

## Product End-Of-Life Notification

**Document Number**      PP2-R26020902  
**Discontinuance Model**    IBR210 series  
                                      ISR301 series

**Explanation:** IBASE will *discontinue* the **IBR210/ISR301** once the remaining inventory of IBR210(**167units**) is sold. This decision follows the identification of potential overheating issues stemming from deviations from the NXP reference design during the initial design phase. Please note that while these units are fully functional, they are best suited for applications where the operating temperature remains **below 80°C**.

**Affected Product & Part Number:**

IBR210-Q316I-01 V-1.2A (P66IBR210--12A500R)  
IBR210-Q316I-01-CON V-1.2A (P66IBR210--12A700R)  
IBR210-Q316I V-1.4 (P66IBR210--140400R)  
ISR301-Q316I V-1.1(2) (S02ISR301--110500R)  
ISR301-Q316I V-1.1(1) (S02ISR301--110C00R)  
ISR301-Q316I-CON V-1.1(1) (S02ISR301--110D00R)

**Product Migration Options: *None*.**

Please consider to select IBASE **IBR215 series** as a successor of NXP i.MX products, you may check with your IBASE Sales representative directly.

*Your sincerely,*

Project Manager
