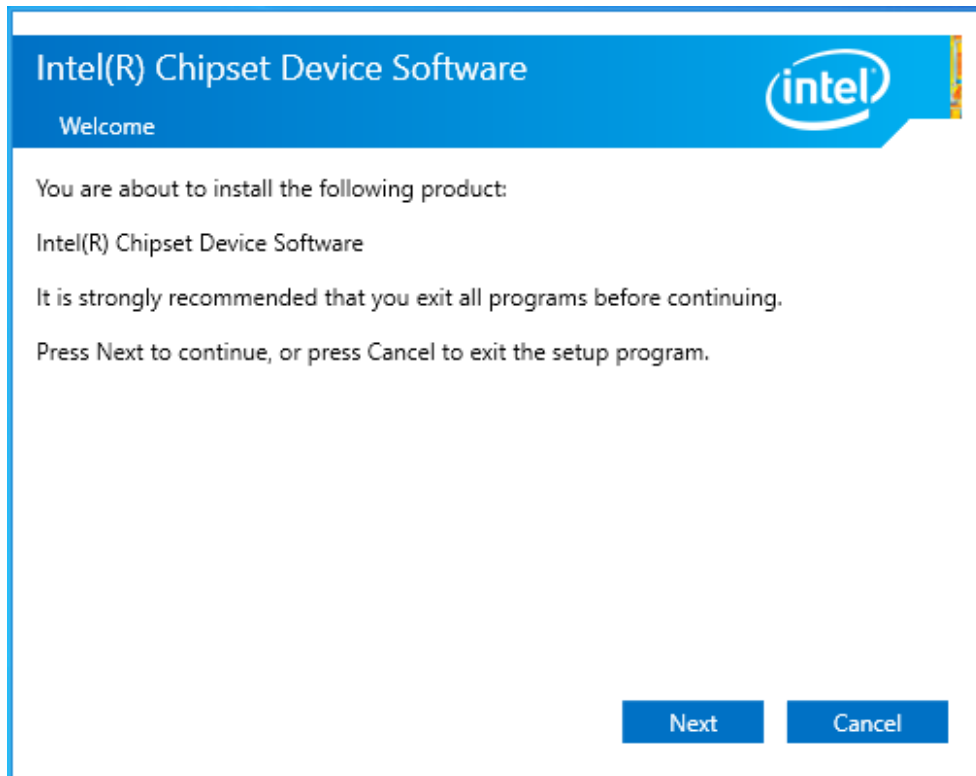

**Important Note:**

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the installation of

## 4.1 Intel Chipset

To install the Intel chipset driver, please follow the steps below.

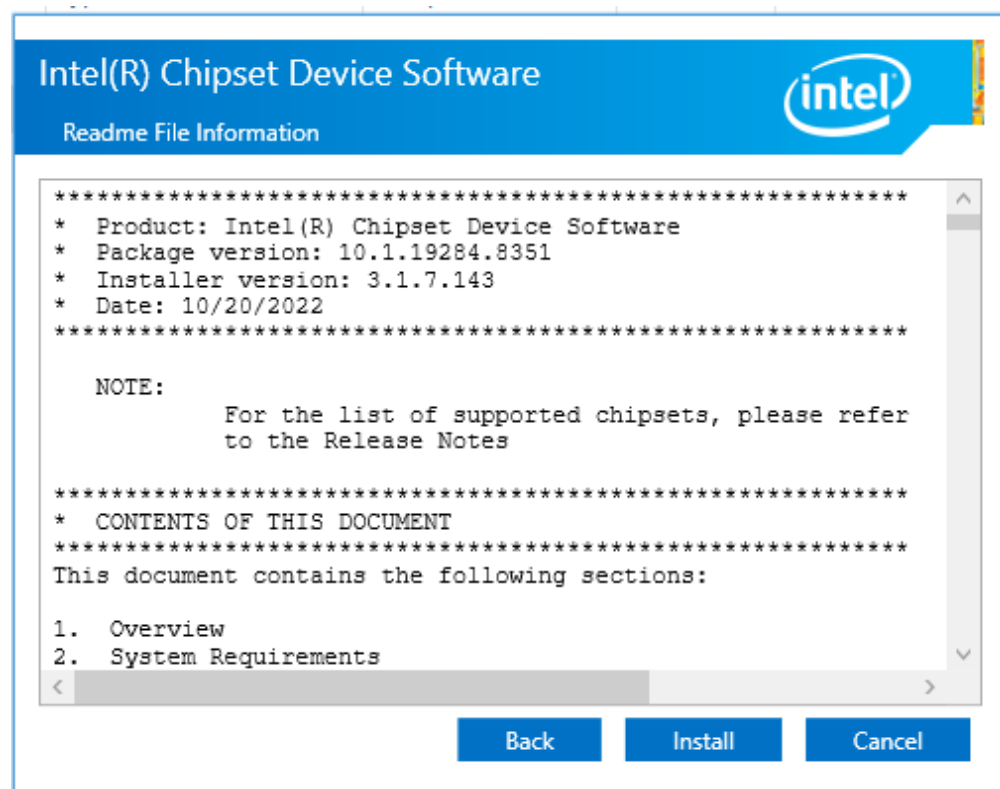

Step 1. Here is welcome page. Please make sure you save and exit all programs before install. Click **Next**.

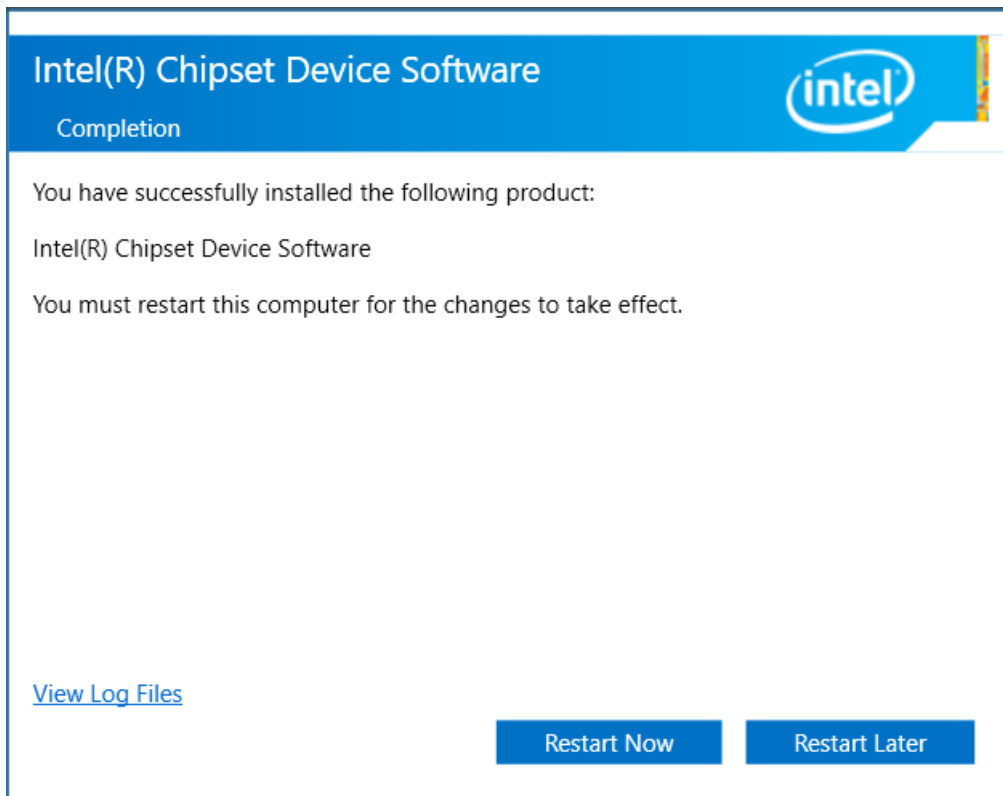

Step 2. Read the license agreement. Click **Accept** to accept all of the terms of the license agreement.

Step 3. Click **Install** to begin the installation.

Step 4. Select **Restart Now** to reboot your computer for the changes to take effect.

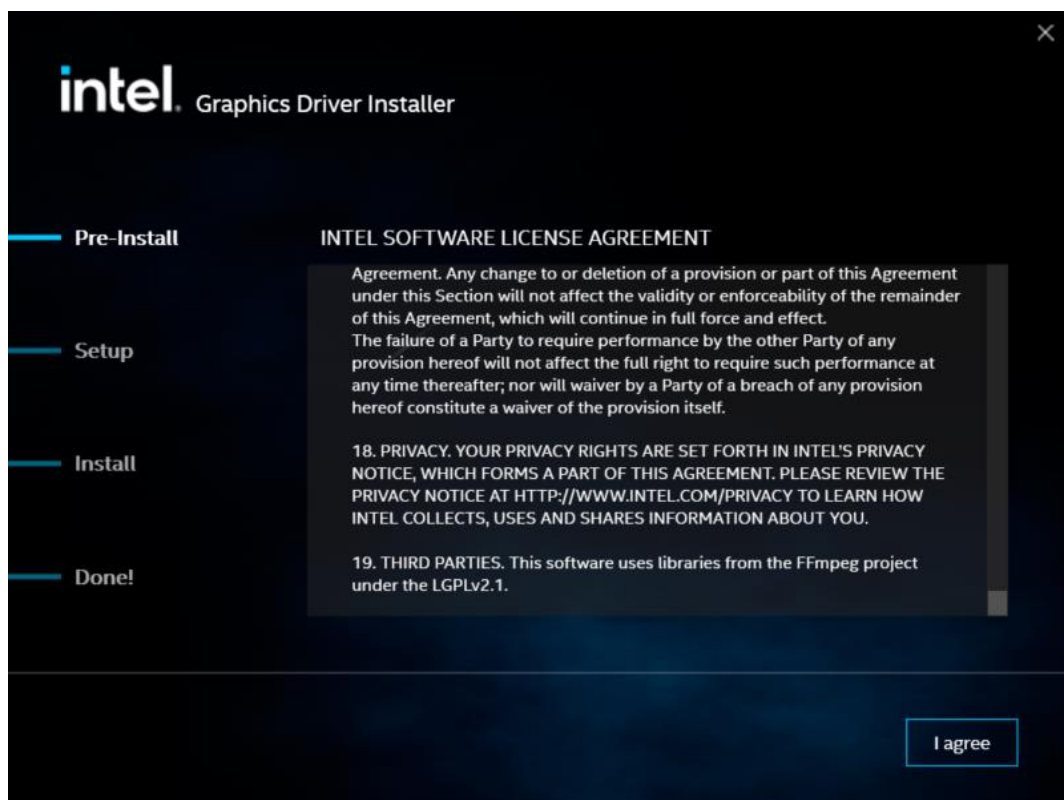

## 4.2 Intel® HD Graphics Chipset

To install the Intel® HD Graphics Chipset, please follow the steps below.

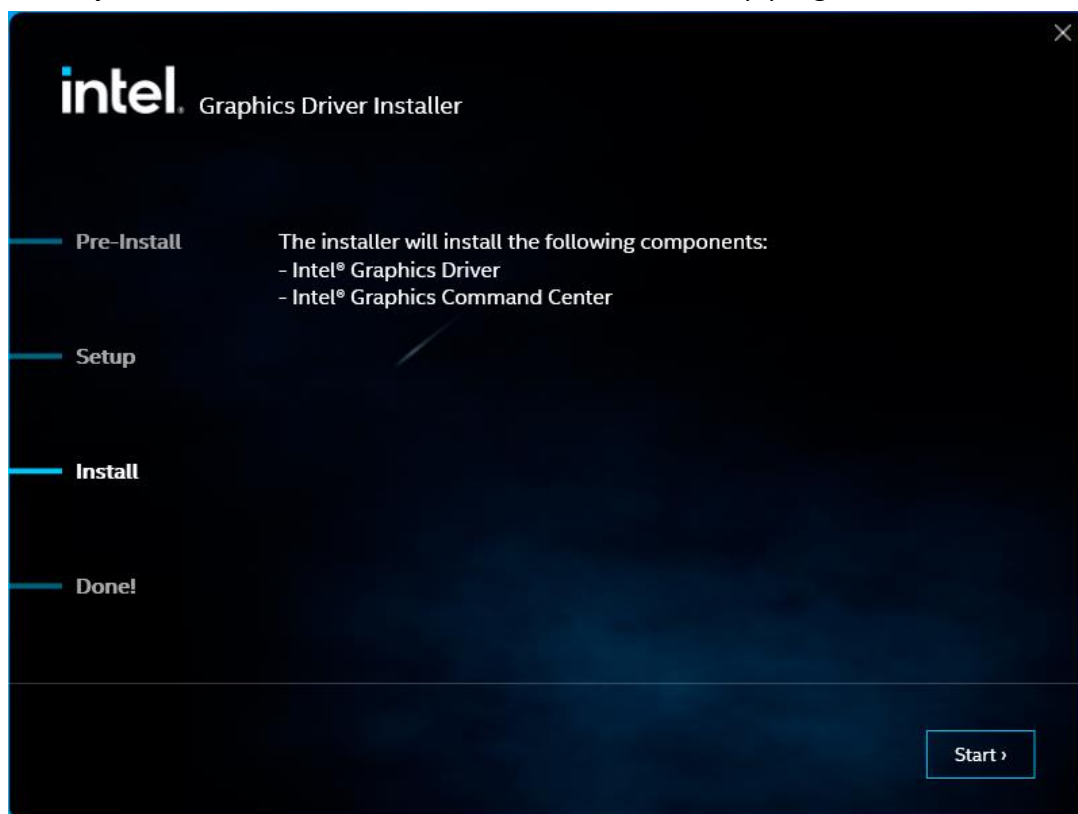

**Step 1.** Click **Begin installation**.

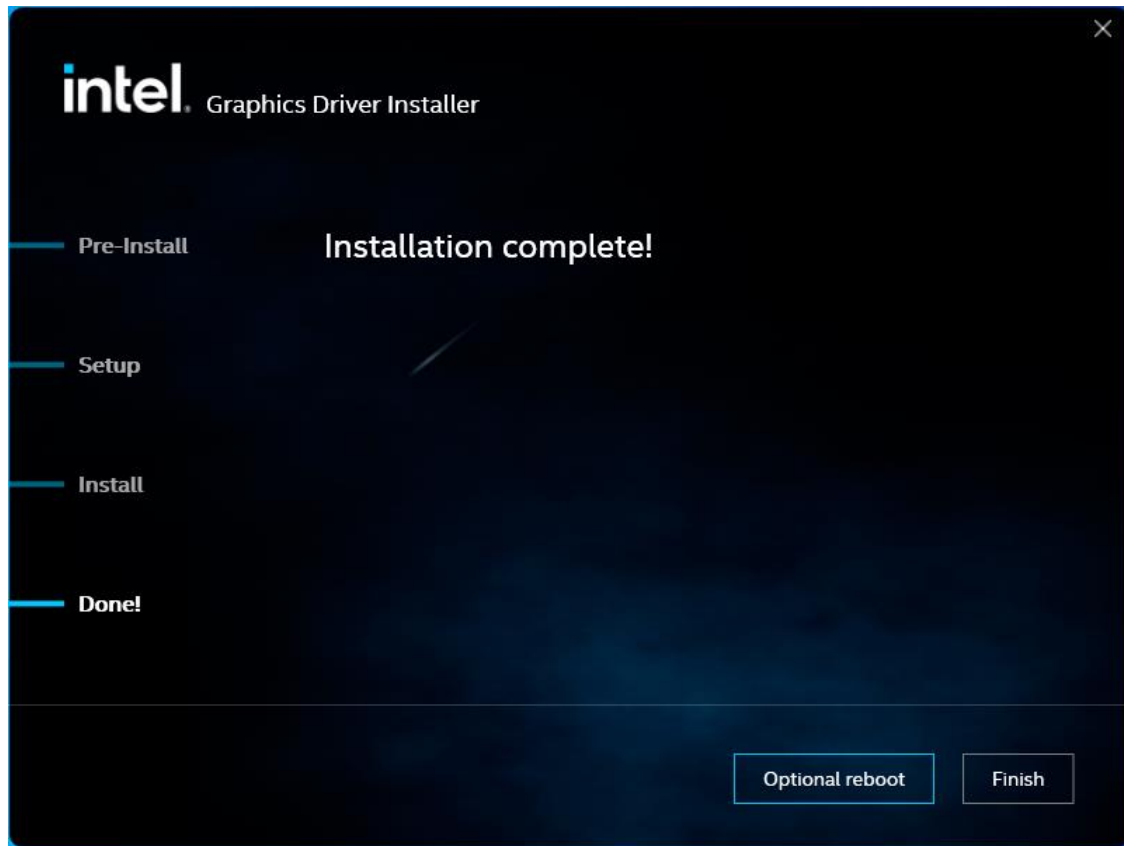

**Step 2.** Read the license agreement. Click **I agree** to accept all the terms of the license agreement.

**Step 3.** Choose **Install** function and Click **Start** to setup program.

**Step 4.** Click **Finish** to complete installation.

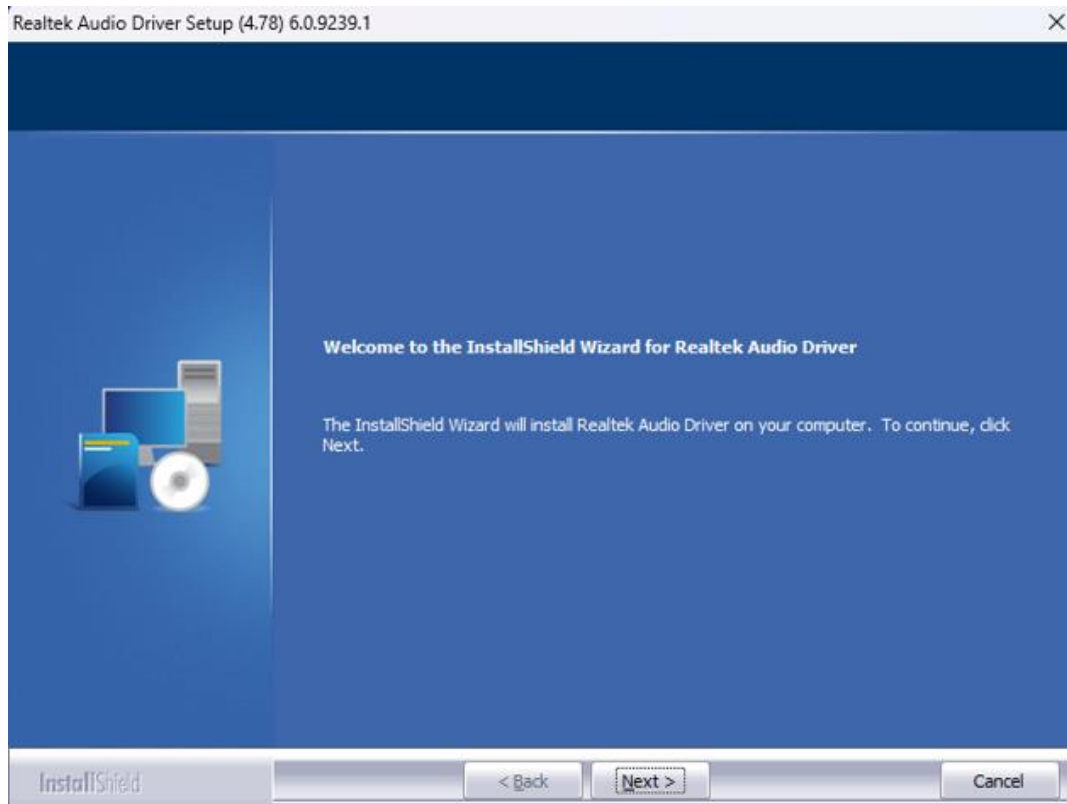

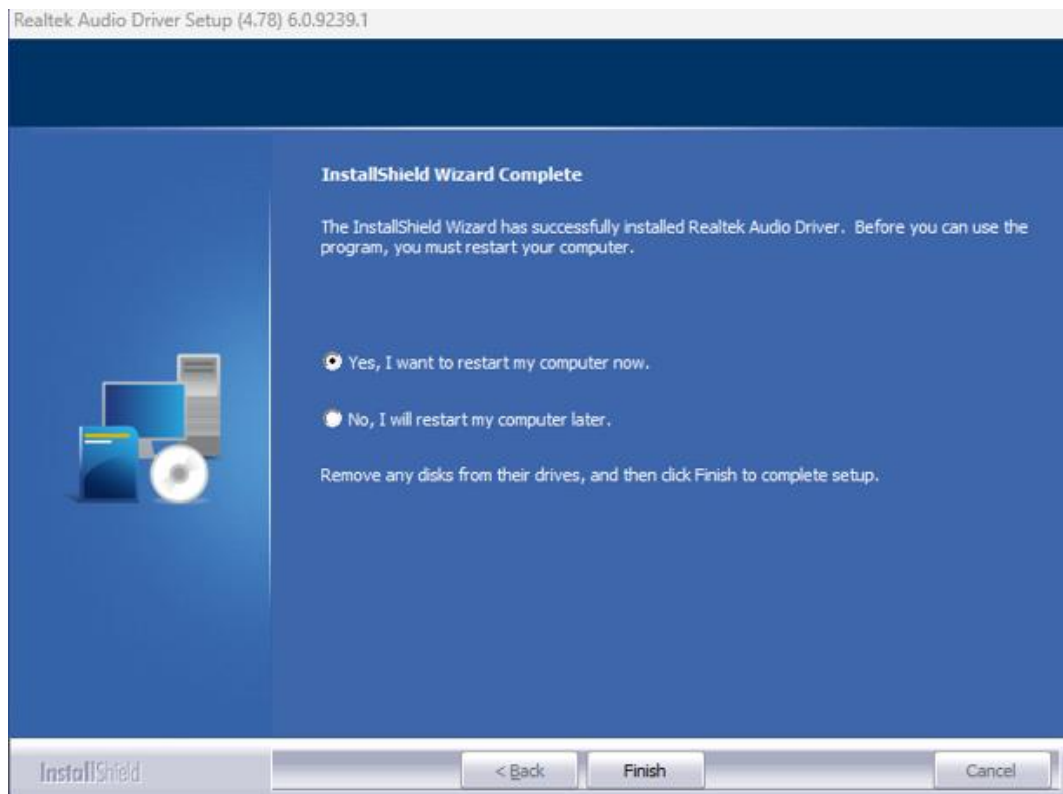

## 4.3 Audio Chipset

To install the Realtek HD Audio Driver, please follow the steps below.

**Step 1.** Click **Next** to continue.

**Step 2.** Click **Yes, I want to restart my computer now.** Click **Finish** to complete the installation.

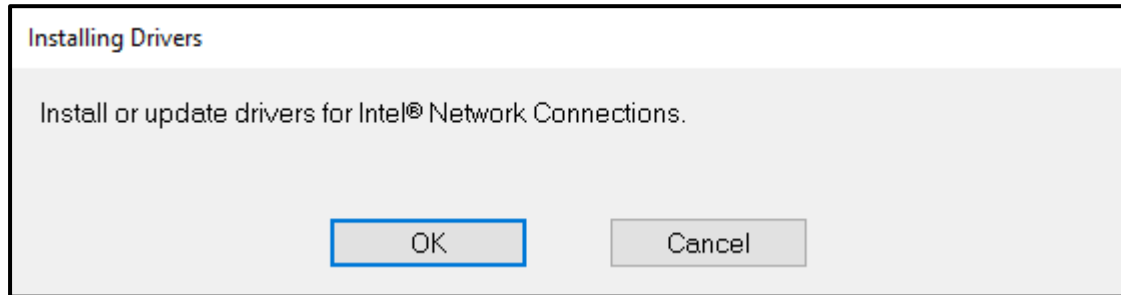

## 4.4 I LAN Driver

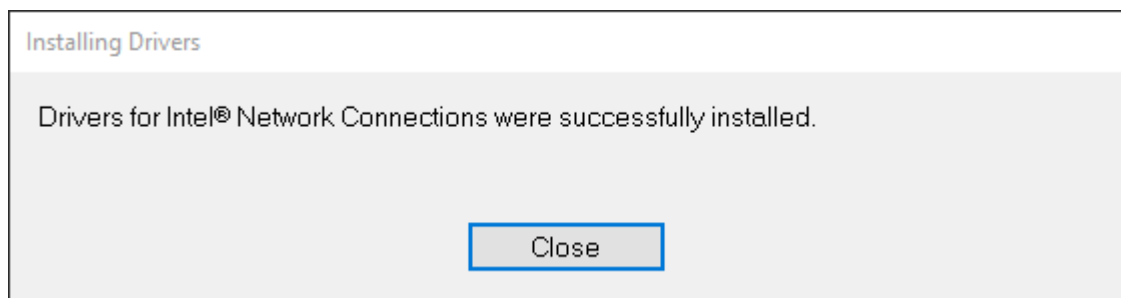

To install the LAN driver, please follow the steps below.

**Step 1.** Click **Zip File** to continue.

**Step 2.** Click **OK** to begin the installation.

**Step 3.** Click **Close** to finish installation.

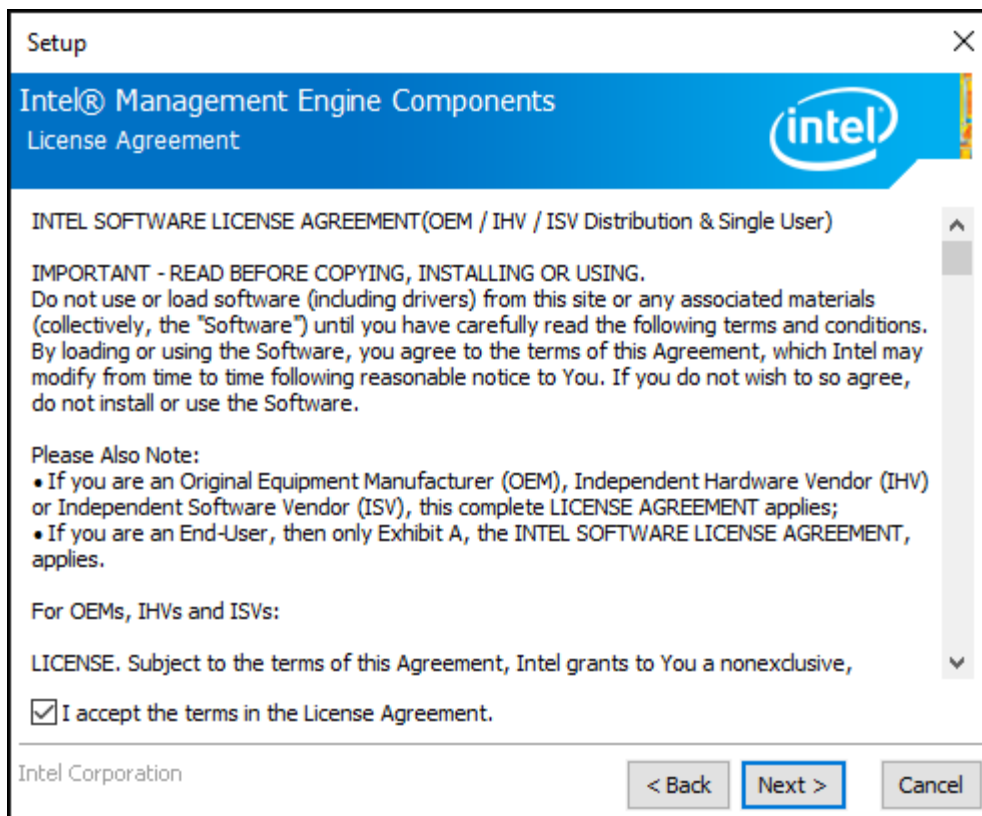

## 4.5 Intel® Management Engine Interface

To install the Intel® Management Engine Interface, please follow the steps below.

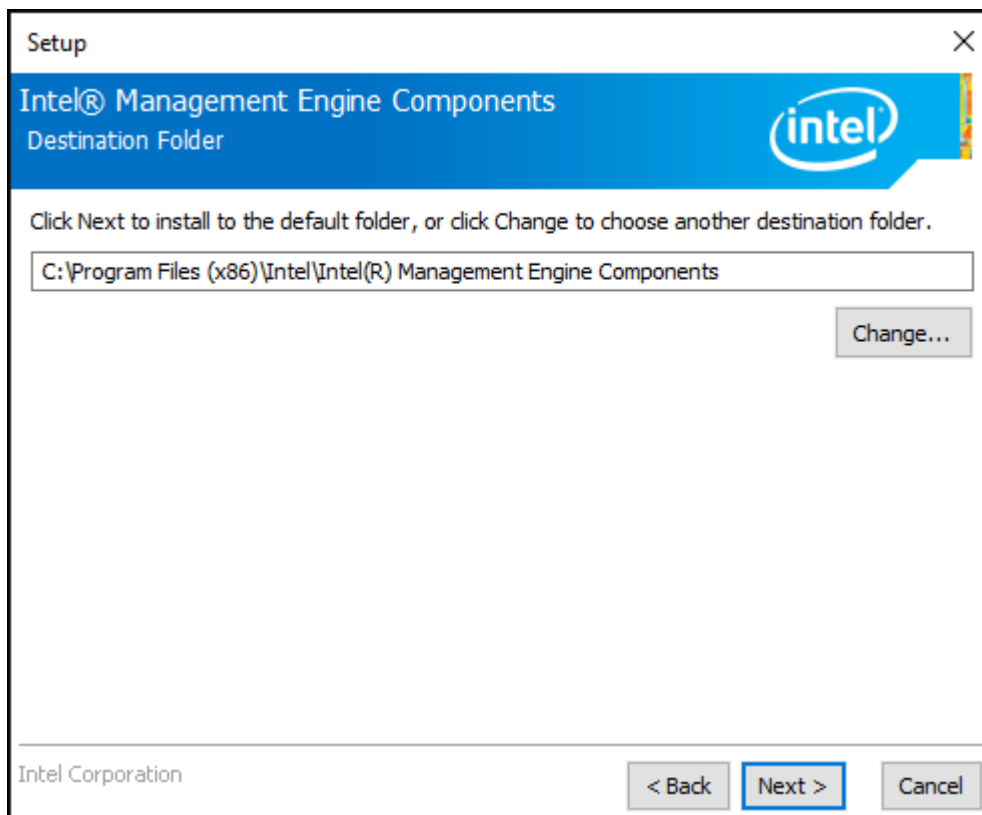

**Step 1.** Select setup language you need. Click **Next** to continue.

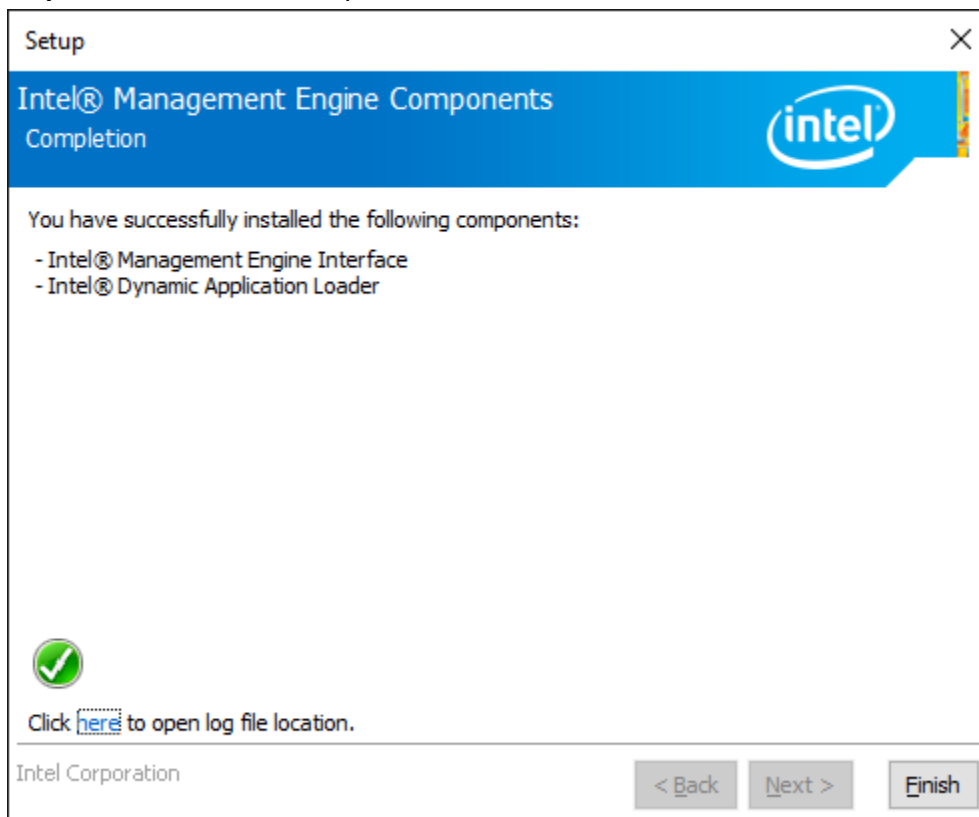

**Step 2.** Choose **I accept the terms in the License Agreement** and click **Next** to begin the installation.

**Step 3.** Click **Next** to continue.

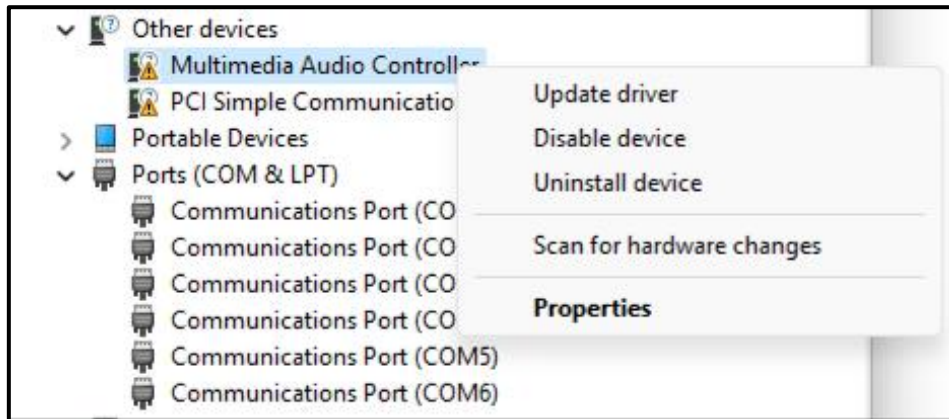

**Step 4.** Click **Finish** to complete the installation.

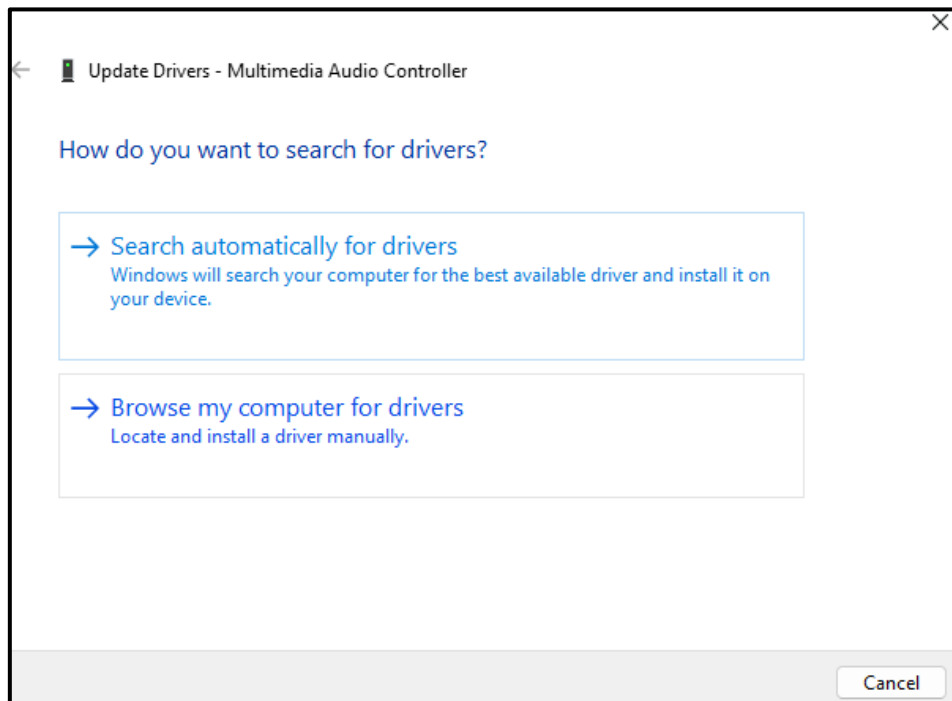

## 4.6 Intel® Speed Select Technology

To install the Intel® Speed Select Technology, please follow the steps below.

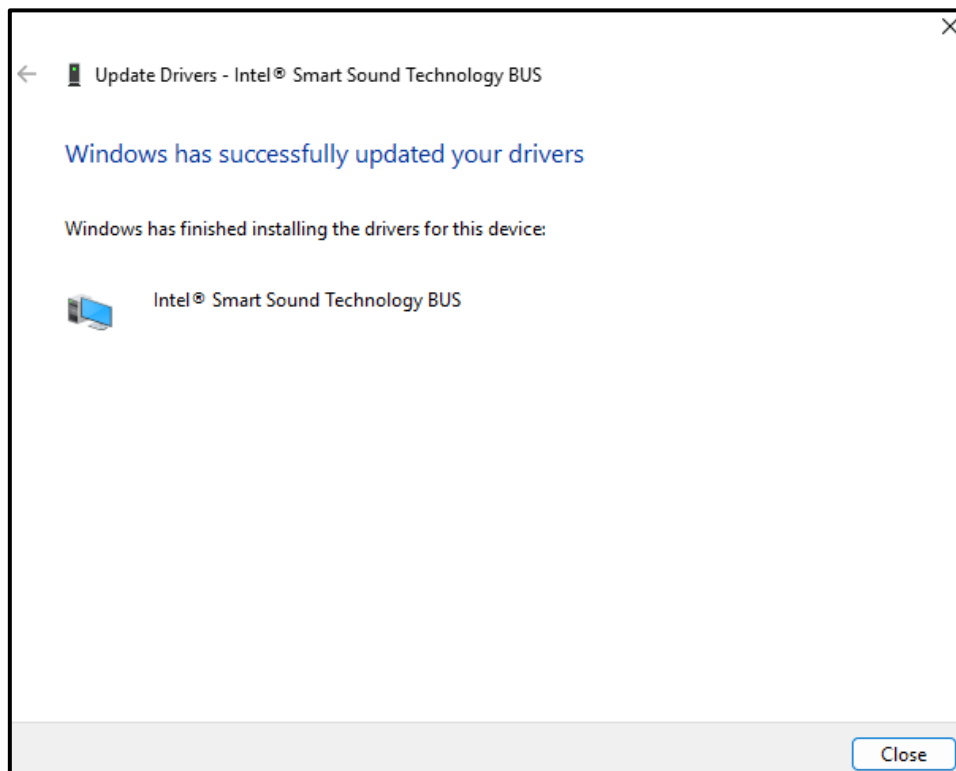

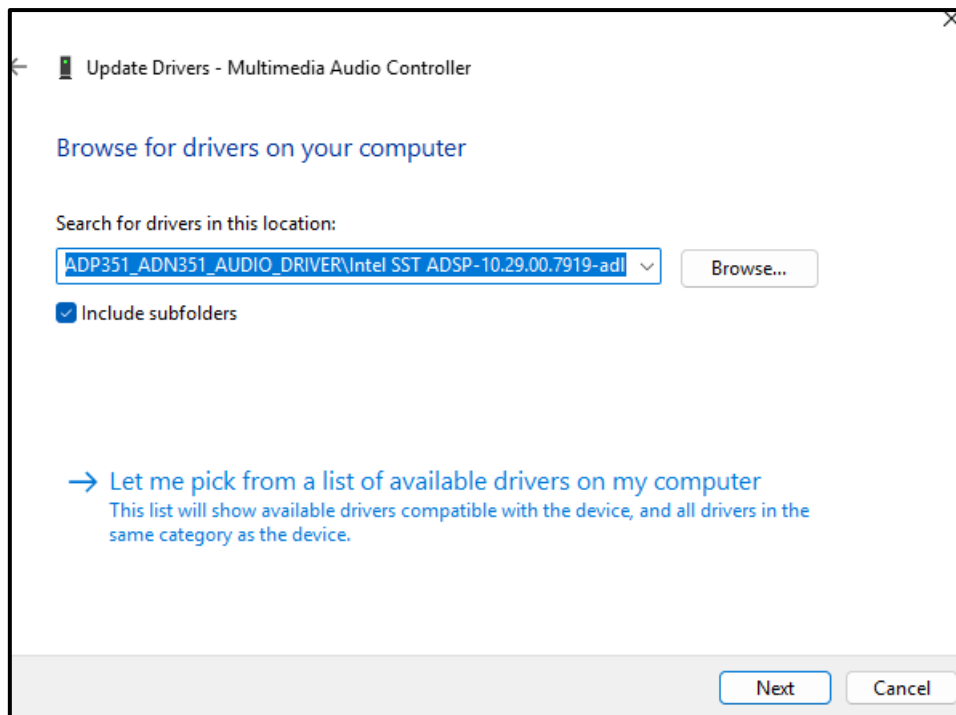

**Step 1.** Enable Device Manager under Window and you could see there are exclamation mark on Audio Control, please right click you mouse and pop up an property window, then select “update driver”

**Step 2.** Select “Browse my computer for drivers” then select driver from your driver folder then install it.

## 4.7 Resistive Touch Screen Installation

This chapter describes how to install drivers and other software that will allow your Resistive touch screen work with different operating systems.

### 4.7.1 Windows 10 Universal Driver Installation for PenMount 6000 Series

Before installing the Windows 10 driver software, you must have the Windows 10 system installed and running on your computer. You must also have one of the following PenMount 6000 series controller or control boards installed: PM6500, PM6300.

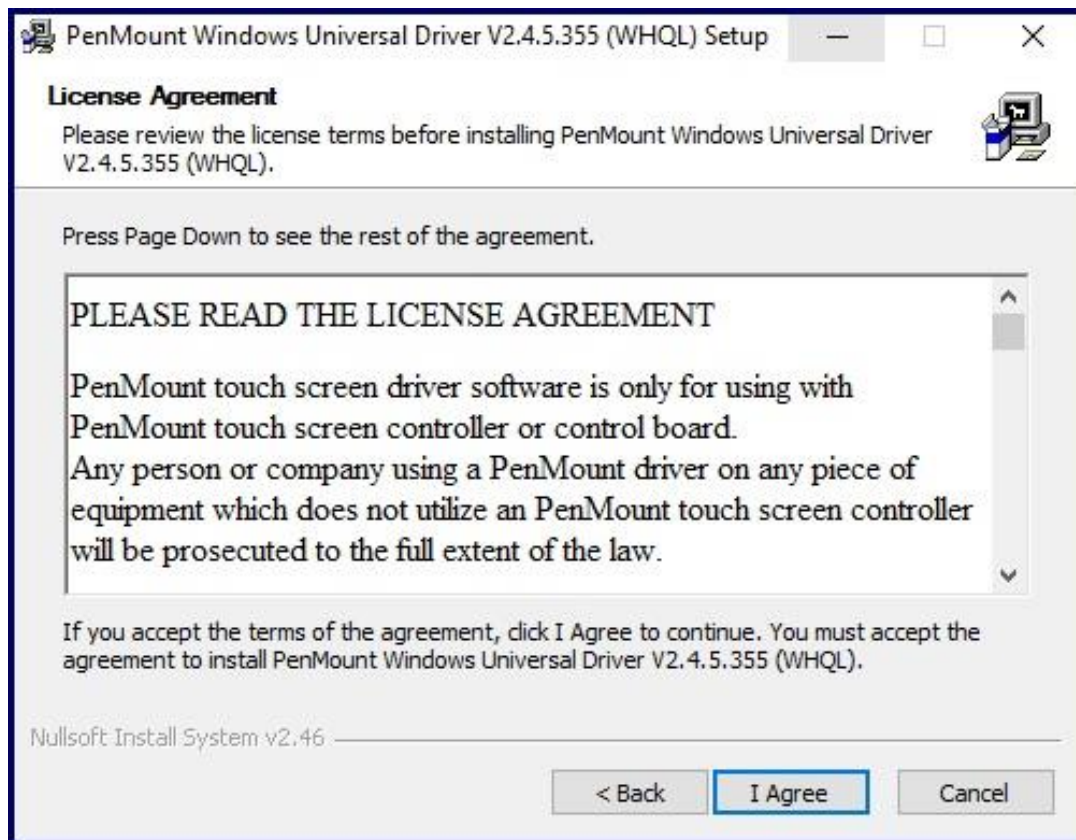

### Resistive Touch

If you have an older version of the PenMount Windows 7 driver installed in your system, please remove it first. Follow the steps below to install the PenMount DMC6000 driver.

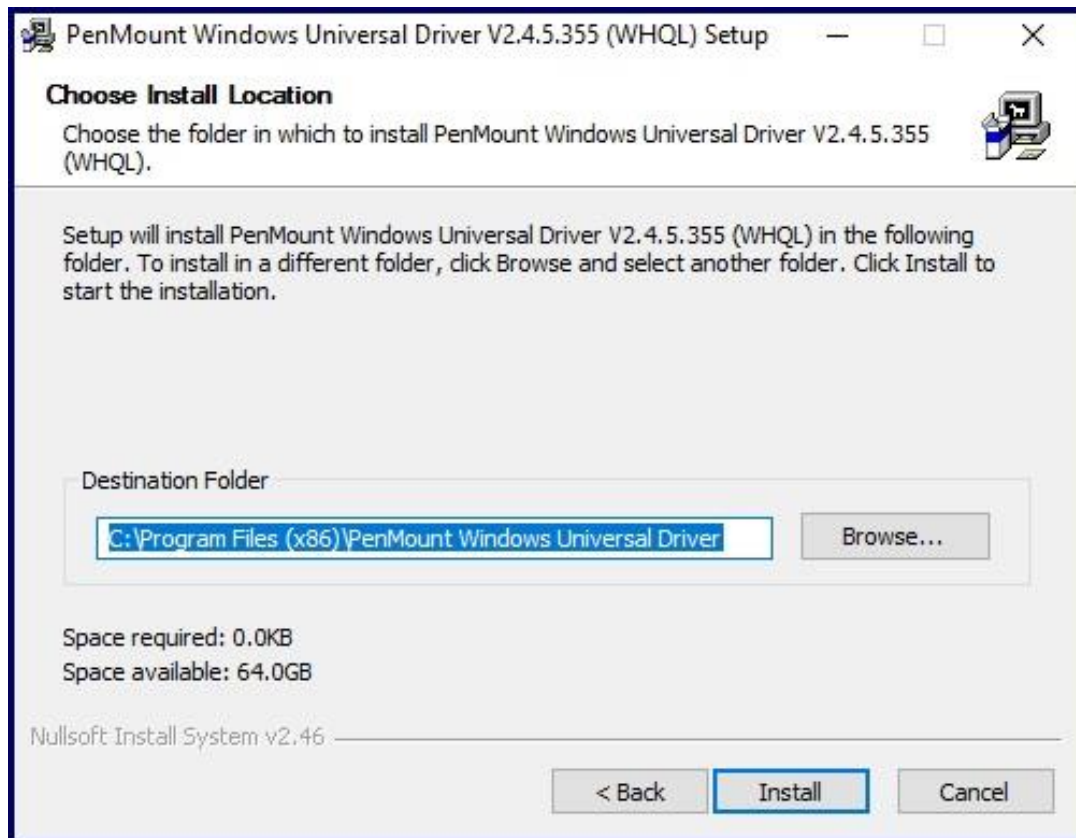

**Step 1.** Click **Next** to continue.

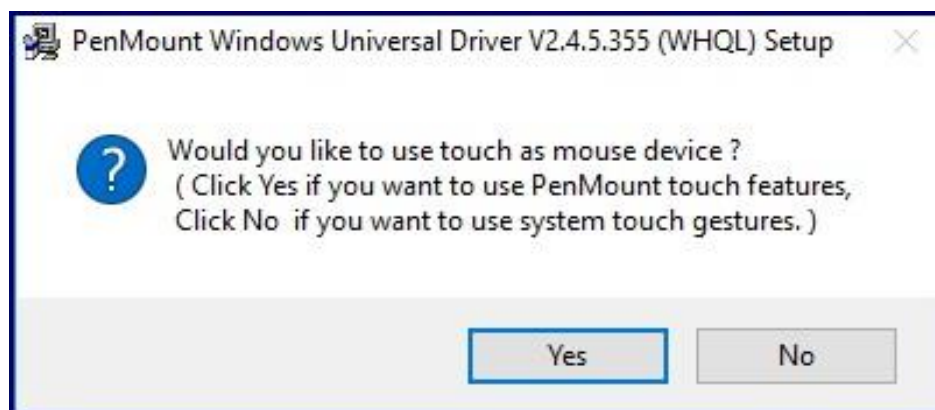

**Step 2.** Read the license agreement. Click **I Agree** to agree the license agreement.

**Step 3.** Choose the folder in which to install PenMount Windows Universal Driver. Click **Install** to start the installation.

**Step 4.** Click **Yes** to continue.

**Step 5.** Click **Finish** to complete installation.

## 4.7.2 Software Functions

### Resistive Touch

Upon rebooting, the computer automatically finds the new 6000 controller board. The touch screen is connected but not calibrated. Follow the procedures below to carry out calibration.

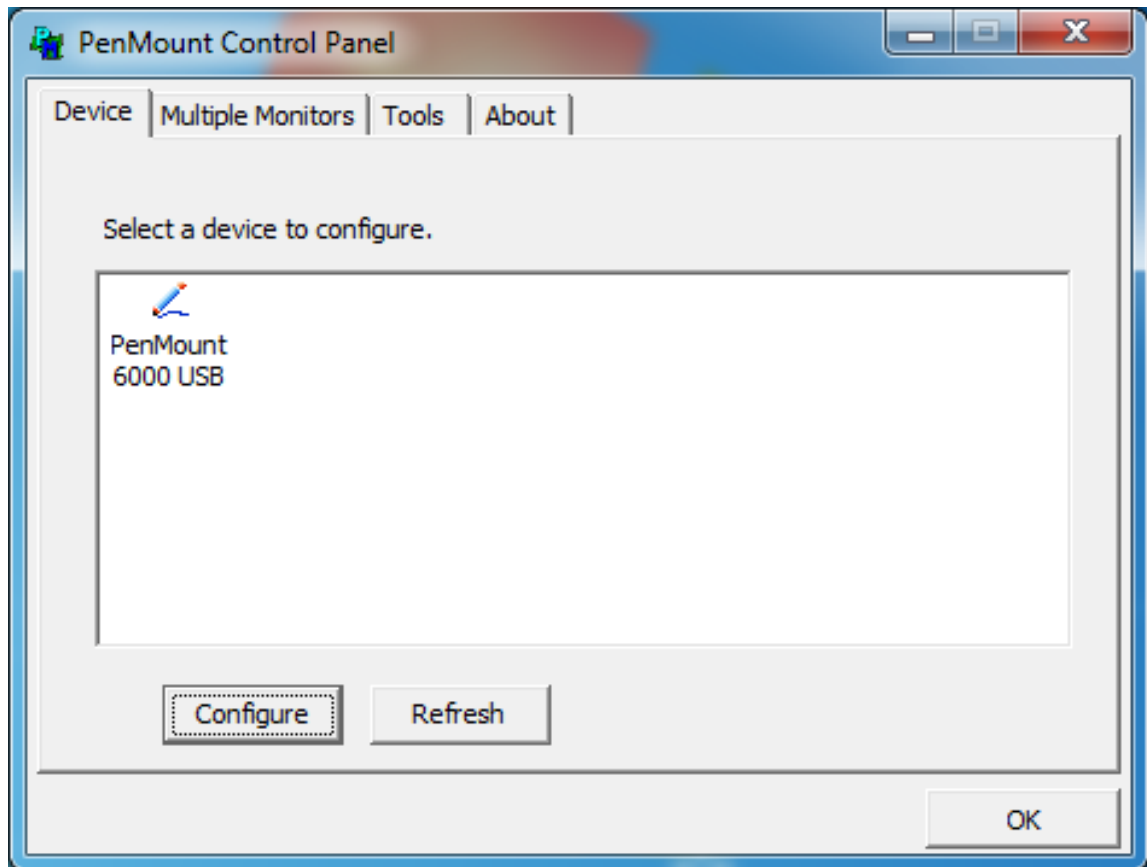

1. After installation, click the PenMount Monitor icon "PM" in the menu bar.
2. When the PenMount Control Panel appears, select a device to "Calibrate."

### PenMount Control Panel (Resistive Touch)

The functions of the PenMount Control Panel are **Device**, **Multiple Monitors**, **Tools** and **About**, which are explained in the following sections.

#### Device

In this window, you can find out that how many devices be detected on your system.

## Calibrate

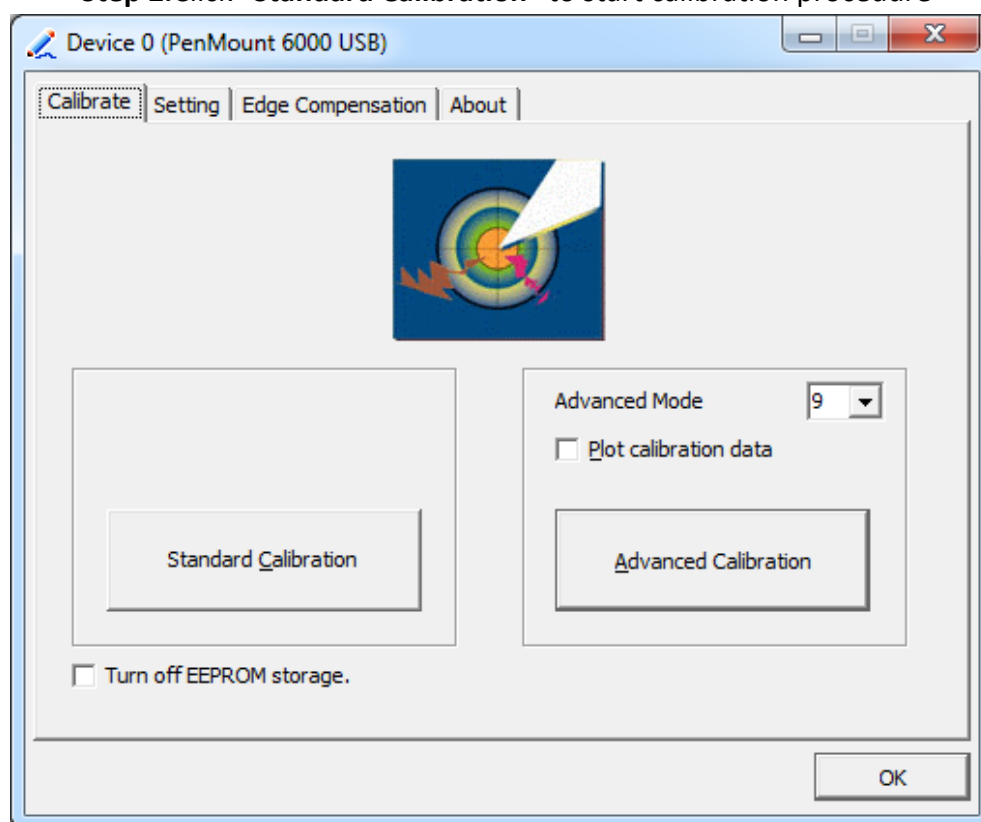

This function offers two ways to calibrate your touch screen. 'Standard Calibration' adjusts most touch screens. 'Advanced Calibration' adjusts aging touch screens.

Standard Calibration	<b>Click this button and arrows appear pointing to red squares. Use your finger or stylus to touch the red squares in sequence. After the fifth red point calibration is complete. To skip, press 'ESC'.</b>
Advanced Calibration	<b>Advanced Calibration uses 4, 9, 16 or 25 points to effectively calibrate touch panel linearity of aged touch screens. Click this button and touch the red squares in sequence with a stylus. To skip, press ESC'.</b>

**Step 1.** Please select a device then click "Configure". You can also double click the device too.

**Step 2.**Click “Standard Calibration” to start calibration procedure

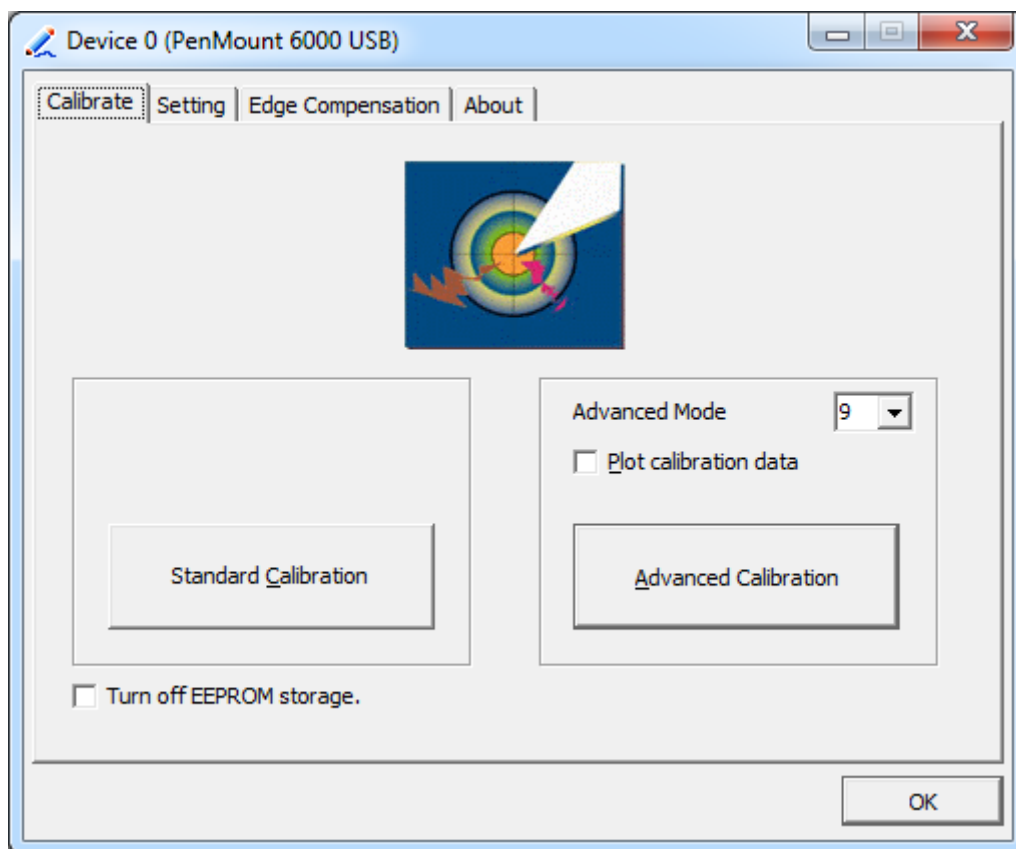

**NOTE:** The older the touch screen, the more Advanced Mode calibration points you need for an accurate calibration. Use a stylus during Advanced Calibration for greater accuracy. Please follow the step as below:

**Step 3.** Select **Device** to calibrate, then you can start to do **Advanced Calibration**.

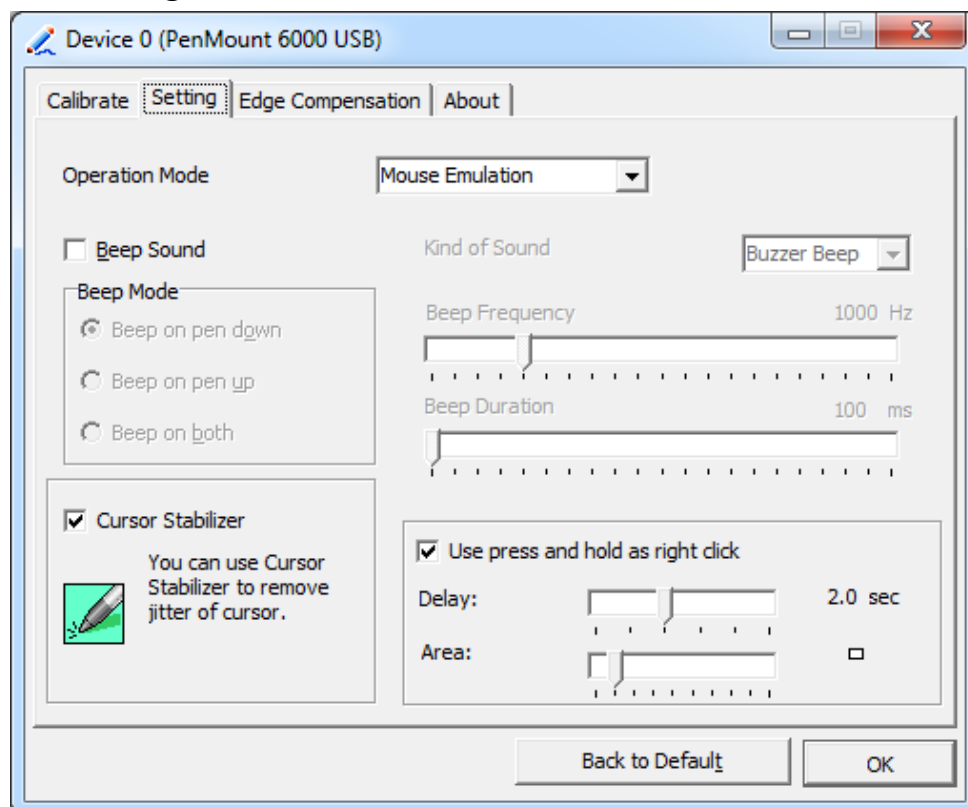

**NOTE:** Recommend to use a stylus during Advanced Calibration for greater accuracy.

Plot Calibration Data	Check this function and a touch panel linearity comparison graph appears when you have finished Advanced Calibration. The blue lines show linearity before calibration and black lines show linearity after calibration.
Turn off EEPROM storage	The function disable for calibration data to write in Controller. The default setting is Enable.

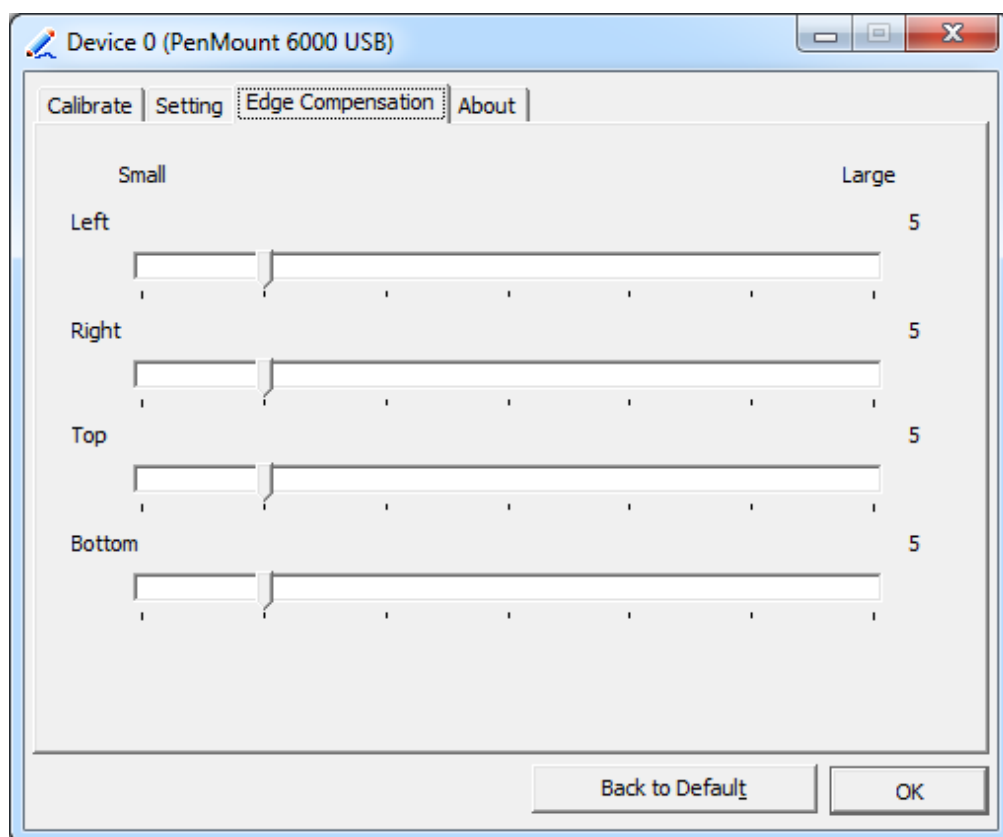

## Setting

Touch Mode	<p><b>This mode enables and disables the mouse's ability to drag on-screen icons – useful for configuring POS terminals.</b></p> <p><b>Mouse Emulation – Select this mode and the mouse functions as normal and allows dragging of icons.</b></p> <p><b>Click on Touch – Select this mode and mouse only provides a click function, and dragging is disabled.</b></p>
Beep Sound	<p><b>Enable Beep Sound – turns beep function on and off</b></p> <p><b>Beep on Pen Down – beep occurs when pen comes down</b></p> <p><b>Beep on Pen Up – beep occurs when pen is lifted up</b></p> <p><b>Beep on both – beep occurs when comes down and lifted up</b></p> <p><b>Beep Frequency – modifies sound frequency</b></p> <p><b>Beep Duration – modifies sound duration</b></p>
Cursor Stabilizer	<p><b>Enable the function support to prevent cursor shake.</b></p>
Use press and hold as right click	<p><b>You can set the time out and area for you need.</b></p>

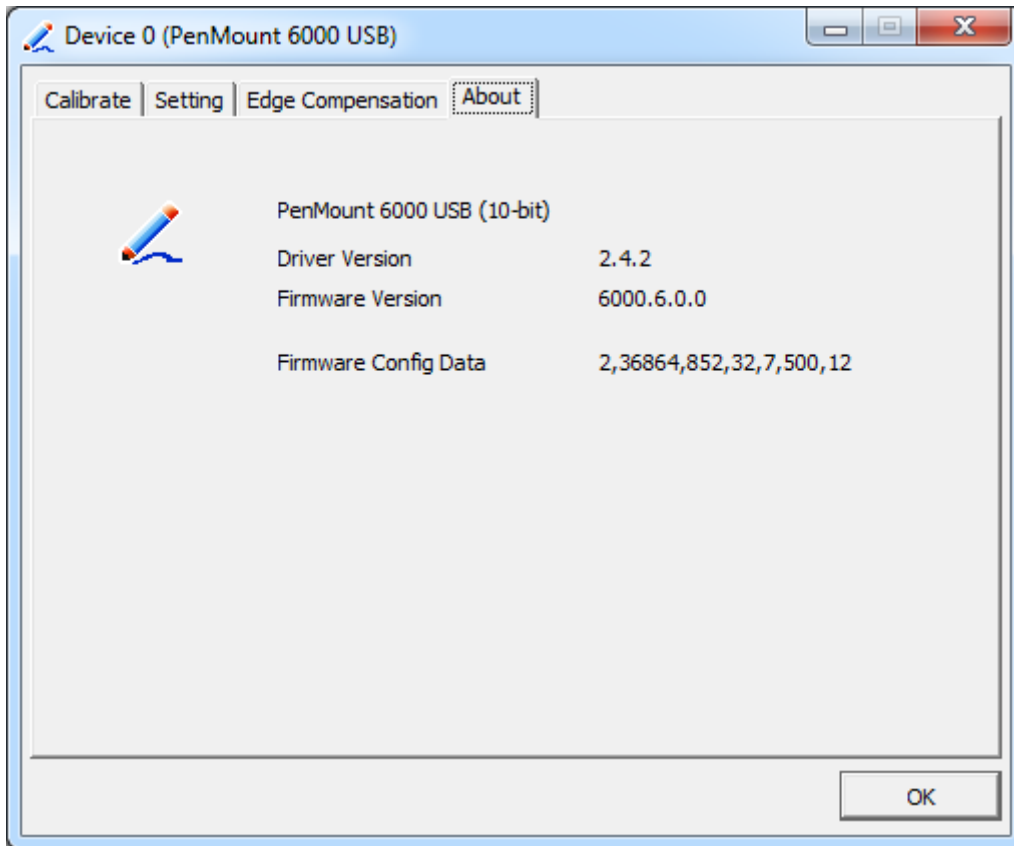

## Edge Compensation

You can use Edge Compensation to calibrate more subtly.

## About

This panel displays information about the PenMount controller and driver version.

## Multiple Monitors

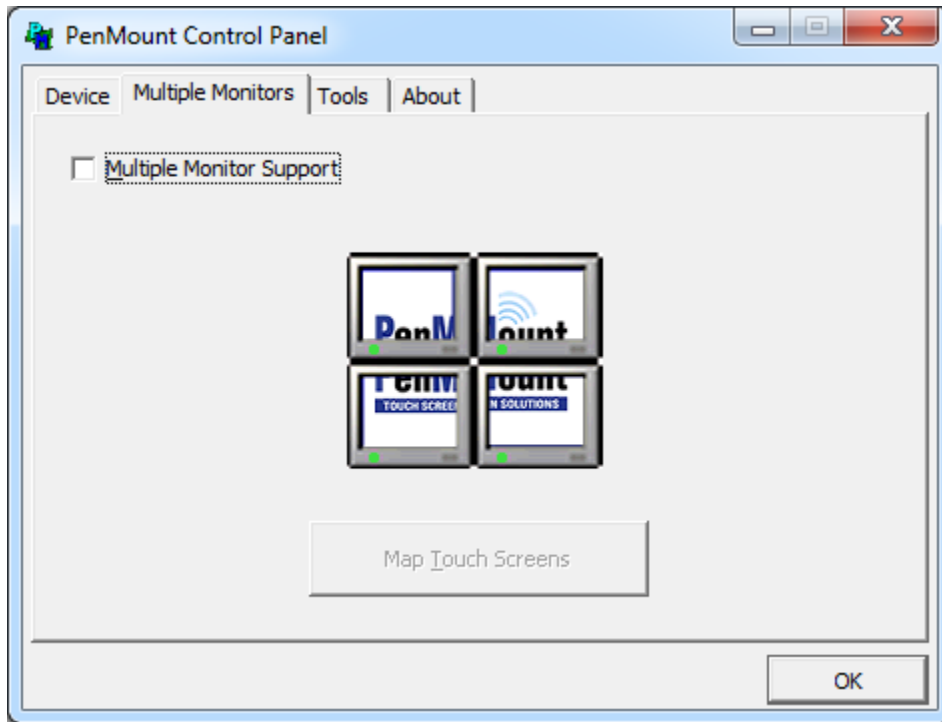

Multiple Monitors support from two to six touch screen displays for one system. The PenMount drivers for Windows 7/8/8.1 support Multiple Monitors. This function supports from two to six touch screen displays for one system. Each monitor requires its own PenMount touch screen control board, either installed inside the display or in a central unit. The PenMount control boards must be connected to the computer COM ports via the USB interface. Driver installation procedures are the same as for a single monitor. Multiple Monitors support the following modes:

Windows Extends Monitor Function  
Matrox DualHead Multi-Screen Function  
nVidia nView Function

**NOTE:** The Multiple Monitor function is for use with multiple displays only. Do not use this function if you have only one touch screen display. Please note once you turn on this function the rotating function is disabled.

Enable the multiple display function as follows:

1. Check the **Enable Multiple Monitor Support** box; then click **Map Touch Screens** to assign touch controllers to displays.

2. When the mapping screen message appears, click **OK**.
3. Touch each screen as it displays "Please touch this monitor". Following this sequence and touching each screen is called **mapping the touch screens**.

4. Touching all screens completes the mapping and the desktop reappears on the monitors.

5. Select a display and execute the "Calibration" function. A message to start calibration appears. Click **OK**.

6. "Touch this screen to start its calibration" appears on one of the screens. Touch the screen.
7. "Touch the red square" messages appear. Touch the red squares in sequence.
8. Continue calibration for each monitor by clicking **Standard Calibration** and touching the red squares.

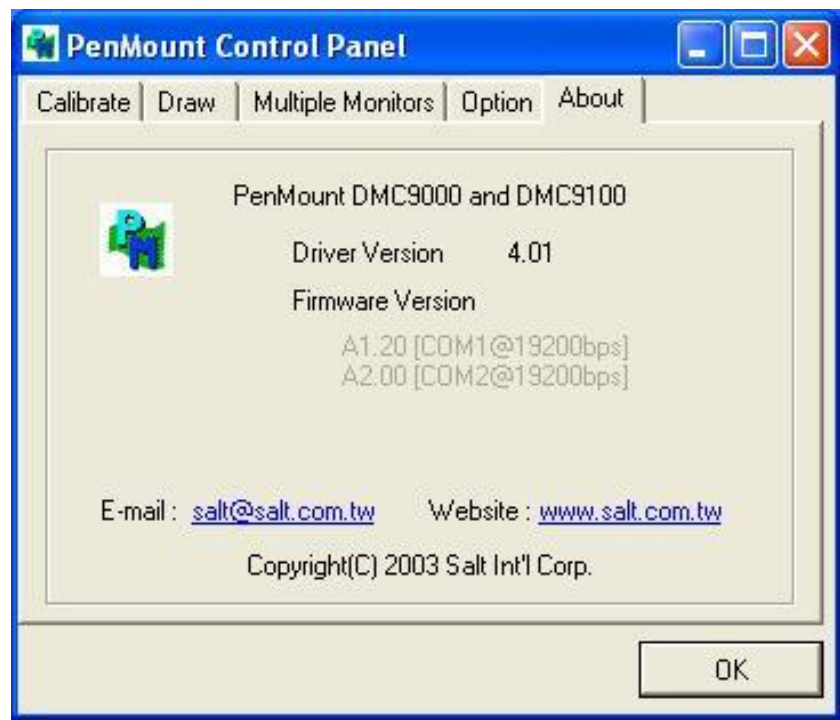

#### NOTES:

1. If you use a single VGA output for multiple monitors, please do not use the **Multiple Monitor** function. Just follow the regular procedure for calibration on each of your desktop monitors.
2. The Rotating function is disabled if you use the Multiple Monitor function.
3. If you change the resolution of display or screen address, you have to redo **Map Touch Screens**, so the system understands where the displays are.

About

This panel displays information about the PenMount controller and this driver version.

PenMount Monitor Menu Icon

The PenMount monitor icon (PM) appears in the menu bar of Windows 7/8/8.1 system when you turn on PenMount Monitor in PenMount Utilities.

PenMount Monitor has the following function

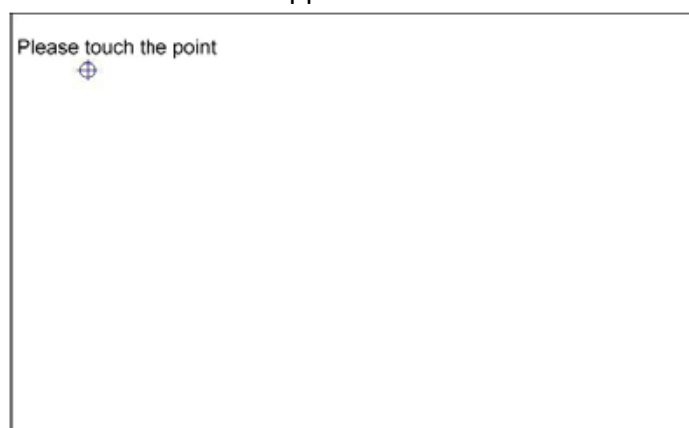

Control Panel	Open Control Panel Windows
