(hereinafter referred to as "IBASE").

Disclaimer

IBASE reserves the right to make changes and improvements to the products described in this document without prior notice. Every effort has been made to ensure the information in the document is correct; however, IBASE does not guarantee it is error-free. IBASE assumes no liability for incidental or consequential damages arising from misapplication or inability to use the product or the information contained herein, nor for any infringements of rights of third parties, which may result from its use.

Trademarks

All the trademarks, registrations and brands mentioned herein are used for identification purposes only and may be trademarks and/or registered trademarks of their respective owners.

Compliance

CE

This product has passed CE Class B tests for environmental specifications and limits. This product is in accordance with the directives of the European Union (EU). In a domestic environment, this product may cause radio interference in which case users may be required to take adequate measures.

FC

This product has been tested and found to comply with the limits for a Class B device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications.

WEEE

This product must not be disposed of as normal household waste, in accordance with the EU directive of for waste electrical and electronic equipment (WEEE - 2012/19/EU). Instead, it should be disposed of by returning it to a municipal recycling collection point. Check local regulations for disposal of electronic products.

Green IBASE

This product complies with RoHS 2 restrictions, which prohibit the use of certain hazardous substances in electrical and electronic equipment. The following substances must not exceed the specified concentrations:

- Hexavalent chromium: 1,000 ppm
- Poly-brominated biphenyls (PBBs): 1,000 ppm
- Poly-brominated diphenyl ethers (PBDEs): 1,000 ppm
- Cadmium: 100 ppm
- Mercury: 1,000 ppm
- Lead: 1,000 ppm
- Bis(2-ethylhexyl) phthalate (DEHP): 1,000 ppm
- Butyl benzyl phthalate (BBP): 1,000 ppm
- Dibutyl phthalate (DBP): 1,000 ppm
- Diisobutyl phthalate (DIBP): 1,000 ppm

Important Safety Information

Carefully read the precautions before using the board.

Environmental conditions:

- Use this product in environments with temperatures between 0°C and 60°C or between -40°C to 85°C depending on the board model.
- Do not leave this product in an environment where the storage temperature may be below -40°C or above 85° C. To prevent from damages, the product must be used in a controlled environment.

Care for your IBASE products:

- Before cleaning the PCB, unplug all cables and remove the battery.
- Clean the PCB with a circuit board cleaner or degreaser, or use cotton swabs and alcohol.
- Vacuum the dust with a computer vacuum cleaner to prevent the fan from being clogged.

Anti-static precautions

- Wear an anti-static wrist strap to avoid electrostatic discharge.
- Place the PCB on an anti-static kit or mat.
- Hold the edges of PCB when handling.
- Touch the edges of non-metallic components of the product instead of the surface of the PCB.
- Ground yourself by touching a grounded conductor or a grounded bit of metal frequently to discharge any static.

There is danger of explosion if the internal lithium-ion battery is replaced by an incorrect type. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions or recycle them at a local recycling facility or battery collection point.

Warranty Policy

• IBASE standard products:

24-month (2-year) warranty from the date of shipment. If the date of shipment cannot be ascertained, the product serial numbers can be used to determine the approximate shipping date.

• 3rd-party parts:

12-month (1-year) warranty from delivery for the 3rd-party parts that are not manufactured by IBASE, such as CPU, CPU cooler, memory, storage devices, power adapter, panel and touchscreen.

* PRODUCTS, HOWEVER, THAT FAIL DUE TO MISUSE, ACCIDENT, IMPROPER INSTALLATION OR UNAUTHORIZED REPAIR SHALL BE TREATED AS OUT OF WARRANTY AND CUSTOMERS SHALL BE BILLED FOR REPAIR AND SHIPPING CHARGES.

Technical Support & Services

- 1. Visit the IBASE website at <u>www.ibase.com.tw</u> to find the latest information about the product.
- 2. If you need any further assistance from your distributor or sales representative, prepare the following information of your product and elaborate upon the problem.
 - Product model name
 - Product serial number
 - Detailed description of the problem
 - The error messages in text or in screenshots if there is any
 - The arrangement of the peripherals
 - Software in use (such as OS and application software, including the version numbers)
- 3. If repair service is required, please obtain RMA authorization from the IBASE website or contact your distributor or sales representative.

Chapter 1 General Information

The information provided in this chapter includes:

- Features
- Packing List
- Optional Accessories
- Specifications
- Block Diagram
- Product View
- Board Dimensions

1.1 Introduction

The IB836 is a 3.5-inch single board computer powered by robust Intel® Atom® / Pentium or Celeron processors to meet the demands of critical real-time computing in applications spanning the retail, transport, industrial automation, and medical sectors. The SBC has two DDR4 memory slots with a 32GB capacity and in-band error-correcting code (IBECC) functionality that corrects single-bit memory errors in standard, non-ECC memory. Three independent displays can be driven with up to 4Kp60 resolutions via two DisplayPort (DP & Type C) and one eDP or LVDS output. Rich I/O connectivity and expansion capabilities allow connection to numerous peripherals and include 2x USB 2.0, 4x USB 3.1, 2x SATA III, 1x M.2 and 1x mPCIe interface, as well as three Gigabit Ethernet ports. Measuring 102mm by 147mm, the board operates on a 9V~36V wide range power input.

IB836 3.5" disk-size SBC

1.2 Features

- 3.5" disk-size SBC with Intel[®] 8th Gen. Core[™] U-series or Celeron[®] processor
- 2 x DDR4-3200 SO-DIMM slots, expandable up to 32 GB
- Video output through LVDS or EDP connector, Display Port, and USB Type C
- 3 x GbE LAN ports, 2 x USB 2.0, 4 x USB 3.0, 4 x COM, 2 x SATAIII, 1 x M.2 (E-Key), 1x mPCIe slot (full-size)
- Configurable watchdog timer, digital I/O, TPM 2.0

1.3 Packing List

Your IB836 package should include the items listed below. If any of the items below is missing, contact the distributor or dealer from whom you purchased the product.

• IB836 SBC

x 1

1.4 Optional Accessories

IBASE provides optional accessories as follows. Please contact us or your dealer if you need any.

Cable Kit (IB76A-2)

Including:x 1DC-In Power Cable (PW592)x 1COM Ports Cable (PK1H)x 1SATA & HDD Power Cable (SATA-53A)x 1USB 2.0 Cable (USB-29)x 1

- Audio cable (Audio-18)
- Heat Spreader (HSIB836-X-2) for Atom series
- Heat Sink (HSIB836-X-B) for Atom series

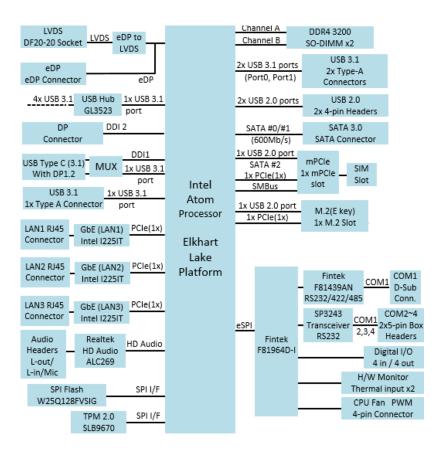

1.5 Specifications

Model	IB836F(E)-6425E	IB836F(E)-6413E	
	Remarks: IB836F: for LVDS only; IB836FE: for eDP only		
Form Factor	3.5" disk-size SBC		
CPU Type	Atom® 4C/ x6425E	Atom® 4C/ x6413E	
CPU Speed	1.8GHz 3.0GHz	1.5GHz 3.0GHz	
Cache	1.5MB	1.5MB	
Chipset	Integrated in Intel® SoC		
Memory	2x DDR4-3200 SO-DIMM, Max Remarks: IB836F(E)-J6413E and IB836	, 11	
Storage	1x mSATA (shared with SATA	port)	
Graphics	Intel® SoC integrated Gen11 C	Graphics	
LAN	3x Intel® I225IT PCI-E GbE		
Super I/O	Fintek F81964D-I		
Audio Codec Controller	Built-in HD with Realtek ALC269 w/ class-D amplifier		
Power Requirement	9V ~ 36V DC-In		
USB Type C	USB 3.1 (Gen.2)		
ТРМ	2.0		
Watchdog Timer	Yes (256 segments, 0, 1, 2255 sec / min)		
BIOS	AMI BIOS		
H/W Monitor	Yes		
Dimensions	102.22 x 147.01 mm (4.02" x 5.8")		
RoHS	Yes		
Certification	CE, FCC Class B		
Operating	Windows 10		
System	Linux Ubuntu		

Model	IB836F(E)-6425E	IB836F(E)-6413E	
I/O Ports			
Display	2x DisplayPort (DP connector & Type-C), eDP or 24-bit dual-channel LVDS		
LAN	2 x RJ45 GbE LAN		
USB	• 2x USB2.0 (Pin-header))	
036	• 3x USB3.1 (Type-A), 1x	USB Type-C	
Serial	• 1x RS232/422/485 (Jum	nperless selection)	
Serial	• 3x RS232		
SATA	2 x SATA III		
Audio	On-board audio connector for Line-In, Line-Out, and Mic-In		
Digital IO	4-In & 4-Out		
Expansion Slots	1x M.2 (E-Key, type:2230), 1x MPCIe (full-size)		
	Environment		
T	Operating: -40°C ~ 70 °C (-40°F ~ 158 °F)		
Temperature	Storage: -40°C ~ 85 °C (-40°F ~ 185 °F)		
Relative Humidity	0 ~ 90 %, non-condensing at 60 °C		

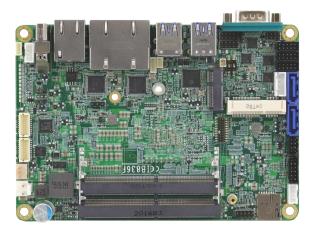

All specifications are subject to change without prior notice.

Chapter 2 Hardware Configuration

This section provides information on jumper settings and connectors on the IB836 in order to set up a workable system. On top of that, you will also need to install crucial pieces such as the CPU and the memory before using the product. The topics covered are:

- Essential installations before you begin
- Jumper and connector locations
- Jumper settings and information of connectors

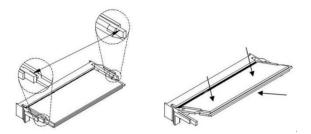

2.1 Essential Installations

Follow the instructions below to install the memory.

2.1.1 Installing the Memory

The IB836 series supports two DDR4 memory sockets for a maximum total memory of 32 GB. To install the modules, locate the memory slot on the board and perform the following steps:

- 1. Align the key of the memory module with that on the memory slot and insert the module slantwise.
- Gently push the module in an upright position until the clips of the slot close to hold the module in place when the module touches the bottom of the slot.

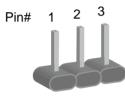

To remove the module, press the clips outwards with both hands, and the module will pop-up.

2.2 Setting the Jumpers

Set up and configure your IB836 by using jumpers for various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your use.

2.2.1 How to Set Jumpers

Jumpers are short-length conductors consisting of several metal pins with a non-conductive base mounted on the circuit board. Jumper caps are used to have the functions and features enabled or disabled. If a jumper has 3 pins, you can connect either PIN1 to PIN2 or PIN2 to PIN3 by shorting.

A 3-pin jumper

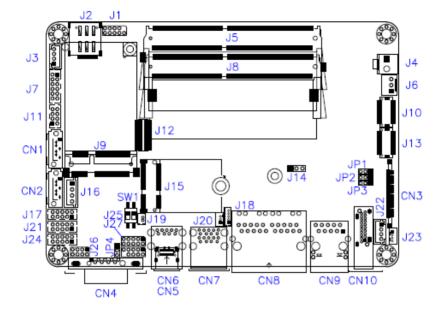

A jumper cap

Refer to the illustration below to set jumpers.

Pin closed	Oblique view	Schematic illustration in the manual
Open		$ \Box \bigcirc \bigcirc $ 1 2 3
1-2		
2-3		

When two pins of a jumper are encased in a jumper cap, this jumper is closed, i.e. turned On.

When a jumper cap is removed from two jumper pins, this jumper is **open**, i.e. turned **Off**.

7	+5V	8	Ground

J26 is utilized for system indicators to provide light indication of the computer activities and switches to change the computer status. It provides interfaces for the following functions.

• ATX Power ON Switch (Pins 1 and 2)

The 2 pins makes an "ATX Power Supply On/Off Switch" for the system that connects to the power switch on the case. When pressed, the power switch will force the system to power on. When pressed again, it will power off the system.

• Hard Disk Drive LED Connector (Pins 3 and 4)

This connector connects to the hard drive activity LED on control panel. This LED will flash when the HDD is being accessed.

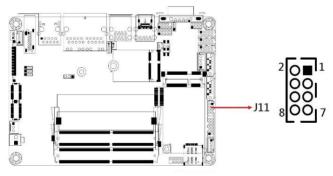

• Reset Switch (Pins 5 and 6)

The reset switch allows you to reset the system without turning the main power switch off and then on again. Orientation is not required when making a connection to this header.

• Power LED: Pins 7 and 8

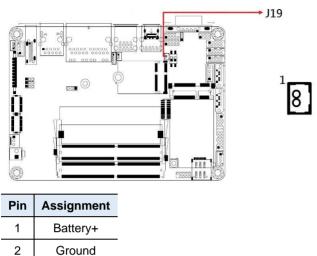

This connector connects to the system power LED on control panel. This LED will light when the system turns on.

Chapter 3 Drivers Installation

This chapter introduces installation of the following drivers:

- Intel[®] Chipset Software Installation Utility
- VGA Driver
- HD Audio Driver
- LAN Driver
- Intel[®] Management Engine Drivers Installation

3.1 Intel[®] Chipset Software Installation Utility

This section describes the installation procedures for software drivers. The software drivers are available on the IBASE website. Go to the product's download page. Copy the compressed drivers file to your computer. Double-click the file to extract it. Run "CDGuide" to access the main drivers page.

Note: After installing the Windows operating system, install the Intel[®] Chipset Software Installation Utility first before proceeding with the driver installation.

The Intel[®] Chipset drivers should be installed first before the software drivers to install INF files for Plug & Play function for Intel chipset components.

1. Click Intel on the left pane and then Intel(R) Elkhartlake Chipset Drivers on the right pane.

2. Click Intel(R) Chipset Software Installation Utility.

Chapter 4 BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

- Main Settings
- Advanced Settings
- Chipset Settings
- Security Settings
- Boot Settings
- Save & Exit

4.1 Introduction

The BIOS (Basic Input/Output System) installed in the ROM of your computer system supports Intel[®] processors. The BIOS provides critical low-level support for standard devices such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

4.2 BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Press the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup.

If you still need to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again.

The following message will appear on the screen:

Press to Enter Setup

In general, press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help, and <Esc> to quit.

When you enter the BIOS Setup utility, the *Main Menu* screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: It is strongly recommended that you avoid making any changes to the chipset defaults.

These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could make the system unstable and crash in some cases.

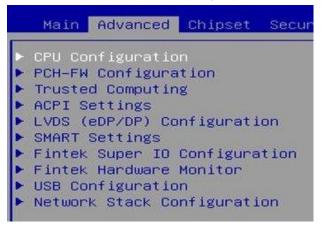

4.3 Main Settings

Main Advanced Chipset Se	Aptio Setup – AMI curity Boot Save & Exit	
Total Memory Memory Data Rate	8192 MB 2400 MTPS	Set the Date. Use Tab to switch between Date elements. Default Ranges: Year: 1998-9999

BIOS Setting	Description
ME State	When disabled ME will be put into ME Temporarily Disabled Mode.

4.4.3 Trusted Computing

TPM 2.0 Device Found		Enables or Disables BIOS
Firmware Version:	7.62	support for security device.
Vendor:	IFX	0.S. will not show Security Device. TCG EFI protocol and
		INTIA interface will not be
Active PCR banks	SHA256	available.
Available PCR banks	SHA-1,SHA256	
SHA-1 PCR Bank	[Disabled]	
SHA256 PCR Bank	[Enabled]	
Pending operation	[None]	
Platform Hierarchy	[Enabled]	
Storage Hierarchy	[Enabled]	++: Select Screen
Endorsement Hierarchy	[Enabled]	↑↓: Select Item
TPM 2.0 UEFI Spec Version	[TCG_2]	Enter: Select
Physical Presence Spec Version	[1.3]	+/-: Change Opt.
TPM 2.0 InterfaceType	[TIS]	F1: General Help
Device Select	(Auto)	F2: Previous Values
		F3: Optimized Defaults
		F4: Save & Exit
		ESC: Exit

BIOS Setting	Description	
Security Device Support	Enables / Disables BIOS support for security device. OS will not show security device. TCG EFI protocol and INTIA interface will not be available.	
SHA-1 PCR Bank	Enables / Disables SHA-1 PCR Bank.	
SHA256 PCR Bank	Enables / Disables SHA256 PCR Bank.	
Pending operation	Schedule an operation for the security device.	
	Note: Your computer will reboot during restart in order to change state of security device.	
Platform Hierarchy	Enables / Disables platform hierarchy.	
Storage Hierarchy	Enables / Disables storage hierarchy.	
Endorsement Hierarchy	Enables / Disables endorsement hierarchy.	
TPM2.0 UEFI Spec Version	Selects the supported TCG version based o your OS.	
	 TCG_1_2: supports Windows 8 /10. TCG_2: supports new TCG2 protocol and event format for Windows 10 or later. 	
Physical Presence Spec Version	Selects to show the PPI Spec Version (1.2 or 1.3) that the OS supports.	
	Note: Some HCK tests might not support 1.3.	
Device Select	 TPM 1.2 will restrict support to TPM 1.2 devices only. TPM 2.0 will restrict support to TPM 2.0 devices only. Auto will support both with the default being set to TPM 2.0 deices if not found, and TPM 1.2 device will be enumerated. 	

4.4.4 ACPI Settings

BIOS Setting	Description
Enable Hibernation	Enables / Disables the system ability to hibernate (OS/S4 Sleep State). This option may be not effective with some OS.
ACPI Sleep State	Selects an ACPI sleep state (Suspend Disabled or S3) where the system will enter when the Suspend button is pressed.

4.4.5 LVDS (eDP/DP) Configuration

Advanced	Aptio Setup – AMI	
LVDS (eDP/DP) Configuration		LVDS (eDP/DP) ON/OFF
LVDS (eDP/DP) Support		
		<pre>**: Select Screen 14: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F3: Optimized Defaults F4: Save & Exit ESC: Exit</pre>
Versio	on 2.21.1278 Copyright (C) :	2021 AMI

BIOS Setting	Description	
LVDS (eDP/DP) Support	Enables / Disables LVDS (eDP/DP).	
Panel Color Depth	Selects the panel collor depth.	
	Options: 18 bit, 24 Bit (VESA), 24 bit (JEIDA)	
LVDS Channel Type	Chooses the LVDS as single or dual channel.	
LCD Panel Type	Selects LCD panel used by Intel Graphics Device by selecting the appropriate setup item.	
	Resolution Options: VBIOS Default, 800 x 480, 800 x 600, 1024 x 768, 1280 x 800, 1280 x 1024, 1366 x 768, 1440 x 900, 1600 x 900, 1680 x 1050, 1920 x 1080, 1920 x 1200	
LVDS Brightness Level Control	Options: Level-1 to Level-8	

4.4.6 SMART Settings

4.4.7 F81846 Super IO Configuration

Advanced	Aptio Setup — AMI	
Fintek Super IO Configuration		[Enable]Provide the Standby Power for devices.

	version 2.21.1278 Copyright (C	2) 2021 AMT

BIOS Setting	Description
Temperatures / Voltages	These fields are the parameters of the hardware monitoring function feature of the motherboard. The values are read-only values as monitored by the system and show the PC health status.

4.4.9 USB Configuration

Advanced	Aptio Setup — AMI	
USB Configuration		Enables Legacy USB support. AUTO option disables legacy
USB Module Version	25	support if no USB devices are connected. DISABLE option will
USB Controllers: 1 XHCI		keep USB devices available only for EFI applications.
USB Devices: 1 Keyboard, 2 Hubs		
Legacy USB Support XHCI Hand-off	[Enabled] [Enabled]	
USB Mass Storage Driver Support	[Enabled]	
USB hardware delays and time-outs: USB transfer time-out	[20 sec]	++: Select Screen ↑↓: Select Item
Device reset time-out	[20 sec]	Enter: Select
Device power-up delay	[Auto]	+/-: Change Opt. F1: General Help
		F2: Previous Values
		F3: Optimized Defaults F4: Save & Exit
		ESC: Exit
Version 2	2.21.1278 Copyright (C) 202:	L AMI

BIOS Setting	Description	
Legacy USB Support	• Enabled enables Legacy USB support.	
	 Auto disables legacy support if there is no USB device connected. 	
	 Disabled keeps USB devices available only for EFI applications. 	
XHCI Hand-off	This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.	
USB Mass Storage Driver Support	Enables / Disables the support for USB mass storage driver.	
USB Transfer time-out	The time-out value (1 / 5 10 / 20 secs) for Control, Bulk, and Interrupt transfers.	
Device reset time-out	Gives seconds (10 / 20 / 30 / 40 secs) to delay execution of Start Unit command to USB mass storage device.	
Device power-up delay	The maximum time the device will take before it properly reports itself to the Host Controller.	
	Auto uses default value for a Root port it is 100ms. But for a Hub port, the delay is taken from Hub descriptor.	

4.4.10 Network Stack Configuration

Aptio Setup - AMI Advanced		
Network Stack IPv4 PXE Support IPv6 PXE Support PXE boot wait time Media detect count	(Enabled) [Disabled] [Disabled] 0 1	Enable∕Disable UEFI Network Stack
	Network Stack — Disabled Enabled	+: Select Screen 14: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F3: Optimized Defaults F4: Save & Exit ESC: Exit

BIOS Setting	Description	
Network Stack	Enable/Disable UEFI Network Stack	
IPv4 PXE Support	Enable/Disable IPv4 PXE boot support. If disabled, IPv4 PXE boot support will not be available.	
IPv6 PXE Support	Enable/Disable IPv6 PXE boot support. If disabled, IPv6 PXE boot support will not be available.	
PXE boot wait time	Wait time in seconds to press ESC key to abort the PXE boot. Use either +/- or numeric keys to set the value.	
Media detect count	Number of times the presence of media will be checked. Use either +/- or numeric keys to set the value.

BIOS Setting	Description
Setup Prompt Timeout	Number of seconds to wait for setup activation key.
	65535 (0xFFFF) means indefinite waiting.
Bootup NumLock State	Selects the keyboard NumLock state.
Quiet Boot	Enables / Disables Quiet Boot option.
Fast Boot	Enables / Disables boot with initialization of a minimal set of devices required to launch the active boot option. Has no effect for BBS boot options.
Boot mode select	Selects a Boot mode, Legacy / UEFI / Dual.
Boot Option Priorities	Sets the system boot order priorities for hard disk, CD/DVD, USB, Network.
UEFI Hard Disk Drives BBS Priorities	Specifies the Boot Device Priority sequence from available UEFI Hark Disk Drives.

4.8 Save & Exit Settings

BIOS Setting	Description	
Save Changes and Exit	Exits system setup after saving the changes.	
Discard Changes and Exit	Exits system setup without saving any changes.	
Save Changes and Reset	Resets the system after saving the changes.	
Discard Changes and Reset	Resets system setup without saving any changes.	
Save Changes	Saves changes done so far to any of the setup options.	
Discard Changes	Discards changes done to any of the setup options.	
Restore Defaults	Restores / Loads defaults values for all the setup options.	
Save as User Defaults	Saves the changes done so far as User Defaults.	
Restore User Defaults	Restores the user defaults to all the setup options.	
Launch EFI Shell from filesystem device	Attempts to launch EFI shell application (shell.efi) from one of the available filesystem devices.	

Appendix

This section provides the mapping addresses of peripheral devices and the sample code of watchdog timer configuration.

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0x0000F090-0x0000F097	Standard SATA AHCI Controller
0x0000F080-0x0000F083	Standard SATA AHCI Controller
0x0000F060-0x0000F07F	Standard SATA AHCI Controller
0x00000A00-0x00000A1F	Motherboard resources
0x00000A20-0x00000A2F	Motherboard resources
0x00000A30-0x00000A3F	Motherboard resources

0x00000D00-0x0000FFFF	PCI Express Root Complex	
0x00000040-0x00000043	System timer	
0x00000050-0x00000053	System timer	
0x00001854-0x00001857	Motherboard resources	
0x0000FF00-0x0000FFFE	Motherboard resources	
0x0000F040-0x0000F05F	Mobile 6th/7th Generation Intel(R) Processor Family I/O SMBUS - 9D23	

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ 0	System timer
IRQ 8	System CMOS/real time clock
IRQ 14	Motherboard resources
IRQ 55~204	Microsoft ACPI-Compliant System
IRQ 256~511	Microsoft ACPI-Compliant System
IRQ 4294967294	Standard SATA AHCI Controller
IRQ 4294967290	Intel(R) Ethernet Connection (4) I219-V
IRQ 4294967289	Intel(R) Management Engine Interface
IRQ 4294967288	Intel(R) Dual Band Wireless-AC 8265
IRQ 4294967291	Intel(R) Iris(R) Plus Graphics 650
IRQ 4294967287	Intel(R) Smart Sound Technology (Intel(R) SST) Audio Controller
IRQ 4294967292	Intel(R) USB 3.0 eXtensible Host Controller - 1.0 (Microsoft)
IRQ 4294967293	Realtek PCIE CardReader

C. Watchdog Timer Configuration

The Watchdog Timer (WDT) is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven.

Under normal circumstance, you will need to restart the WDT at regular intervals before the timer counts to zero.

Sample Code:

```
